

STOCK PRICES GAIN

General Play of the Various Forces Brings Strength.

SHARP RISE IN AMALGAMATED

Reversal of Speculative Guessing as to Outcome of Commodities Case Most Definite Feature Affecting Market—Increased Purchases of Raw Copper Aid to Firmness.

New York, March 1.—Toward the close of last week there were many indications that during the decline in the market which ran through the week before and culminated in the sensational break last Tuesday, an unusually large short interest had been created.

Chief among these signs was the existence of a heavy borrowing demand for stocks. This is an evidence of speculation for the fact that values that are not yet trustworthy, inasmuch as it is well known that an actual liquidation of stocks often assumes the form of a deferred rather than an immediate delivery; that is to say, those really possessing the securities that have been marketed have not at once delivered their own stock under the sale, but have borrowed it for a time from other parties, thus temporarily concealing the fact that the liquidation has taken place.

A short interest of this kind, thus brought into being, is, however, although of a different character than that entered into by mere speculators for the decline, none the less real, and has to be offset sooner or later by a delivery of the original shares or by a repurchase in the open market of the stock sold.

Rally is Logical.

All developments in trade circles in the last week have tended toward the strong probability that, while the recent cut in the price of steel will make an end to whatever war, secret or open, has prevailed in the trade, it will undoubtedly serve to clarify the general iron and steel situation. Not a little buying of stock has been induced by this broad consideration, and, with the market in an overcast condition, the occurrence of a sharp rally was logical enough.

The one definite force in the market to-day, at least in the first two hours of trading, was a more or less complete reversal of the character of speculative guessing as to the outcome of the anxiously awaited decision of the Supreme Court in the commodities clause case.

It is, indeed, not impossible that the decision may be complicated for months yet, as the case is so complicated one, and may require extended study and deliberation on the part of the members of the court. If, indeed, it does not provoke widely different views among them.

Upon the receipt of the news of this probability, reading stock which had previously advanced over five points, broke a couple of points, but the stock rallied and held with great firmness until the close of business.

Most Issues Gain.

The general play of the different forces that have been described sufficed to bring about decided strength in the market as a whole, with a decided advance in two points in the principal stocks being not at all uncommon.

NEW YORK MONEY.
