

UTAH MINING MEN VISIT OTHER FIELDS

General Superintendent Gemmel and Manager Jackling Look Over Other Mines.

MANY GOOD POINTS ARE PICKED UP

Valuable Suggestions Are Secured for Handling Big Ton-nages of Ore.

For the purpose of looking over kindred fields, and getting in touch with the latest methods elsewhere of handling huge ton-nages of ore, General Superintendent Robert Gemmel and General Manager D. C. Jackling, of the Utah Copper company, left ten or twelve days ago for the East.

Picked Up Valuable Points.

General Superintendent Gemmel stated to the Tribune Friday that he and Mr. Jackling had made the rounds of prominent mines in Minnesota, Michigan, and elsewhere, and their tour of inspection was one most interesting and instructive.

Four Systems of Mining.

In the Messabi range, Messrs. Gemmel and Jackling visited the Olive company's mines, which are about eighty miles from Duluth. Here four kinds of mining systems were employed, that of end and top slicing, that of the mill, and that of the mill and the mill and the mill.

Affairs in Good Shape.

While on the trip these Utah gentlemen visited the famous Calumet and Hecla property, with which they were necessarily impressed. Mr. Gemmel states that everything regarding the Utah Copper mine and building operations was proceeding along under the most favorable conditions, and he will visit the Bingham properties of the company today.

BULLION TO THE FRONT.

Old-Time Silver Camp Comes to Front by Gold Discovery.

One of the oldest silver camps in the State of Nevada and still one of the most promising in this reconstruction period of this State's mineral resources, is the Old-Time silver camp. The reports given by those returning from that district there is a general air of activity and hope, and the value of the property is being valued in silver record of the past by gold discoveries of the present.

Upon the Gold Quartz group of claims, one of the oldest prospectors in Nevada, Charles Montgomery, opened up a large body of gold ore that gives values of \$90 to the ton. Old-time properties which have been opened during the winter have responded handsomely in gold values, many free-gold strikes creating a small amount of excitement at the time.

According to all reports there are several Salt Lake investors whose Bullion interests have proved to be most wise. It is understood that a \$600 contract has been let on the Little Gem mine, the property of Salt Lake and San Francisco investors, and that much is reasonably expected from this property from the nature of the present developments.

YOUNGSTER BEGINS WORK.

Lately Incorporated Beaver County Company Begins Development.

E. E. Howard and W. F. Nien of Cedar, Neb., respectively president and secretary of the Silver Crown Mining company, recently organized in Beaver county, arrived in the city on Thursday morning and left for the scene of future mining operations in the afternoon on the Los Angeles Limited. The property of the management is extracting a ton of future mining operations in the afternoon on the Los Angeles Limited.

MAY A BANNER MONTH.

Utah Mine Company Will Strive to Accomplish Much This Month.

The management of the Utah mine hopes to make of the present month one of the banner months of the year. A steady stream of ore is coming from the property at Fish Springs, although the management is extracting no more ore in doing development work than is necessary to keep the six teams busy hauling it to Quota. Four cars are expected during May, and it is not unlikely that some means will soon be provided whereby the company can dispose more readily of its fat accumulating surplus. It is thought probable that an increased dividend will be declared before July.

WE WANT THE WAGE EARNER

to call this bank his bank; we want him to feel that we are as much interested in his welfare as we are in the welfare of the largest depositor. The smallest account on our books may be the largest one on our books five years from now. There is everything in making a start, and adding to it regularly.

Salt Lake Security & Trust Co.

IN OUR OWN BUILDING, 32-34 Main Street. Why not start NOW?

CONNECTIONS MADE IN CARISA WORKINGS

Improvement Will Permit the More Economical Handling of the Ore.

Superintendent Ed Hoffman of the Carisa and Silver Shield properties passed through Salt Lake Friday on his way to the Silver Shield mine at Bingham. Mr. Hoffman was very enthusiastic over the more recent developments that had crowned the work of the management, and that the Carisa will soon be exceeding its present output of fifty tons a day, in his candid opinion.

Connection is Made.

Mr. Hoffman states that the connection between the 700-foot level of the Carisa and the 500-foot level of the Silver Shield was completed, providing a much more economical and satisfactory outlet for the Carisa ore. He was of the opinion that this latest improvement to the mine will be in full use within a week's time.

No Idea of Extent.

As to the ore bodies of the Carisa, Mr. Hoffman had nothing but the highest praise. On the 700-foot level the management has gone down a distance of twenty-five feet, all in ore that runs from 6 per cent to 7 per cent in copper. The management has no idea of the extent of this body, and all that they can say about it is that it is magnificent. Hoffman states that the Carisa will draw no small portion of its future shipments.

Will Increase Shipments.

Mr. Hoffman is of the opinion that between now and the first of June the shipments from the Carisa will be greatly increased, as the management has abundant resources upon which to draw, and the most improved methods for handling the product of the mine.

Good Silver Shield News.

A message received by Mr. Hoffman Thursday from the Silver Shield property announced that there were developments of great significance in the mine, and Mr. Hoffman is on his way to investigate the real conditions.

CHERRY CREEK GOLD ORE.

Rich Trial Shipments Rans Excceedingly High in Yellow Metal.

W. J. and J. S. Wallace of the Joanna mine at Cherry Creek have received the returns from the trial shipment recently brought to this city. The average assay made on ore from this mine runs 147 ounces in gold and 40 1/2 ounces in silver.

The ore has attracted considerable attention on account of its beauty and richness, and the gentlemen are very much pleased at the returns secured. A recent trial run of ten tons of the fourth shipment got a total value of \$39.20.

Boston Stock Market.

James A. Pollock & Co. furnish the following Boston quotations, received from their private wires:

Table with columns: Boston, Sale, High, Low, Close. Lists various stocks like Boston, Bingham, Butte, etc.

New York Mining Stocks.

Table with columns: Adams, Adams, Adams, Adams. Lists mining stocks like Adams, Adams, Adams.

BOSTON MINING STOCKS.

Table with columns: Adventure, Adventure, Adventure. Lists mining stocks like Adventure, Adventure, Adventure.

Advices Buying of Stocks.

James A. Pollock & Co. furnish the following advices from McIntyre & Co. of New York, received over their private wire. We regard the market as in a much healthier condition and the bad news as now having practically all come out and been discounted. We should note the position of advising purchases of any good stocks on all further soft spots and declines, rather than suggest sales as heretofore in the market.

Ore Shipments.

The Pioneer sampler released the following number of cars of ore Friday: Tintic, 3; Bingham, 2; Nevada, 1; Utah, 1; Colorado, 1; Grand, 1; Great Bend, 1; Jumbo, 1; Red Top, 1; Sandstone, 1; Silver Peak, 1; Bull, Nat'l Bank, 1; Gold Bar, 1; Mont. Mountain, 1; Washburn, 1; Granite, 1; Jump Jack, 1; Victor, 1; Man Dexter, 1; Man L. Hume, 1; Man P. A. Hume, 1; Sevier, 1; Forenoon, 1.

The Metal Market.

The metal quotations for Friday were as follows: Silver, 66 1/2; lead, 12 1/2; copper, 87 1/2. The metal quotations for Friday were as follows: Silver, 66 1/2; lead, 12 1/2; copper, 87 1/2.

Mining Notes.

Col. S. Trawick, president of the Wabash company, has returned from a trip north on mining business. R. J. Catrow, the largest stockholder of the Ohio Copper company, is expected in this city this week. Secretary and Treasurer G. W. Lambourne, of the Daily-Judge company, was at the mine in Park City Friday.

NEVADA STOCKS ON SALT LAKE CHANGE

Cordial Welcome Accorded the Tardy Listing of Nevada Mining Stocks.

SHOWS MANY SALTLAKERS ARE BUYERS

Indications Are New Venture Will Prove Wise Investment in Time.

Those of Salt Lake who have been watching for the initial appearance of Nevada stocks on the local stock and mining exchange with considerable trepidation were given a genuine treat Friday in the manner in which the newcomers were treated by local investors and members of the exchange. Those who have doubted the importance of Salt Lake as a center of Nevada stock activity, and those who have doubted likewise that Salt Lake money has been finding its way into Nevada stocks have only to look at the activity displayed in these stocks on Friday, the first day of their appearing.

Utah Stocks Suffered.

Utah stocks were for the time being relegated to the extreme rear, and interest centered in a true but generous focus upon the stocks of the neighboring state. There was hardly a stock without its quotation, and there were many the subject of sales, but all were centers of interest. The Nevada stocks, however, which they were received it is more than apparent that as a Nevada center Salt Lake will be able to hold up its end of the bargain with the Nevada stocks, and that this will grow under the present conditions is more than conceded by the local brokers.

Total Number of Sales.

Among the Nevada stocks sold during Friday were: Montgomery Mountain, Manhattan Gold King, North Star and Mohawk. May Day held the record for sales of Utah stocks, and continued throughout the day, hovering around 23 and 24 cents. A total of 30,256 shares were sold during the day, representing a market value of \$18,875. The quotations for the day closed as follows:

Table with columns: Bid, Asked, P.M. Lists various stocks like Ajax, Alice, Black Jack, etc.

Fortunate Condition of Affairs on Property of Nevada Hills Property.

W. H. Clark, one of the first to enter the fields of Nevada successfully, and having interests of great value in many prominent mining camps of that fascinating State, left Friday on the noon train for Fairview. In the Fairview camp Mr. Clark and associates have property which can safely be counted as among the top-notchers of the entire State.

Sacking Without Sorting.

Among the very first to reach this new district, Mr. Clark has gathered together a group of properties, known as the Nevada Hills, which has been leading the properties of that district in richness in results and faithfulness of mining development. The Nevada Hills company is not wasting any time in seeking the lower levels of the property, and so rich in the character of ore encountered during development, that it needs no sorting, and the management is sacking the rich rock as fast as it is taken out.

Large Values Per Ton.

Values in the Fairview district, strictly of Salt Lake origin, have been notoriously large, carrying chiefly silver, and the ore that is being sacked by the Nevada Hills company all will run above \$300 per ton. The Nevada Hills company is on the ground at the present time, his experience of years being not a little reason for the confidence which the property is in at the present time.

WILL PROSPECT IN NEVADA.

Superintendent Ball of the Lower Mammoth company, under whose intelligent and careful direction the mining of that company has been rapidly progressing to the ranks of steady and remunerative producers, has severed his connection with the company temporarily and will go into Nevada for a summer's hunt after bonanzas in that most bonanzaous of States. Mr. Ball will be getting together an outfit calculated to last him and his associates during the summer months. When there are several localities prominent before the public eye which Mr. Ball will visit, he intends to end up in the Bullfrog district, than which the shaft is far as necessary at the rate of 100 feet per month, and this feat, they claim, can easily be accomplished by a competent force and the excellent appliances now on hand for facilitating the work. The bottom of the shaft is now well down on the hard caping, which overlies the sulphide-ore beds, which when encountered, will, in the opinion of experienced miners, prove a revelation to all parties interested in Beaver Lake district copper properties.

PUSHING WORK VIGOROUSLY.

Until further notice the speedy gasoline touring car, Steptoe, will leave the Allen House, Wells, Nevada, Tuesdays and Fridays at 6 o'clock a. m., reaching Cherry Creek at 3 and Ely at 8 p. m. the same day. Fare: Wells to Cherry Creek, \$15; Wells to Ely, \$25. Wire or write for reservations to

President Parsons of Beaver County Mine Will Lose No Time.

J. K. Parsons, president of the Southern Copper company of Beaver county, has returned to town after an absence of several days in camp. He reports the shaft down 200 feet, and reached a formation which is most encouraging and unmistakably indicates the near approach of the ore vein, for which they are sinking. Capt. Ed. Wells, under whose personal direction the work is being conducted, has experienced considerable difficulty in getting competent miners to carry on the work, and as this company is determined to break up unnecessary delay in the opening up of the mine, President Parsons has this week sent several thoroughly competent miners and timbermen down from the city, to rich the work of development with all possible speed and energy. It is the purpose of the management to sink the shaft as far as necessary at the rate of 100 feet per month, and this feat, they claim, can easily be accomplished by a competent force and the excellent appliances now on hand for facilitating the work. The bottom of the shaft is now well down on the hard caping, which overlies the sulphide-ore beds, which when encountered, will, in the opinion of experienced miners, prove a revelation to all parties interested in Beaver Lake district copper properties.

YANKEE CON INSURANCE.

Adjusters Complete Work and Amount of Insurance Paid Over. It was learned Friday that the insurance adjusters had completed their work regarding the loss of the Yankee Consolidated company by fire, and that the amount of insurance on the property was paid in full. While the company will be compensated in no wise be fully compensated for, it is understood that the amount of insurance is a substantial

Princeton Hand-Made Suits

PRIVATE WIRE HOUSE OF JAS. A. POLLOCK & CO.

Bankers and Brokers. 6 W. SECOND SOUTH ST.

BONANZA MOUNTAIN COMPANY.

Organization Recently Perfected Has Some Very Fine Ore Showings. Local interests continue to receive the most encouraging reports from the Bonanza Mountain property of Bullfrog, an organization of claims on the famous Bonanza Mountain, first put into existence by William Griffiths of Salt Lake. It is reported that about 100,000 tons of six feet of gold ore that runs 158 to the ton, and as in all grades on the Bonanza mountain, this ledge shows marked improvement with depth.

There are few mountains in Nevada that contain more valuable mineral properties than Bonanza. Upon it are located the famous Denver, Elipse, Tramp, Gibraltar, and among others, the property above mentioned. The present management is working four shafts, the deepest being 200 feet. The results of development work are in exact keeping with the optimistic returns of the average Bullfrog company.

COLUMBUS CON. ORE.

Handsome Specimen From Third Level Received at Local Office. There arrived in the office of the Columbus Consolidated company Friday a handsome specimen of ore from the third level of the mine. The ore is extremely fine, and carries 17 per cent copper, 55 ounces of silver and \$160 in gold to the ton. While the developments on the third level are improving daily, the management is reticent about giving any details of the conditions now existing.

Mining Blanks.

Stock certificates, seals, reports, booklets, Prospector's Manual (Copp's), 50c. Tribune Job Printing Co.

Not if as Rich as Rockefeller.

If you had all the wealth of Rockefeller, the Standard Oil magnate, you could not buy a better medicine for bowel complaints than Chamberlain's Colic, Cholera and Diarrhoea Remedy. The most eminent physician can not prescribe a better preparation for colic and diarrhoea, both for children and adults. The uniform success of this remedy has shown it to be superior to all others. It never fails, and when reduced with water and sweetened is pleasant to take. Every family should be supplied with it. Sold by all leading druggists.

AUTO LINE TO ELY VIA Wells and Cherry Creek

Until further notice the speedy gasoline touring car, Steptoe, will leave the Allen House, Wells, Nevada, Tuesdays and Fridays at 6 o'clock a. m., reaching Cherry Creek at 3 and Ely at 8 p. m. the same day. Fare: Wells to Cherry Creek, \$15; Wells to Ely, \$25. Wire or write for reservations to
