NO MEN CLAIM HEIRESS AS WIFE

Sensational Turn to Disappearance of Miss Helena Maloney.

MUEL CLARKSON NOT ONLY MAN IN THE GAME

Robert Osborn, New York Broker, Says He Married the Girl Secretly.

NEW YORK, Oct. 11.—The mystery attending the disappearance more than a week ago of Helena Maloney, daughter of Martin Maloney, the Philadelphia millionaire, took a highly sensational turn today. At the time of Miss Maloney's disappearance Samuel Clarkson, a young Englishman who had paid marked attention, also dropped out of sight, and it was reported and generally believed that the couple had been married. Last night the news from Montreal that the young pair had been married by a Catholic priest in that city, and then fled to New York and sailed for New York, comes the publication here of a qualified statement from Arthur Robert Osborn, a young broker of this city, that Miss Maloney is his wife. According to Osborn's statement, he and Maloney were married December 1906, and the marriage never was annulled. Osborn declares that he is not in the office of Clarkson, and that he has never seen her since she left New York. He says that he has never seen her since she left New York, and that he has never seen her since she left New York.

CONSOLIDATION OF TWO BIG PLANTS

Idaho Industries Hereafter to Work Together; News of Interest.

Special to The Tribune.
REXBURG, Ida., Oct. 11.—An important meeting was held at Sugar City last night, at which steps were taken toward the consolidation of the Teton-Sugar City and the J. H. Brady electric light and power plants. Mayor Webster, Ross J. Comstock, Henry J. Flamm, Nathan Ricks and H. B. Rhule were present from Rexburg, Mark Austin, Fred Schwendman and Alfred Ricks represented Sugar City and James Siddaway and Jesse M. Baker were there from Teton City. It was agreed that the consolidation should take place, and a canvassing committee was appointed to secure stock for the purpose of buying out the interests of James H. Brady at Rexburg. The trouble has been that while the Teton-Sugar City has a most excellent and never failing water power, they have not the volume of business to utilize it, while, on the other hand, Rexburg has no water power, but has to use coal, and yet has the business to make it a paying investment with water power. The consolidation therefore will be a good thing all round. Mark Austin, general manager of the Sugar plants and Mayor Webster of Rexburg will be two of the main stockholders. Both are enthusiastic over the prospects. Another meeting is to be held this evening, at which the stock committee will report.

One of the most important moves in musical circles for a long time past is the consolidation of the Rexburg orchestra and the Engar concert orchestra, under the name of the Rexburg concert orchestra. Professor C. E. Engar of the Ricks academy will be conductor, and Edwin Dewsnup, the conductor and manager of the Rexburg orchestra, will be business manager. There will be fifteen leading musicians in the aggregation, as follows: Violins, Engar, Williams, Hopkins, Jacques, viola, Waldorf; cello, Durran; clarinets, Dewsnup, Brian, Ursenbach; cornets, Nelson, Larson; trombone, Stephens; drums, Brian; piano, Dewsnup, Miss Tillis Flamm.

The Sugar City factory closed down last night on account of a scarcity of men to operate the plant. There is a dearth of hands for every kind of work, and it is a serious problem as to what is going to be done. In the fields there is hay, grain and beets to be harvested. Some of the hay has been standing for weeks, waiting to be hauled. Should a severe storm come it is hard telling the extent of the loss which the farmers would suffer.

City Attorney James H. Wallis was called home from Salt Lake City rather suddenly Saturday last on account of the serious illness of his wife, who has been bedridden since that time. She shows some improvement at this writing. Attorney Wallis made the return trip via Market Lake, from which point he came by stage.

CRUSHED BY CARS; DIES IN HOSPITAL

Fred Treymayne, a Salt Lake Peddler, Sustains Fatal Injuries at Wood's Cross.

Fred Treymayne, a peddler of this city, was run over and fatally injured by a freight train of the Oregon Short Line railroad at Wood's Cross, shortly before 1 o'clock Friday morning. He was brought to this city and conveyed to the L. D. S. hospital, where he died at 6:30 a. m.

It is said that the unfortunate man was a passenger on train No. 3 coming to Salt Lake, which train received orders to take the siding at Wood's Cross to permit extra freight No. 652, northbound, to pass. It appears that the freight train was somewhat delayed in reaching the siding, and Treymayne stepped off the passenger train, and lying down on the ground, fell asleep. Although it is not definitely known, it is believed that in lying down Treymayne selected a spot immediately alongside the main track, and that while asleep he threw his right leg over the rail.

The freight train came along while Treymayne was still asleep and passed over his leg, horribly mangle it. As far as can be learned, the accident did not become known until the passenger train had departed, and the injured man was made easy in the caboose of the freight until 3 o'clock. Upon arriving on the scene, County Physician Calderwood had Treymayne brought to Salt Lake. He was removed to the hospital as quickly as possible, but he was very weak from the loss of blood and from shock, and succumbed to his injuries at the time given.

FORGER'S NERVE BREAKS WHEN SENT TO PRISON

COLUMBUS, Ohio, Oct. 11.—William B. Moore is now an inmate of the penitentiary. He left the jail, accompanied by his wife, today. Both broke down and cried bitterly, and it seemed that they would be unable to walk to the carriage awaiting them, but with a little assistance from the deputy sheriff each got into the carriage and were soon at their destination.

Moore was convicted of rendering false bills to the city for furnishing poles and collecting. He was jointly indicted with William Wilcox, who will be tried October 21. Moore was the agent of a Denver, Col., lumber and coal company. He was sentenced to ten years in prison.

VAUDEVILLE STUNTS FOR OCEAN LINERS

Trans-Atlantic Voyagers Will Be Entertained in Latest Style on Journey.

NEW YORK, Oct. 11.—When Charles Frohman announced recently his plan for presenting his American-English stars in their plays on the steamships of the Cunard line, he said he supposed the vaudeville managers would soon follow his lead. This they have done, almost sooner than was expected. Hardly had the first news of Mr. Frohman's plan appeared before vaudeville managers, headed by Perry G. Williams, began to arrange to give ocean travelers variety bills made up of the most expensive acts on both sides of the Atlantic. It was announced last night that within a few days contracts would be signed with the North German Lloyd line by which passengers on its steamships will be able to see a vaudeville performance at sea every night in the week, beginning early next spring.

PEACE CONFERENCE THROWING BOUQUETS

THE HAGUE, Oct. 11.—The following declaration, drafted by Count Tornielli (Italy), was adopted by the arbitration committee this evening, after a long debate, the United States, Japan, Haiti and Turkey abstaining from voting.

The conference unanimously favors: First—The principle of obligatory arbitration. Second—That certain differences, especially those regarding the interpretation and application of conventional clauses, are susceptible of being submitted to obligatory arbitration without restriction.

The conference unanimously proclaims that while a convention on the subject was not concluded, the differences of opinion had more of a judicial character, as all the states of the world, in working together for four months, not only learned to know each other better by getting closer together, but developed during this long collaboration high ideals from the common welfare.

Joseph H. Choate was much applauded during his speech explaining the abstention of the American delegation.

MR. BRYAN CRITICISES METROPOLITAN DAILIES

TELLS OF COPPER MINES OF PERU

Louis Seckels Returns From the Famous Cerro de Pasco.

OTHER SALT LAKERS IN POSITIONS THERE

Company, He Declares, Has Done More for Peru Than Anything Else.

Louis Seckels, Sr., for the past five years agent of the Cerro De Pasco Mining and Railway company at Lima, Peru, arrived at his home, 1076 First avenue, Tuesday evening. This is his first visit home in two and a half years.

He speaks with enthusiasm of the advantages found in Peru, especially in the copper mining industry. The Cerro De Pasco mine has the largest copper deposits known in South America, extending over a great expanse of country. The mines were originally worked some 300 years ago by the Spaniards for the silver ore found near the surface. The working of the Spaniards extended to between 250 and 400 feet in depth.

Several well-known Utah men are connected with the mines. R. H. Channing, Jr., formerly manager of some of the largest copper mines in Utah, is general manager of the Cerro De Pasco company, and among his assistants are F. W. MacLennan, superintendent of the mines, S. J. Gormley, formerly with the Bingham Copper company, superintendent of the smelter; H. S. Kerr, formerly superintendent of the Summit Valley railroad, is superintendent of the Cerro De Pasco railroads, and only a few months ago moved his family from the States to Peru.

"Our company is producing over 1000 tons of pig copper a month," said Mr. Seckels, "and we are increasing the capacity continually. This American company has done more for Peru than any other company in South America, on account of the vast expenditures it has made for labor and supplies."

"We employ the Indians as miners, and find that they learn very readily under kind treatment, both in the mines and smelter. They require lots of patience in the instruction of their duties, but are docile and easy to get along with."

"Their wage runs from 50 cents to \$1 a day. They require very little to get along with, living mainly on rice, spending their money for liquor whenever they can get it."

"In the early days of the Spaniards they were virtually made slaves and compelled to do the hardest kinds of work. In developing the mines the Indians would have to carry away the ore on their backs the same way Mexicans in many places of old Mexico do today. Our mine is provided with many of the modern improvements, and labor is economized as much as is possible."

CHINESE CONSUL FOR WEST WILL RESIGN

PORTLAND, Or., Oct. 11.—Moy Beck Hin, imperial Chinese consul for Oregon, Washington and Idaho, has announced that he will tender his resignation. Mr. Moy states that it is the custom when a change of ministers occurs in a country for Chinese consuls to tender their resignations. He stated that he could not say whether he would be reappointed or not.

Moy Beck Hin's tenure of office has extended over the past two years and has been fraught with difficulties. He has been himself and his followers and factions antagonistic to him. Efforts by Mr. Moy's opponents have been made to force his resignation and at one time matters became so threatening that in the Consul's opinion it was necessary to appeal to the police for protection.

Mr. Moy's resignation, in view of the efforts made to force his resignation, is regarded in a different light by those factions among the Chinese who oppose him, these openly declaring that he resigned to forestall his removal by Mr. Ting Fung Chang. Moy's enemies declare, is hostile toward Moy.

The Navy Department at Washington has been notified, and in the meantime Commander Briggs probably will be sent to an asylum.

NEW YORK WELCOMES QUEEN OF THE SEAS

NEW YORK, Oct. 11.—All New York welcomed the record-breaking Lusia, as she swung into her dock today bearing the title of Queen of the Seas, wrested from her German rivals. Three hundred and twenty-three firemen, under orders to work to their limit, fed the furnaces between 950 and 1000 tons of picked British navy Welsh coal each day, in order that this result might be obtained. On Tuesday night the officers gave each fireman a bottle of ale in appreciation of their efforts. The next day the Lusia broke all records by reeling off 617 knots, and made an hourly record of 24.76 knots.
