

Democratic party now in convention in Wallace, we beg to submit the following:

"1. In the interest of harmony, we propose that the following plank shall be in the State platform, viz.:

"That we demand the extermination of polygamy and unlawful cohabitation within the State of Idaho and the complete separation of state and church in political affairs. We pledge the people of Idaho that, in the event of Democratic success at the polls in November, we will make effective by legislative enactment the wise and patriotic declaration in our State Constitution, containing section 3, article 6.

"2. In regard to the seating of delegates in the Wallace convention, we propose that the delegates from Ada county be permanently seated on your side and that the delegates now on the temporary roll prepared by the state central committee be permanently seated on our side.

"3. In reference to the complexion of the state committee, we propose that the convention itself decide the number and the manner of choosing the said state committee.

Would Enforce Constitution.

"4. In reference to the conduct of the coming campaign, we propose that it should be made plain that the Democratic party propose to enforce the state constitution, but that during the campaign the committee will take no action to put into effect the provision of the constitution of the state.

"5. In regard to campaign speaking, we propose that the Democratic party should be at liberty to defend the state platform and to stand squarely thereon, but that said speaker shall be at liberty to discuss any questions contained in either the state or national platforms.

"6. In submitting the above proposals, we feel that we have gone to the greatest extent possible in recommending to our associates these conciliatory measures, in our great desire to harmonize all factions in the party and to present a united and unbroken front in the coming campaign, in the supreme effort to secure this state for William J. Bryan.

Mormons Present Case.

"This proposal was rejected, and the following proposal was offered:

"To Hon. Fred T. Dubois, Hon. C. H. Jackson, Hon. Henry Hettfeld, Hon. H. L. Day, and others:

"Gentlemen—Pursuant to our conversation of a few minutes since, we hereby make the following suggestions in order that we may bring about a satisfactory adjustment of the present situation:

"1. That the Democratic State platform contain a plank declaring for the enforcement of each and every provision of the constitution and declaring for the incorporation in the electors' oath of all the propositions of that instrument.

"2. That no campaign be conducted against the Mormon people by or under the direction, authorization or encouragement of the state central committee.

"3. That the regularly elected delegation from Ada county be seated in the convention; that the Dubois delegation from Blinnham county be seated, as well as the anti-Dubois delegations from Fremont, Oneida and Bear Lake counties.

"4. That the state central committee consist only of one member from each county and that the chairman of said committee be elected by a majority of its members, either from among their own number or otherwise.

Want Part of the Pie.

"5. That there be an equitable distribution of the offices that good, clean, influential men belonging to both factions be named on both the electoral and State tickets."

Both committees then called caucuses of their respective followers to submit what action should be taken.

It is known that many of the pro-Mormon followers were disposed to be fair and reasonable in effecting a compromise and but for the insistence of its few leaders it was possible at one time today to come to amicable agreement.

The Dubois followers are more than sincere in endeavoring to bring about a satisfactory adjustment and it is known that every effort will be made to effect this result before the convention meets tomorrow. At the anti-Mormon caucus A. L. Frehauser of Washington county is chairman and M. Reese Hattabaugh of Idaho county is secretary.

DR. PRICE'S WHEAT FLAKE FOOD

The most healthful and nourishing food. It is appetizing and easy of digestion.

AUTO PLUNGES OVER CLIFF AND TREE SAVES OCCUPANTS

NEW YORK, Aug. 4.—United States District Attorney Baker, of Washington, who successfully prosecuted the government land frauds in the northwest, and his bride of two months and several friends who were accompanying them on their honeymoon, had an almost miraculous escape from death today.

While the automobile in which they were traveling was running down a sharp hill on Walnut mountain, near Liberty, N. Y., the machine got out of control and plunged over a precipice nearly 300 feet in height. The machine, a big covered car, turned three complete somersaults in the air and lodged in the boughs of a tree, thirty feet from the brink of the precipice.

There it hung, top downward, with the frightened occupants held prisoners in the inclosed top of the machine. All were badly bruised and frightened, but none was seriously injured with the exception of the chauffeur. His skull was fractured, one of his ears was torn off and he sustained other injuries. He was taken to a hospital in Liberty for treatment.

Those in the car with Mr. Baker and his wife were Dr. G. E. Jelliffe, the alienist who testified in the Thaw trial, and M. Mangan, of Washington. As soon as they were rescued from their perilous position in the suspended automobile, the party came to New York and, after a rest at the Hotel Astor, started for their homes.

CHILD BORN WITHOUT BRAIN LIVES FOR NEARLY TWO DAYS

NEW YORK, Aug. 4.—As refutation of the axiom that no human being can live without a brain the physicians of Bellevue hospital are citing the case of Marie Giacomo, who died at the institution last night at the age of 48 hours. An autopsy revealed the fact that she had come into the world practically brainless.

The child when seven hours old was taken to the hospital by its father, Leonardo Giacomo. He said he had brought the child for treatment because there was something wrong with its head. When the child was unwrapped from voluminous clothes it was almost a startling sight. Its head was almost flat on top and its eyes stood out from their sockets. It was however, breathing normally and cried as an ordinary infant does. Unlike most infants less than a day old, it took nourishment greedily.

CHAIRMAN MACK FULL OF COURAGE AND VIM

BUFFALO, N. Y., Aug. 4.—Norman Mack, chairman of the Democratic national committee, who arrived here today, has in contemplation plans that he believes will result in one of the most active campaigns undertaken by the party in a presidential contest.

"The situation as I found it in the states, and, in fact in all the Eastern States, has been most gratifying, the responsiveness of the Democratic leaders in the East denotes a campaign that will be fought vigorously to a successful conclusion. Plans are in contemplation for a forceful campaign throughout the country, but of these I can say nothing at this time. All parts of the country is our battle ground, and not one section will be neglected."

Death of Andrew Heaton.

Andrew Lams Heaton, the infant son of Mr. and Mrs. A. L. Heaton, died Wednesday morning at the family residence.

ZEPPELIN AIRSHIP IS GREAT SUCCESS

Continued from Page One.

which cities ovations were given it, that the balloon appeared to slacken its speed.

When the citizens of Mayence could see it plainly approaching, the craft came to a stop above Mackenheim and slowly descended to the river. Everything seemed outwardly to work smoothly. There was no hurry on board the platforms, and the craft alighted in the center of the stream, with the bottoms of the fore and aft platforms resting on the water.

Besides effecting the needed repairs, Count Zeppelin took aboard a fresh supply of oil fuel. The party then ate supper, and afterward the fresh ascension started toward Mayence.

Many persons stayed up all night in order to obtain a glimpse of the ship as it passed.

The Rhine valley widens considerably, forming the lake of Zell. With this expanse in front of it the airship rose first, came down again to an altitude of about 1000 feet, and continued at that height until it again entered the Rhine valley, not far from the famous Castle of Hohenfels.

Sweeps Over Old Castle.

This stronghold, unconquered for a thousand years until the coming of Napoleon, today was a mute witness of the marvelous achievement of the Zeppelin of the air. Over the old feudal castle the airship swept silently and speedily, and its motor arrested their startled gazes to the intrepid sailors of the air above.

There was a faint wind from the north-west in the beginning, which was apparently quite powerless to influence either the speed of the airship or its course. This wind later changed to a steady breeze from the southeast, from which direction it was helpful to the navigators.

A sharp point of vantage was taken. The whole city turned out to give the airship welcome. The surrounding hills were covered with enthusiastic spectators. Hats, handkerchiefs and flags were waved in mad welcome and the old fortress at Schaffhausen sounded a greeting from its guns. This was the signal prearranged to announce to the citizens the advent of the airship.

The terraced streets afforded a fine view of the progress of the ship. The local band had been playing at high volume in the air as possible, on a rocky precipice, overlooking the railroad station, and it played as long as the airship or its slight. As the long car sped over the city to the drumming of its motors the people acclaimed it with a mighty shout.

"He is here," they cried.

Epoch in History.

They have witnessed an epoch-making flight and comment on the wonder of the performance is heard on all sides. The people congratulate each other, strangers speaking with strangers and all acclaim the airship as a new era in aviation.

The airship swung over the falls of the Rhine and from the abyss nature itself seemed to be amazed and awestruck. The roar of the mighty falls, the shouted words of the people and the rattling of the roofs and awnings of the houses were puny.

Members of tourists crowded the windows and the grounds of the Schweizerhof, the great hotel which flanks the falls of the Rhine, to witness the spectacular performance as seen from all sides. The people that witnessed it was remarkable. Some laughed wildly and encouraged the airship with cries of encouragement; others wept and still others gazed mute at the apparition in the air.

As the airship turned a bend in the river beyond Lauren, an old man, feeble, white haired and bent almost double, was crawling painfully to the top of a hill. He reached the crest all out of breath just as the airship disappeared.

"Ah, I have seen it," he exclaimed. He struggled to follow on in the direction the airship had disappeared. He was uncertain, he tottered and his teeth were streaming down his face.

The airship continued its imposing progress along the Rhine, shouts of welcome resounded from one shore to the other, from hill to valley, from village to town, and found an echo from all parts of the German empire.

SUCCESSFUL FLIGHT OF BALDWIN BALLOON

WASHINGTON, Aug. 4.—The new military dirigible balloon built by Captain Thomas S. Baldwin for the United States Army made a successful preliminary flight today with Captain Baldwin as pilot and Glen H. Curtiss handling the motor.

At 8:40 o'clock, after a final test of the motor, Captain Baldwin gave the order, "everybody get up; get up; get up; get up." The balloon, which was being inflated at moderate speed, the airship rose slowly to a height of fifty feet. Heading for Arlington county, the airship headed for Canada. The airship headed for Canada. The airship headed for Canada.

TEN THOUSAND KNIGHTS PARADE BOSTON STREETS

BOSTON, Aug. 4.—Ten thousand members of the uniform rank Knights of Pythias, resplendent in their uniforms and led by bands of brass instruments, this afternoon marched through the streets of Boston. As the line moved into the city, the parade was completely around so that it faced north, moving with the wind. Passing directly under the starting point, Captain Baldwin made another complete circuit; the ship was at a height of about 1000 feet. The landing was made within thirty feet of the starting point.

FLEET IS DRAWING NEARER TO AUCKLAND

SUVA, Fiji Islands, Aug. 4.—The United States Atlantic fleet at 8 o'clock this evening was in latitude 21.54 south, longitude 176.59 west, 1017 miles distant from Auckland.

The weather is cooler and the sea moderate. Albert Ehsel, a seaman of the battleship Wisconsin, has been missing from that vessel since July 31. He was last seen at 7 o'clock in the morning of that day.

CIRCUS DAY FREE OF CRIME AND ACCIDENTS

Though Tuesday was circus day, there were but few accidents and burglaries reported during the day or evening. Aside from running a few hobos out of town, the police experienced no particular trouble. The streets of the town were crowded and extra cars were used in effect all day, but despite this there was not a single accident reported to the hospitals or the police station up to 10 o'clock Tuesday evening.

SOLDIER REFUSED TO LET EMPEROR PASS

SWINEBURD, Aug. 4.—Emperor William's new style of wearing his moustache caused him to be refused admission to one of the coast forts here just before he departed on his trip to Sweden.

The Emperor, accompanied by several officers, the entire party being in civilian dress and wearing Panama hats, approached the entrance to the west battery, where the sentry prevented their further progress.

His Majesty, much amused, again vainly tried to pass by. He said to the sentry:

"You must let me enter, don't you know me? I am the Emperor."

The Emperor reported the occurrence to the officer of the guard at the fort, praising the soldier's sense of duty and recommending his promotion.

Today will be a big day at the Lager. It is "American" day, and the "boosters" will be present. A big ratification of the bond election will be an important feature. Don't be a knocker, but show your patriotism by being in attendance with your friends.

WILL FURNISH ORATORY ON BUSINESS PRINCIPLES

NEW YORK, Aug. 4.—General T. Coleman Dupont of Delaware was appointed today as director of the speakers' bureau of the Republican national committee. In announcing the selection of General Dupont, Frank H. Hitchcock, national chairman, said that he expected that the conduct of this bureau would be on strictly business lines. General Dupont will give his entire time to the work.

He is the Delaware member of the national committee and also a member of the executive committee.

The Delaware member of the national committee and also a member of the executive committee.

MANY WANT TO ADOPT THE M'FARLAND BABY

The two-month-old baby, which was recently taken away from W. H. McFarland and was in the juvenile court and placed temporarily in the State street orphanage, has been so well advertised that a number of applications have been made to the court for its custody. The most promising has come from a prominent lady in Idaho and it is probable that the baby will soon remove to the Gem State.

The Wasteful Telephone.

Those who think that invention is approaching its limits would do well to consider the fact stated by Monsieur Abraham, an authority on this subject, that the best telephone does not transmit to the ear more than one-thousandth of the energy it receives from the line. Although there may be cases in which one could wish that the telephone would transmit less rather than more, yet, seriously, it is a challenge to inventors, as well as an indictment of human inefficiency, when an instrument of such universal utility is allowed to remain so prodigal.

Talks on Investment.

No. 2.

PLANS AND SUGGESTIONS FOR THE NEW SCHOOL BUILDING

Total enrollment, 14,555—8271 boys and 8284 girls; elementary schools, 15,927; high school, 1225; average number of pupils attending school, 12,876; number of pupils belonging, 12,857; number of teachers, 446, of which 365 are grade teachers; cases of truancy, 478; cases of corporal punishment, 62; suspensions, 51.

The above statistics are taken from the annual report of D. H. Christensen, superintendent of schools for Salt Lake City, which was submitted to the Board of Education Tuesday evening.

A striking feature of the superintendent's report is with regard to the size, shape and location of the new buildings to be constructed by the board out of the \$250,000 of bonds which were recently sold. The interests of the child, Mr. Christensen says, is the paramount issue and should always be kept in mind.

Superintendent Christensen then goes on to say that the present buildings have too little ground about them for the children, as he believes that is one of the most important factors in the development of a healthy child. In this connection, Mr. Christensen's opinion that ample grounds should be secured and that the buildings, being located in the center of the grounds, should be placed in order to leave as much ground as possible unobstructed.

Superintendent Christensen is of the opinion that the buildings now constructed that all the rooms get their pro rata of sunlight during the day. In order to accomplish this, he suggests the buildings should be narrow, the lesser dimensions to the north and south, each end having two rooms and these on the corners. Accompanying the report are from all the principals of the schools which numerous suggestions in which, it is believed, will enhance the interests of the pupils.

PRISONER MADE HEROIC YET FUTILE ATTEMPT TO ESCAPE

SAN QUENTIN PRISON, Cal., Aug. 4.—Lying under one of the outer prison buildings for four days, from where he heard the bell sound the general alarm of his escape when he was missing at roll call last Thursday, and sent seventy-five guards scouring the hills and wooded valleys of Marin county, Charles Ross, a Russian exile, serving seven years for burglary, was recaptured today as he crawled out and was endeavoring to escape.

Ross, who is a Russian Finn and escaped from the Saghallen penal settlement where he had been sent by the Russian government, was a trusty in the prison and as such was permitted to go outside the main prison walls. This gave him opportunity to dig a coffin-like hole under an old shed, which he lined with boards and stored with food and blankets. At a favorable opportunity he got prison stripes and "donned" some clothes which he obtained in this manner and crawled into his remaining there quietly while the men hunt was in progress in the area around the penitentiary. His water running low and believing the hunt had subsided, as he heard of guards returning he ventured about dawn, but was seen and captured by a guard with a Winchester. Ross was immediately returned to the prison walls.

Driver Fined for Cruelty.

W. J. Blake, driver of a prison wagon, was fined \$15 for cruelty to his horse. Blake was fined \$15 for cruelty to his horse. Blake was fined \$15 for cruelty to his horse.

RISING BREAST

And many other painful distressing ailments which most mothers can be avoided by using Mother's Friend. The only is a God-send to anxious mothers, carrying through the critical ordeal with safety. No woman's Mother's Friend need fear the suffering incident to birth; the ordeal of its dread and insures safety to life of mother and leaving her in a condition more favorable to speedy recovery. The child is also healthy, strong and good natured.

A Cooling Drink

One of the most delicious, wholesome, and of late years, highly popular summer beverages is

ICED POSTUM

Boil according to directions on the package. Cool it with cracked ice, add sugar, cream, a "suspicion" of lemon and a "whisper" of nutmeg, perhaps—or simply sugar and lemon juice if you prefer it clear. There's

No Prohibition

movement against Postum in any State because it is made from clean, hard wheat skillfully roasted, contains no coffee, alcohol or other injurious substance. It is

Good for all Classes—Old and Young

When boiled properly, all the nutritious elements in the wheat are brought out, including the phosphate of potash, grown in the grain for rebuilding brain and nerve cells.

"There's a Reason" for POSTUM
