External Remedy For Eczema

Why Salves Fail While a Simple Liquid Has Accomplished Thousands of Cures. It is now thoroughly established among the best medical authorities that eczema is purely a skin disease, due to a germ and curable only through the skin. It is not a blood disease at all; in fact, thousands of people suffer with skin disease and are perfectly healthy otherwise, and therefore prove they have no diseased blood. Smeary salves cannot reach the germs because they do not penetrate the skin. The only way to reach the germs is by means of a penetrating liquid. Such a liquid can be obtained by simply mixing ordinary oil of wintergreen with thymol, glycerine and other healing agents. This compound, known as D. D. D. Prescription, stops the itch instantly, and the cure all appear to be permanent. In fact, it took thousands of cures, case after case, before the best scientific authorities were convinced of the absolute merit of this remedy. The effect of D. D. D. Prescription in numbing the itching eczema germs within one minute after the first application. We especially recommend D. D. D. Soap in connection with this treatment.
