

CHILDREN GIVE GOOD CONCERT

Render Splendid Programme at Salt Lake Theater for Benefit of St. Ann's Orphanage.

THOSE OF TENDER YEARS RECEIVE MUCH APPLAUSE

Older Artists Contribute Their Share Toward Making Success of Great Event.

It was the "little ones" who held the boards and charmed the great audience at the Salt Lake theater last night, the occasion being the annual concert for the Kearns-St. Ann's orphanage.

And while there was represented some of the mature and semi-professional artists of the city, who graciously contributed a portion of their valuable time for the enhancement of the splendid programme, the fact remains that it was still the "little ones" who received the lion's share of the almost continuous applause.

To the credit of the "kiddies" and their instructor, Miss Nora Gleason, under whose direction and to whose zeal, energy and talent the success of the programme is largely due, it is said, first of all, there was lacking any attempt to follow professional theatrical lines in the selection of the numbers undertaken, everything on the programme being reasonably within the scope of those assigned the various sections.

Harmonious and Varied.

Speaking generally before any attempt to particularize is made, it is to be noted that the ensemble of the programme demonstrated an appreciation and comprehension of the time and the place, as well as the sympathetic understanding existing between director and the children.

Stage settings, costumes and lighting effects were artistic and in keeping with the occasion, and the program, from the opening chorus, the "Dear Little Shamrock" down through the long programme, with its beautiful finale, the great audience that filled the theater to overflowing sat pleased and appreciative.

There were tots, not 6 years of age, who held that audience with a self-possession, a command of all their faculties and a forgetfulness of distracting surroundings that might well have deserved credit had they been drilled for years as professionals.

Following the opening chorus Mary Carney, Evelyn and Emily Kimberly, three babies from St. Ann's, sang several selections with pleasing effect, and Miss Loretta Bohler, accompanied by the full chorus and three violins, Misses Romania Hyde, Emma Cullen and Frances Hahn, sang "Vale of Dreams" in splendid style.

Many Youngsters Appear.

Then followed a number of charming selections by the smaller children, each of which elicited much and merited applause. These included "Jumping Jack Dance" by Violet Lewis, "I'm a Yankee," by the girls from St. Ann's and a song by Margaret Connors and Marian Galiani.

"Molly Dear," full of true sentiment and genuine Irish melody, was beautifully given by the St. Cecilia chorus, while "Larie" made a hit with her rendition of "The Dublin Rag." "Once I Was a Baby," by the "Little Ones," was applauded to the echo. Here it might be well to say that one of the conspicuous figures on the stage was the smallest, that of little Bessie Adams, aged 18 months, daughter of Mr. and Mrs. Percival Simons. Far from exhibiting signs of stage fright, she at times gave evidence of desiring to have her stay before the footlights prolonged.

The boys from St. Ann's gave with their boyish enthusiasm and abandon "Yankee Doodle" and "The Star Spangled Banner" in appropriate costumes, sang "Daisies" with dramatic effect. Little Irene Goody elicited much applause by her excellent rendition of "It."

Dramatic Readings Feature.

A feature of the programme that added to its excellence was the dramatic reading of Miss Pluma Purcell. She gave two selections, one exceedingly droll, the other a sort of reach, the deaver feelings, and in both displayed rare skill, self-possession and comprehensive grasp of her subject.

Dolly Christensen's fairy dance was pleasing and Thelma Cronin manifested great talent in her rendition of "Spash." The boys' brother George McGurkin and the singing of Irish melodies by the quartette, composed of Mrs. Corinne E. Hamner, the Misses Mae O'Neil, Alice Farrell and Hazel Redman, from the cathedral choir, were warmly applauded.

Garden of Dreams.

One of the most appreciated numbers of the delightful evening was the singing of "Garden of Dreams" by Matilda James, the singer manifesting both talent and good training. Marguerite Locke's "Stop" was well received. When the curtain fell on the splendid finale, the "Star Spangled Banner," by eleven girls, all garbed in pure white and the national colors, with the full chorus swelling the volume of harmony for the close, the entire audience felt that the evening had been one of enjoyment and the concert a pronounced success.

In her successful direction of the concert, Miss Gleason, who has labored untiringly for weeks to this end, was assisted by the Misses Faith Rodman, Emma Blinn, Kathleen Graves, Rose Duffy and Katherine Slade.

Walters Entertain.

Members of the Salt Lake Walters' association entertained at their clubroom at 24 West Third South street Friday evening. The affair was in the form of a smoker and there were probably 300 guests. Two musical exhibitions were put on for the amusement of the crowd, following which a luncheon was served. The officers of the association are: P. S. Peterson, president; J. P. Collins, vice president; F. E. Turner, treasurer; and H. M. Anderson, secretary. Among the directors are the following: Paul Cavoyette, George Twigg, Tex Walker, Earl Bachman, Richard Morrison and William Morris.

SALT LAKE STREETS CAR WOLFOU

Conductor and Motorist of Jordan Bridge Street Car Identify Prisoner.

J. L. Hammond has been identified as the man who held up the Jordan Bridge street car Tuesday night. Conductor P. B. Johns and Motorist Charles Rapier are sure that he is the right man, each picking him out from among a half dozen other prisoners.

Hammond was arrested on suspicion Thursday afternoon, by Patrolman Joe News. His clothes, even to the handkerchief which he wore over his face, are the same that the holdup wore, according to the men who were held up.

After he had been identified, a complaint was sworn out charging him with the robbery. He will be arraigned before Police Judge J. M. Bowman this morning.

Two other suspicious-looking characters who have associated with Hammond a great deal were also arrested Thursday night. These are H. A. Backett, an ex-convict, the police say, who has a home on Cannon street, and George Fitzgibbon, West 22nd street, who was arrested by Sergeant Pierce and Patrolman News and Eckardt. It was thought that these men might be connected with the burglary committed here lately, and one case has already been laid at the door of Fitzgibbon. This is the theft of a roll of linoleum from a store.

The theft of this linoleum was reported to the police at the time that it occurred, and the goods were located yesterday. The person who reported the loss was not the owner, however, and the police are at a loss as to what to do with the recovered property. The owner may have it by coming to police headquarters and identifying it.

INVENT MAGNESIA BULLET TO CAPTURE WILD HORSES

T. A. Flood and J. F. O'Byrne, Salt Lake, Devise Plan to Render Animals Temporarily Helpless.

Dr. T. A. Flood and J. F. O'Byrne, both of the city, have devised a plan and unique plan which they expect to prove successful for the capture alive of the best of the wild horses now roaming the mountains of Nevada. They will shoot the horses with a special bullet of their invention, this missile being tipped with a magnesia compound, a gelatine capsule filled with a narcotic drug of quick action.

Their claim is that the magnesia soon renders the horse's tissues, causing no permanent injury unless a vital organ should be penetrated, while the narcotic will afford opportunity for rendering the wounded animal temporarily helpless and thus permit of its easy capture.

Among these wild horses, which are so shy and cunning that it is almost impossible to take them alive under former methods, the new method is expected to be successful. The inventor says that several thousand dollars apiece. Should the scheme of the inventors prove successful, it would afford opportunity for introducing new blood into western domesticated stock.

POLICE TAKE ALLEGED "PEEPING TOM" TO JAIL

Herman Haeborg, 24 years old and married, was arrested last night in the city jail, the charge being left open.

A call came to police headquarters from West First North street, about 1 o'clock stating that a man was looking in the house through the windows. Detectives Ripley and Cleveland responded to the call and found the man peeping just as the occupant of the house fired two shots from a shotgun to frighten the intruder.

Haeborg, in attempting to flee, ran right into the detectives. He was brought to the police station, where he said he had peeped in the window of a neighbor and a Mrs. Stevens. The detectives took him back to the scene of the disturbance and there he admitted that he had peeped in the window of the neighbor and then had taken home the neighbor woman from whose place he was released.

The detectives found that no Mrs. Stevens lived at the place indicated and that his attorney, who had no interest in the case, had not seen her husband for about two hours.

BRINGS OPTIMISTIC NOTE FROM MAMMOTH

One of the most optimistic men in Utah respecting the state's prosperity is Dr. P. Harvey of Mammoth, who has just returned to his home in the town of the Moxom. The doctor's optimism is not based so much upon what is going on in the state, but upon what he sees in the future. He is employed by a number of the prominent mining companies of the district.

"The consequence is that business in all lines is prospering. This will have the effect in great measure, of stimulating interest in agriculture in the state, and, in my judgment, the splendid opportunity that the state will soon be taken advantage of."

Y. W. C. A. TO ESTABLISH SUMMER CAMP FOR GIRLS

The quarterly meeting of the board of directors of the Y. W. C. A. was held yesterday morning at the boarding house on West Temple street, and Miss Pearl McGurkin, secretary, as hostess.

The twelve members of the board were present and in addition to the regular routine business of the board, a number of suggestions for new lines of work were discussed and it was decided to send at least two representatives to the coming biennial of the national association to be held in Indianapolis April 19 to 24.

BY ANSWER HIS NAME PUBLIC

Original Destroyed by Students, but Presidency Keeps Copy and Prints It.

ORGAN OF CHURCH STILL HIDES PUPILS' SIDE

Brimhall Wants All Insurgent Professors and Students to Quit School.

"The presidency of Brigham Young university, through the medium of the afternoon church newspaper of Salt Lake, yesterday made public the side of the controversy with the professors and students. Although the church newspaper had refused to publish the protest of the students and had misrepresented the facts concerning this protest, it freely printed the presidency's answer to the students in its issue of yesterday."

Brigham Young university, through the medium of the afternoon church newspaper of Salt Lake, yesterday made public the side of the controversy with the professors and students. Although the church newspaper had refused to publish the protest of the students and had misrepresented the facts concerning this protest, it freely printed the presidency's answer to the students in its issue of yesterday."

"To the President and Members of the College Club, Brigham Young University: The communication presented by your committee has received the careful consideration of the president."

The attitude expressed in the document is in keeping with the general expression of the college students in their petitions for some time past, except in one particular; viz., an apprehension that in the event of a change in the curriculum there would be a corresponding change in the college curriculum. The college will not only hold its ground, but will continue to grow and all of the courses of instruction.

"We hope that you, with us, will refer perfectly to the same God who inspired President Young to found this school, and who has guided its destiny, and moved the college to the site of this school, what it is, will continue from his divine point of view to inspire the president, who has committed to the present; that the board of trustees, sustained and supported as they are as general consent of the faculty and students, will make the school an institution that shall meet the hourly needs of the greatest possible number of students."

Some of the school will be fashioned under the light and warmth of the sun. The school will depend upon the will of the Lord as accepted and supported by the faith and works of the officers and members of the church.

"Mid Words for Protestors. The school has grown by trusting in the Lord, and there need be no apprehension of the future progress of the university with the sources of our support."

"We have not the slightest concern for you and admire your candor and desire to have your interest in the school, but we cannot share your apprehensions. Yours truly, J. L. BRIMHALL, PRESIDENT."

"The students continue highly indignant because their views have been excluded from both the morning and afternoon organs. The students are of the opinion that the action of the school makes no chemical changes in the solids found in crude oil, and no matter how long it is buried in the earth, it will show the same general properties as before."

"Some of the land are awaiting developments. Neither member of the firm of Little & Little, holding the patent on the oil, is in the city, but the plans are relative to the find."

MUST FOLLO WORDERS OF CONSULTING ENGINEER

Campbell Company Uses Steel Pillars in Infirmary that Are Inadequate, Say Commissioners.

After going over the matter with Carl Scott, the engineer appointed to inspect the steel work on the new county infirmary, the board of health and the commissioners Friday decided to notify the Campbell Building company, which has the contract for the erection of the infirmary, that the steel work is inadequate.

It has been found that some of the steel pillars are inadequate, and the weight of the roof will cause the steel beams are not up to the requirements of the specifications. The steel work is being done by the Campbell Building company, and what is known as the Kahn system is being used.

REDUCES JUDGMENT \$340 FOR GAMBLING LOSSES

Mrs. Maude Boroughs is given judgment against Frank Peterson and Charles Creighton in the sum of \$340 by an opinion handed down by the supreme court Friday.

The judgment for \$500 was given Mrs. Boroughs in the second district court by Weber county for losses said to have been sustained by her on a betting table. The court found that she had lost \$340 of her money over the gaming table.

Prof. John C. Swenson of the department of political economy in the R. Y. university, in speaking of the university difficulties to a Tribune representative today, said: "The Tribune has treated the question of the controversy in the university more fairly than has any other paper in the state."

Harry Elmore, a messenger boy charged with selling cocaine, was denied freedom on a writ of habeas corpus. In Judge T. B. Lewis's division of the Third district court Friday the writ was issued on the showing that the city ordinance relative to the sale of narcotics was unconstitutional as a statute.

John Carmoy, who says he is a miner, was arrested by Motorcycle Patrolman Grundvig at 5 o'clock last evening as he was in the act of stealing six pairs of trousers from the West mail order house. The trousers were valued at \$12. Carmoy was charged with petty larceny and the trousers brought to police headquarters as evidence.

PROSPECTORS VISIT SCENE; STAKE OUT MORE CLAIMS

Theorists Say That Seismic Disturbance May Be Responsible for Flow.

Salt Lake is recently discovered oil field still is in mystery as to the source. The flow of oil on the strip of land near Eleventh North and Sixth West streets continues and intense interest is being taken. Scores of persons went to the scene Friday and more claims were staked out.

"Persons skeptical at the idea of oil being discovered within the city limits, by a visit to the field, Friday, instantly had this idea dispelled, because before them was plenty of oil of a good quality bubbling from the ground in innumerable places. Theories are being advanced to account for the oil, and some of these all seem to fall in the face of the quantity. It is contended that the oil could not be a seepage quantity from any leaking pipe lines, the bursting of tanks or the like to eject as much months or years afterward as is being seen at the present time."

"The attitude expressed in the document is in keeping with the general expression of the college students in their petitions for some time past, except in one particular; viz., an apprehension that in the event of a change in the curriculum there would be a corresponding change in the college curriculum. The college will not only hold its ground, but will continue to grow and all of the courses of instruction."
