

VICE ADMIRALS BILL IS PASSED

Measure to Create Higher Grade in the Navy Goes Through Senate.

RETIREMENT AGE RAISED

Argument Made that United States Might Be Embarrassed in Mexico by Lack of High Officers.

A bill creating the grade of vice admiral of the navy, and providing for the appointment of six vice admirals, was passed by the Senate yesterday, after a spirited debate lasting for more than an hour.

An amendment by Senator Bristow was adopted, raising the age for retirement from sixty-two years, as provided by the bill, to sixty-five years.

The selections are to be made by the President, subject to confirmation by the Senate, from among the officers on the active list of the line of the navy.

Senator Thomas, of Colorado, ridiculed the suggestion that the United States had ever been subjected to any embarrassments because her navy officers found themselves co-operating with officers of other nations.

Senator Bristow in supporting his amendment raising the age for retirement from sixty-two to sixty-five, declared that the United States was building up large retired lists of the army and navy that were becoming a burden to the taxpayers.

Senator Read, of Missouri, avowed he would go even further, and prevent the retirement of any officer from the active list of the navy, except for proved incapacity.

Secretary Daniels was greatly pleased to learn of the passage of the bill for creating vice admirals in the navy.

Mr. Daniels says that if the House passes the bill, as is expected, he will promptly fill every one of the six positions in the new grade.

Among those regarded as likely to be selected are: Rear Admiral Charles D. Sigsbee, Rear Admiral Charles D. Sigsbee, Rear Admiral Charles D. Sigsbee.

Mr. Daniels says that if the House passes the bill, as is expected, he will promptly fill every one of the six positions in the new grade.

Commissioner Caminetti Breaks Seal of Silence on Alien Problem.

HE MAY BE "CALLED"

Despite Bryan's Injunction, Official Openly Advocates Exclusion of Japanese.

Disregarding the injunction of Secretary of State Bryan and other administration officials, Commissioner Caminetti, the Japanese question should be discouraged, Anthony Caminetti, the Commissioner of Immigration, yesterday openly denounced the Japanese by name and insisted that "all Asiatics, including Hindus, are a menace to the country."

Mr. Caminetti made these statements before the House Committee on Immigration, which has under consideration the Raker exclusion bill, which was introduced a week or so ago at the request of Secretary Bryan.

Commissioner Caminetti asserted that "Asiatic immigration is a menace to the whole country, and particularly to the Pacific Coast, and that the danger is in California."

Mr. Caminetti referred to the Japanese at times as "Japs." He strongly urged that Congress pass laws "to prevent Japanese from stealing into the country."

"No Treaties to hinder." "The Chinese have become so acclimated that they can prosper in any part of our country," said Mr. Caminetti.

Representative Raker, of California, in order of the exclusion bill, asked: "Are there any existing laws of treaties that should prevent the passage of the Raker bill or either of two other Asiatic exclusion bills?"

Mr. Caminetti testified that unrestricted Asiatic exclusion is a menace to the public health, inasmuch as such aliens bring into the country hookworm, trachoma and other diseases.

Mr. Caminetti testified that unrestricted Asiatic exclusion is a menace to the public health, inasmuch as such aliens bring into the country hookworm, trachoma and other diseases.

Mr. Caminetti testified that unrestricted Asiatic exclusion is a menace to the public health, inasmuch as such aliens bring into the country hookworm, trachoma and other diseases.

RADIUM MANUFACTURER OFFERS SECRET TO U. S.

At Senate Mining Committee Hearing, J. M. Flannery Opposes Plan of Secretary Lane.

WORLD HAS PLENTY OF ORE

"If the purpose of the pending bill, which establishes a precedent by making the government go into the business of mining and manufacturing, is to furnish to the public radium for humane and charitable purposes, I shall be glad to give the government the so-called secret process which my company uses for the extraction of the radium from carnotite ore."

Thus Joseph M. Flannery, president of a Pittsburgh chemical company, offered yesterday to donate to the Federal government an extraction process which it is his company's secret.

But, continued Mr. Flannery, "if the government wants to use our process in order to go into competition in the open market with the miners and private producers of radium, I shall not feel justified in giving it to the government."

Mr. Flannery explained that one of the great troubles of the government would have been in discovering and establishing a process of its own for the extraction of the radium.

BLOW TO REPUBLICANS

Bill Would Reorganize Prince George County Road Rules.

Annapolis, Feb. 12.—A bill that is certain to open up the factional wound in the Democratic party in Prince George County has been introduced by State Senator William F. Holmead.

The bill repeals the "Wells" road law and places the management of the highway system in Prince George County in the hands of the county commissioners, where it reposed prior to 1910.

The road directors are retained, but the highway commissioners are authorized to appoint their successors, which means that the present Republican members will be succeeded by Democrats.

Mr. Holmead explained that one of the great troubles of the government would have been in discovering and establishing a process of its own for the extraction of the radium.
