Rudyard's Trousers Pressed.

From the Boston Herald. The latest snaphat at Rudyard Kipling at forty, taken by his wife, shows him in crossed trousers, which are interpreted to mean that he is taking better care of himself than he was when the memorable photograph was taken showing him baggy at the knee. It may be, however, that this is only a temporary expedient, resorted to by Mrs. Kipling to remove the popular impression as to her talented husband's slovenly habits in the matter of attire. Wives indulge in this sort of artifice for their husbands' sake occasionally. They have been known to make him change his shirt more frequently than he wanted to.

Kingfishers as Weathercocks.

From County Life. There is a very quaint and Old World superstition in connection with the kingfisher, which I fancy still obtains here and there in remote parts of the country. The superstition is this: That if a stuffed or dried kingfisher be suspended by a thread or string from the beam or ceiling of a room its breast will always turn in the direction of the prevailing wind. How the notion first arose and how, in the light of common sense and inquiry, it has been perpetuated and still exists, I have a clear recollection as a youngster of going into a humble cottage in the shires and seeing a stuffed kingfisher thus suspended as a weather vane.

A Serious Problem.

From the St. Louis Post-Dispatch: How to make marriage a success on a small fixed income when prices continually advance is one of the serious North American problems.
