

STOCKS IN A DECLINE

High Money and Fear of Election Outcome the Cause.

HEDGE BY BETS ON HEARST

Traders Carrying Stocks and Fearful of Slump Are Taking Short End of Wagers—Movement in Mexican Railway Stocks Shows Great Prosperity Extends to that Republic.

New York, Oct. 31.—With call money above 7 per cent—the highest since 8-1-2 per cent—and the betting orders shortened to 2 to 1, it is no wonder that to-day's market declined. The trading was very professional, practically all the business originating in the room, and the traders were bearish almost as a man, so that it would have been almost a miracle had prices maintained their level.

The commission houses welcomed the reaction, which they hoped would bring their business. Most of them had a large number of buying orders under the market, but few of these were reached, as apparently a greater decline was anticipated.

What had perhaps more to do with the change in the betting on the election than anything bearing on the political situation in the State was that many of the traders were anxious to place money on Hearst as a hedge. The decline in the market made a number of stocks look like bargains, but many traders, fearful of a surprise in the election returns, tried to lessen the risk on purchases of stocks by taking the Hearst side in the betting.

Hedging on Their Deals.

If they lost the former they might make up their loss in the latter. They had no such object in betting on Hughes as his opponent, and the Hearst side was taken by men who intended to vote the other way. When they could not get 2 to 1 they tried for 2-1-2 and finally took 2. But they bought stocks, and this represented their real feelings on the political outlook and on the market.

The movement in the stocks of the Mexican Railway in the past week has served to draw attention to the unexampled prosperity prevailing all over the continent of North America. Everybody recognized that conditions in the United States are about as good as can be desired, but as a matter of fact this country does not possess a monopoly of prosperity in the Western Hemisphere, the rise in the stocks of roads operating in the sister republic is interesting. That the tip has been passed on something substantial is shown by the excellent reports of earnings published by the roads, by the liberal dividend declaration on Mexican Railway's second preferred, and by the practical certainty of an enlarged disbursement on the first preferred stock of the National Railway.

Canada Also Prosperous.

The prosperity of Canada is attested by the extraordinary increase in the earnings of Canadian Pacific, a road which is representative of the whole country—the gross earnings having crossed the \$5,000,000 mark for the first time in the month of August, and again reaching it in September, notwithstanding the latter was only a thirty-day month.

The increase in gross for September was in excess of \$1,000,000 or about 25 per cent, compared with the corresponding month a year ago, and only differed in degree from every other statement issued by the company for a long time past.

If additional evidence of the prosperity at home could be desired, it has just been furnished in the report of the Steel Corporation, showing an increase of 1,000,000 tons in the volume of orders now on hand as compared with the total at the end of the preceding quarter.

Taking a superficial view of conditions from Labrador to Yucatan, it might appear as though Wall street was the only blue spot in the vast territory, but to suppose that the entire country is about to fully respond to the prosperity prevailing elsewhere is due to any degree of pessimism in the financial center of the New World would be a great mistake.

Conservatism is Necessary.

Sentiment here is all right—cheerful, but conservative. The need of conservatism is felt, not because there is any doubt as to the foundation of prices on actual values or as to further appreciation of values, but because the circulating medium is in such scant supply that to the touch of it up in speculation would anger the commercial activities which are not at present menaced by anything else whatever, unless it be the political influence at work in this State, and which seems likely to be stamped out on election day or the kindred interest in labor circles.

Always interesting, the annual report of Great Northern is even more so this year than usual, showing a reduction in the ton-mile rate, and in spite of this, an increase in the ton-mile revenue. The decrease in the ton-mile rate reflected the reduction made in rates on lumber and other classes of freight, and the gain in the ton-mile revenue made on a lower freight rate testified to the increase in efficiency which has always kept Mr. Hill's roads in the very vanguard of progress.

In the most speculative quarters was any disappointment over the earnings of the Steel Corporation, and the action taken by the directors in leaving the dividend on the common stock unchanged. If the actual net earnings for the quarter did not come up to expectation, the reason was clear—the extreme heat in July and August had interfered with the operations to a greater extent than had been supposed.

No other deduction was possible, in view of the fact that orders in books showed an enormous increase.

London Buys Mexicans.

London was fairly a large buyer of Mexican Central issues, but there was some profit-taking by local traders, as was natural in view of the extent of the rise within the past week. Rumors that negotiations for purchase of control by the Mexican government were either concluded or likely to be in the near future, found some credence but elicited no direct confirmation.

That public interest in the market is not entirely dead, was shown by the fact that a man from up the State came into a large Wall street office yesterday and asked if he could open an account with \$2,000. On being told that he could, but that he had better wait for a few days before beginning any, he said:

"I don't want to buy; what I want is to sell short on the break, and then sell long on the election, and bet 2 to 1 on Hughes and make money both ways."
