

### STORM MINE MORE GROUND

#### Over Missoula Copper Price Said to Be \$300,000.

The Tribune, Missoula, Wash., March 8.—The great mining deal in recent years from the standpoint of the involved and the influence the will have on the situation in the district of the Coeur d'Alene was closed in Spokane this morning by Charles E. Mallette, mining secretary of the Spokane company, who negotiated the deal for the controlling interest in the Copper company by the Mining company at a price more than \$300,000. This is the one and three-fourths of the efforts of Mr. Mallette of Missoula stockholders, more than 600,000 shares, and transferred the Snowdrift company for a price of approximately 50 cents. The securities are to be held by the Union Trust company necessary details of the sale arranged, and in the interim blocks of Missoula Copper be secured, according to those in the conference.

#### ants in Deal.

storm company was represented by Leo Perber and general manager M. E. Chaney of Missoula. The Montana members of W. R. Mullan, Wallace H. J. R. Bean, H. J. McLeod, mining, Larry Dooling and G. M. Mullan, heavy holders, represented themselves. Mr. Mallette represented the stockholders.

only assures thorough development of the mine, but it means that the life of the mine has been prolonged. "With this under development, besides still other possibilities, the Snowdrift will become the largest producer in the Coeur d'Alene district."

#### Molybdenite.

first time in the history of the Boundary and probably Columbia, a carload of molybdenite is being shipped out from the carload is from the group at Sheep Creek, near the ore is said to run high grade, which is used largely in steel. Roy and Bennett of the property.

able activity is reported in Chevelah, Wash., camp, north of the Chevelah Development. In a depth of sixty feet, the Chevelah Development is in ore the full size, showing with depth. The ore working one shift until level is reached. The Molybdenite is being put to work on the big shaft by put-rod camp for the men. Shoenberger, who are sinking a new shaft at the Antimony Lead, on a heavy quartz at thirty-five feet iron and silver and show of copper.

#### King Blocks Out Ore.

Over forty feet was crossed, the Chevelah Development. The lead carrying the high grades to improve as they Security Copper continues the lead, the change coming in the ore as depth is obtained.

Montana company has two on the tunnel of the property. Burke, Idaho. The tunnel at about 800 feet, and depth foot for foot, making the 800 feet. The outcrop on the side is good and the company of the well-defined ore is found. At a recent meeting of directors held in Idaho, it was decided to continue indefinitely, as the reports were promising. An assessment on the stock. The officers of the company are R. B. Hoffman, Harry Harris, treasurer, secretary, the president, and the directorate Miller, J. H. Paw and Peter

#### HELP MINES BOTH DIRECTIONS

auto truck service from the surrounding country. The company will help the Silver Lake to the north, as well as Springs, Perber, Gold Hill and which will without doubt be maintained. The result of it is now being put into condition of the new service.

### DEEP CREEK LOOKS FOR GOOD SEASON

A well known mining man who returned recently from the Fish Springs section of western Utah speaks very favorably of the conditions he found there. The Utah mine, the "big little mine" of the state, is shipping ore regularly. The values are running practically the same as those which have made the Utah mine famous.

J. Colthart is taking out high-grade ore on his group of claims to the south of the Utah and should be on the market soon with a carload that will net a good round sum.

The Miner's Dream claim, adjoining the Utah on the east, is being worked under bond and lease by the Silver Chief company. Some good work has been done on this ground now and results are looked for at any time. On account of its favorable location and the fact that the geological conditions are the same as exist in the Utah ground, the outcome of the Miner's Dream will be awaited with interest.

In the neighborhood of Clifton and Gold Hill in the Deep Creek country considerable activity is expected the coming season. The Western Pacific Copper company's strike near Willow Springs has attracted new attention to that section. From reliable sources it is learned that W. Carson has discovered some high-grade gold ore in his claims in Dry Canyon. It is declared he has also proven a large ledge of low-grade copper ore.

It is believed that with the auto truck service into Gold Hill in operation considerable ore will be shipped from that section during the coming spring and summer. The Young-Little, Watson & Chandler, Gardner & Rodebusch and Carman & Gerster ground in and near Clifton, the Erickson-Anderson ground near Overland canyon; the Morduff-Hicks at Dutch mountain and the Hudson, Woodman and Simons property near Gold Hill should be among the shippers when the better transportation facilities now assured them materialize.

Attention is also being called to the Ferber district, where the Reed & Haight properties have developed good bodies of ore running from 12 to 15 per cent copper. With the lower haul to the railroad now promised much of this ore can be shipped to advantage.

All indications are that for these more or less isolated sections of western Utah the year 1914 will be a successful one.

### FLORENCE GOLDFIELD NOT TO BE LEASED

The annual meeting of the Florence Goldfield Mining company, which was begun yesterday at its office in this camp, adjourned sine die this morning, says the Goldfield Tribune. Because of the lack of a quorum, no business was transacted. Under the constitution and by-laws of the company, the present officials will serve until their successors are elected, which will probably not occur until the next annual meeting a year hence.

President A. D. Parker, who arrived in Goldfield Sunday from Denver, yesterday made a thorough inspection of the workings of the mine in company with J. K. Turner, a resident director, and Superintendent E. Clapp. Commenting upon his observations, Mr. Parker said:

There has been brought to my attention since my arrival in Goldfield a rumor to the effect that our company contemplated the leasing of the mine. I wish to say that no lease of the ground has been granted under any circumstances. I am very much pleased with conditions prevailing in the mine; they look well. We have ore in sight in five places and the latest find of high-grade ore looks encouraging. I am confident we will be satisfied with the results that have been accomplished under the management of Superintendent Clapp, who has opened the property up in good shape.

### DOING FAST WORK IN SNAKE CREEK TUNNEL

In spite of the heaviest flow of water yet encountered, the big Snake Creek tunnel, which is being driven to an advance of 275 feet in the month of February. When the heaviest flow was struck it entered the tunnel from the top, bottom and sides under pressure at the rate of 6500 gallons a minute. The flow has now settled down to an apparently normal flow, about 5000 gallons a minute, coming mostly from the bottom of the tunnel at various points.

The face of the tunnel is now in comparatively dry ground, which is firm and requires no timbering. The tunnel is now being made with two shifts. The tunnel is now to 7000 feet from the portal, which is on the Provo river side. Its total length when completed will be 14,500 feet.

### HEAVY TOLL EXACTED BY MINING PROGRESS

The fact that the community pays for the failures of any enterprise is shown by the remark so often made that it costs more to mine gold than the gold is worth, and that the losses of the ventures are not paid for by the profits of the successful. Says Metallurgical and Chemical Engineering: "We believe that this is not strictly true, but that there is an element of truth in it, and that it is widely true that the high profits derived from successful attempts to gain mineral wealth include insurance against failure. Mining engineers who lay the proper stress on the correct estimate of mining costs that mining stocks should return from 10 to 20 per cent on the market value to allow for the exhaustion of mineral and to recompense the investor for previous losses. This is only right."

It is plain that the same conditions hold in the case of a reduction works

that treat a crude mineral and produces a commodity useful to the community. After countless failures a successful new process brings it about that the old plants must be "scrapped." So it is that the constant flux of mining there is always progress, and that the new processes, when "practicalized," thereby render the old plants obsolete and make mines of deposits whose ores were commercially unavailable. This, of course, has the effect of annihilating or at least depreciating the value of existing plants.

### MERGER MINES DEAL WILL GO THROUGH

The details of the negotiations between the Jumbo Extension Mining company and the Goldfield Merger company, which resulted in the acquisition by the former of the Velvet claim will be definitely arranged and ready for submission to the stockholders of the respective corporations within the next week or ten days, according to C. O. Whittemore, Los Angeles, president of the Merger company, says the Goldfield Tribune.

Mr. Whittemore arrived in Goldfield Sunday for the purpose of discussing with his local associates and Vice President Charles S. Sprague of the Jumbo Extension company the pending negotiations. Conferences were held all day Monday and at their conclusion Mr. Whittemore, who departed for Los Angeles last night, stated that as more time would be required to go fully into certain of the details of the deal, a further meeting of Mr. Sprague and himself would be held within the next week or ten days, upon his return to Goldfield. Mr. Whittemore declined to divulge the details of the present negotiations, but declared with emphasis that the stockholders of the Goldfield Merger Mines company may rest assured that the deal, if consummated, of which there is every probability, will redound to their benefit.

Referring to the operations of the Merger company and its plans for the future, President Whittemore said: "Notwithstanding the delays that have arisen, due primarily to water and resultant additional costs, conditions at the Merger are without a single discouraging element; therefore, there should exist no anxiety on the part of the stockholders as to the future of the property."

### News of the Insurance World

#### Education on Insurance Questions.

In his recent Chicago address on "Insurance Education" Commissioner C. J. Firestone of the Illinois state department of insurance, in his opinion, the matter of educating the public had been approached "from the wrong angle." So far as the state, there had been no attempt to popularize the subject. It had been treated from the actuarial and technical side and he believed the exclusion of the layman from the subject from the popular side. For example, he said:

There is the justification for insurance; its essentially cooperative character; the fundamental fact that practically all insurance is in the last analysis mutual in character. There is also the fact that instead of the exclusion of the layman from the subject, the policyholders are indeed the company and the company means the policyholders. Then, the fundamental principle that to make rates, policyholders make losses, and therefore they are the only ones who can reduce rates. To suppress the fact that the burden of the company through excessive expenses, undue taxation, etc., are really burdens added to the insuring public, that there is no such thing as essentially as profit in the insurance business, as the word is generally understood, but that it is merely a system of collection and distribution, under proper safeguards of organization and legislation; that the interests of the insured are the interests of the policyholder, the interests of the insured are the interests of the policyholder, the interests of the insured are the interests of the policyholder.

#### Widow Gets Full Amount.

The United States supreme court last week rendered an opinion upholding the decision of a federal district court in Oklahoma, which judgment awarded to the full amount of the judgment obtained under the federal employers' liability act on the death of the father to the widow of Howard E. Taylor, who was accidentally killed by a train on the Santa Fe railroad, secured a judgment of \$2500, which was paid in full.

#### Unusual Suit for Damages.

An unusual suit for damages has been filed in the district court at Waco, Texas, against the Amicable Life insurance company by Dr. C. B. Foscoe, who seeks to recover \$50,000 damages for alleged injury through the action of the company in discharging his medical director. The physician bases his suit upon alleged injury to his health and loss of business, while Dr. Foscoe was an accomplished physician, he was not capable as a medical director and that the company had suffered loss through the acceptance of medically undesirable risks.

#### Two Remarkable Pictures.

In a large new circular prepared by one of the Connecticut accident and liability companies, bodies with educational automobile policies, two remarkable photographs are used showing destruction of property by tornado and flood. The company's policies cover loss of property by lightning, explosion, cyclone, tornado, water damage, collapse of buildings and transportation perils, theft, collision, personal injury and property damage.

#### Insurance Notes.

The next regular meeting of the Utah Association of Life Underwriters will be held at noon Saturday, March 21, preceded by the regular luncheon.

Four hundred and fifty-six million dollars represents the amount of policies and premium notes outstanding to policyholders in all the legal reserve companies of the United States at the close of 1911. The Bremen-Hamburg life company of Germany has been granted a license

### TROLLEY BANISHED FROM BUNKER HILL

#### "Safety First" Policy Eliminates Underground Electric Wires.

Special to The Tribune. SPOKANE, March 8.—In the underground mine of the Bunker Hill and Sullivan mine, the largest lead-silver mine in the world, located at Kellogg, Idaho, eighty miles east of Spokane, all trolley wires are being taken out to eliminate danger to workmen. The company, in common with other mining companies of the Coeur d'Alene, is making a big feature of the "safety first" policy. Electric storage locomotives are being installed to haul the ore in this underground city, except in the Kellogg tunnel. Three locomotives, weighing eight tons each, already are in operation. Since the big mine instituted this policy the accident list has been materially reduced, according to General Manager Stanley Easton. The miners will be careful to be careful as they enter the mine on each shaft, and a large electric sign near the end of the Kellogg tunnel announces "Safety First."

Walter St. Germain and D. C. Nicholas are beginning work on their lease of the No. 4 tunnel at the Yankee Boy property on Big creek, near Warden, Idaho. They have completed the tunnel to the vein and expect to be able to begin shipments in a few days. The ore will be carefully hand sorted, thus bringing it up to an exceptionally high grade. The lessees will have about 300 feet of stoping ground in the lease, assaying \$25 per ton has been taken from this tunnel in the past. Two shifts will be used by the lessees in prosecuting the work.

#### Ore Hauling Stopped.

Ore hauling has stopped temporarily at the Sharp mine in Toole county, the wagon roads being in such condition that it is impossible to handle any kind of a load between the mine and the railroad. A small force will be kept at work on the mine and the regular shipments will be resumed as soon as the wagon roads improve.—Eureka Reporter.

### Certain-teed Roofing

is guaranteed for fifteen years—it will last longer. When you buy roofing—whether shingles or rolls—for any building of any type—remember this: Any test for toughness, pliability, tensile strength—is a false test. Roofs do not wear out—they dry out. We use no coal tar in this roofing—because coal tar is of gaseous origin and naturally returns to gas, thus drying out too quickly. Our properly blended asphalt is the result of a quarter century's experience and tests. They are not of gaseous origin and dry out very slowly.

The three biggest roofing mills in the world back up our guarantee of Certain-teed Roofing. That's all the advance knowledge you need when you buy roofing—see the Certain-teed label on the roll or crate. Certain-teed Roofing is sold by dealers everywhere, at a reasonable price. Ask your dealer.

### General Roofing Manufacturing Co.

World's largest manufacturers of roofing and building papers. E. St. Louis, Ill. York, Pa. Marcellus, Ill. New York City Boston Chicago Kansas City Minneapolis San Francisco Seattle London, England Hamburg, Germany

by the state insurance department to do a reinsurance in Utah. C. C. Fabian of this city is the process attorney. Volney S. Anderson, who died in this city last week after a brief illness, although young in years, was well-informed on all the insurance matters, especially casualty and liability lines.

The Rio Grande Fire Insurance company of San Antonio, Tex., last week effected a reinsurance with the American Fire and Marine Insurance Co. of New York. E. H. Pelce, who represented the company in Utah, left for San Francisco yesterday to negotiate for another company.

George W. Davy, formerly of Denver, is now located in Salt Lake representing the Home Life of New York in the capacity of general agent. He is working up quite an agency force and is anxious to secure the services of a few more good life insurance solicitors.

F. J. Root, special agent in eastern Oregon and Washington and all of Utah and Montana for the American Fire of Newark, has transferred his headquarters from Weno, Idaho, to Spokane.

Practically all of the life, fire, casualty and miscellaneous insurance companies doing business in the state have filed their annual statements with the insurance department. Commissioner Done expects to begin their publication, as required by law, about the middle of May. There are upwards of 200 insurance companies doing business in Utah, 120 of which are fire companies and forty-two life companies.

Samuel E. Love, manager of the Mutual Life of New York at Richmond, Va., recently delivered a lecture before the Women's club of Ashland on "Life Insurance as a business." The subject was to be more thoroughly educated wives as to what life insurance really means to them.

President Kipp of the life men's association has received a letter from Heber J. Grant, in which the writer expressed his appreciation of the pleasure afforded him by being present at protection annual banquet on February 23. Mr. Grant also commented upon the absence of any looking in the banquet hall, which he said was to be highly commended.

The New Orleans Life Men's association has passed a resolution whereby any general agent or manager, at the end of the month, who employed part-time men, would be expelled from the society. So far as is known, this is the most drastic action taken by any local body with regard to this phase of life activity.

W. H. Dale, who has charge of the branch office of the Guardian Casualty company in Salt Lake, is in the city on a brief business visit. He reports the outlook for insurance this year on the coast as extremely promising, judging by the way business started the beginning of the year.

The lightning losses in Illinois for 1913 (approximately \$1,000,000), were so extensive that the state fire marshal is now engaged in getting up quite an extensive bulletin on the character of these losses, and the protection afforded by lightning rods.

The General says: There is no true test of roofing but the proof on the roof. But

### MEN CURED SECRETLY

are loud in their praise of the prompt and positive results obtained at the SALT LAKE MEDICAL INSTITUTE. Patients who have been cured there relate their experience in these words: "They are specialists of a high degree of skill, and interested in making a cure for every man treated." And it is true that we work equally as hard upon each and every man to perfect a permanent cure. The Salt Lake Medical Institute, who have made the Salt Lake Medical what it is, are sending their friends to us to treat the most men of the country, who become our friends. We specialize in MEN'S DISEASES, and cannot advise too strongly against wasting your time on specialists who try to handle everything and whose only inducement to visit their office is the prospect of a large fee. We treat with cleanliness in anything. Cheapness and high-class, scientific work do not go together. The intelligence of our patrons compels us to stand at the head. THE NEW GERMAN REMEDY for blood poison is used in the clinic every day at our office, and one or two doses cure. We guarantee to cure you in 10 days; no loss of time, pain or delay from the most men of the country. Visit our offices, see our large free museum, get some information about your case. We positively cure all special and private diseases. Business and are also called "The Leading Specialists" throughout the west. Salt Lake Medical Institute 1593 SOUTH MAIN.

### FACTS for MEN Are You "Going Back"?

If you are sick of experimenting, come to a real Specialist and see how differently he will treat you. There is no guesswork about the methods I employ. My splendid success is due to the fact that I KNOW HOW to cure chronic diseases. My work is based on education, while experience and the application of common-sense principles have taught me the best course to pursue in the treatment of CHRONIC DISEASES on the same principle that you have learned by observation, experience and the application of good "horse sense" to do the line of work you are engaged in to the best advantage. The real proof of my success, however, lies in the claims of former patients that I cured them after other physicians had failed. A trial will convince you.

### Do Not Put It Off Any Longer. If you need a Doctor get the Best. My Extraordinary Success.

is due to my many years of practice, combined with a full knowledge of the most advanced methods employed by the best authorities of the day, which assist in defining symptoms promptly and the exact treatment to be prescribed. Hours: 9 a. m. to 5 p. m.; Sundays, 10 a. m. to 12 (noon). Come and have a friendly chat about your condition. No case accepted by mail. UNITED SPECIALISTS, Rooms 1 to 4, 28 W. Broadway SALT LAKE CITY, UTAH.

potent men have, like the man in the parable, failed to count the cost. Nearly all in the past and many still in the present, have looked upon mining as an adventure, a chance, a lucky strike, but not as a business. Small wonder that the vast majority meet the fate of the adventurer and the "fall guy." The publicity attendant upon the trial of Whittaker Wright and others of his ilk, the public and private disclosures of hundreds of other dishonest promoters, the activity of the postoffice department, the many articles in the popular magazines, the enactment of "blue-sky laws," and the almost invariable failure of amateur mining companies, have all combined to drive the brass-band promoter and the itinerant peddler of mining stock from the field.

### CONSTRUCTION—OFFICE QUARTERS.

For Yellowstone, Wyo., March 4, 1914. Sealed proposals will be received at this office until 11 a. m., April 4, 1914, and then opened for consideration at the office of the postoffice department, room 12-15-117, and General Manager Blake reports that they are making a good showing so far as they can be pumped, but owing to so much snow little can yet

be done in this line. He says, however, as soon as the weather will permit, operations will be commenced on a large scale.
