Baby of Future is Considered Much thought has been given in late years to the subject of babies in the cities there are maternity hospitals equipped with modern methods. But most women prefer their own homes and in the towns and cities will send us their babies to be cared for. And since this is true we know from the great many splendid letters written on the subject that our "Mother's Friend" is a great help to expectant mothers. They write of the wonderful relief, how it seemed to allow the muscles to expand without undue strain and what a splendid influence it was on the nervous system. Such helps as "Mother's Friend" and the broader knowledge of them should have a helpful influence upon babies of the future.
