A Real Stroke.

You can learn to swim in two ways. You can go down and stick your toes off the cold water and scream, or you can jump off the dock into deep water. Ridgway's chose the latter. We jumped off a high dock into deep water and—a little chilly. On our first number we went clear down out of sight and when we came up we had to be pulled ashore in a row-boat. On our second number we didn't need the row-boat, but we did a heap of spluttering and splashing. On this third number we believe you will discover something that looks almost like a stroke in our swimming. Read it through and see if you don't think we are making some progress.

Since then public opinion has changed from condemnation to endorsement.
