IN ANNOUNCING THIS SALE OF OSTERMOOR MATTRESSES

We Cite Some of the Facts Concerning Them

The specially selected cotton is purified by the special Ostermoor sterilizing process; all the natural vegetable oils are expelled, and the cotton made thoroughly wholesome, germ-proof, and antiseptic.

Chemical and mechanical treatment render the Ostermoor Mattress proof against dust, moth and vermin, and absolutely waterproof.

The cotton is then subjected to intense heat, to strengthen fibre and increase elasticity and springiness, and then combed and carded into light, interlacing fibrous sheets of unusual softness and permanent flexibility.

Eight sheets of this wonderfully elastic cotton filling are hand-laid into the handsome ticking, and compressed into one even form of equal thickness throughout.

The Mattresses in this sale are made in this manner, but the tickings contain some very slight defects, and for this fact alone the prices are lowered:

| Size | Regular price | Sale price | Size | Regular price | Sale price |

The Home Beauty Parlor

André: In these party days of short sleeves and low necks, it is vastly important that kind of whitening you use. Or else your complexion will not successfully hide the summer's tan and they won't stay on. The best way out of the dilemma is to use a good quality of skin cream and mix it with a pint of hot water; add two teaspoonfuls glycerine. This is the simplest and most effective skin cream for a long time. It will not rub off like loose powder, and has a protecting effect on the skin of laundresses. It is very economical, too. For a fine wrinkle remover see answer to Miss Hiram.

Mrs. Helen L. Webb: Eyes are not only a drawback to looks, but especially they often lead to serious eye troubles. I make an eye tonic by dissolving an ounce of crystals in a quart of water. You do not say what kind of crystals you use. I use drops of this in each eye every day. It will strengthen your eyes and make them sparkling and brilliant. You do not say whether or not you wear glasses, but in any case this simple inexpensive tonic will prove soothing and helpful as well as beautifying.

Mrs. Mendenhall: Your unhealthy hair seems to indicate that the hair follicles secrete too much oil and this will lead to dandruff and other hair troubles. You are wise to take it in time, and I strongly advise the use of the invaluable canthox for a shampoo. Get a package at the drug store and mix a teaspoonful in a cup of hot water. This is plenty for a good washing, and will give you the effect of a fine treatment at a professional Beauty Parlor at small cost. Notice the softness and silkiness of your hair afterwards. It is a fine tonic for the scalp. Canthox gets rid immediately of the excess of oil and all dirt and dandruff.

Phyllis Lee: Yes, there is always the danger of increasing flesh too fast when you once begin to take it on. Perhaps it would be well to begin reducing now before you feel the fat burden. Try this simple remedy. It will require a dieting or special exercise beyond sensible living. Get 4 ounces paraffin and dissolve it in 1 pint water. Take a tablespoonful before meals. It will work rapidly, is not

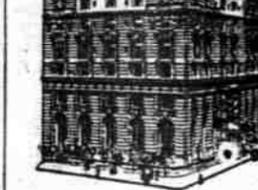

disagreeable, and you will experience no bad effects. Miss Hazel: The person who guessed you to be older than you are was doubtless influenced by those crow's feet which you say are creeping about your eyes. Let me repeat the formula that I have often given in this column. Mix an ounce of almond oil in half a pint of cold water and two teaspoonfuls glycerine. Let stand over night. At the first application of this cross-grained beauty cream you will feel the skin contract slightly, and after the wrinkles are effaced the skin will stay firm, because this fine preparation puts health and strength into the tissues by adding the natural methods of flesh and skin construction.

Donna Bella: You are right. "Hats" must go, and it is a good thing. It is not only unnecessary, but unsightly, to clutter up the head with false hair, nets, veils, or better than all of these is a good healthy head of hair which you yourself can easily obtain at small expense. Twice a week rub into the hair a tonic made by dissolving one ounce of quinine in a half-pint of alcohol and adding a half-pint of cold water. Hair specialists agree that a good quinine tonic, such as this, destroys dandruff germs and prevents the stringy, matted condition of the hair.

Alfred H.: I have often given the formula for a granular cream jelly. It appears again today in answer to Miss Hazel.

Pocahontas: That dark, muddy look to your complexion may have nothing to do with any skin trouble. From what you say, I fancy you are only run down, as is natural at this time of the year, and need only rest. Dissolve an ounce of borax in a half pint of alcohol; add one-half cup of sugar and enough hot water to make a full quart. Take a tablespoonful before each meal. The excess of acids in the system is thus eliminated. After all, you know, health is beauty.

PATENT CONTAINERS USED.

Eggs Now May Be Sent from Farmer to Consumer.

Eggs should be sent from farmer to consumer, according to the Bureau of Animal Industry of the Department of Agriculture. It formerly was a problem whether eggs could be sent in safety through the mails, according to the department, but the problem has been solved by means of patent containers.

It is recommended that, because of the high price of eggs every year, be taken by farmer and consumer to eliminate the middleman. Eggs have been selling for 50 cents a dozen in Washington and 75 cents a dozen in New York.
