WAYS TO ECONOMIZE.

It is everybody's duty to economize this winter. Those of us who have not yet learned this from necessity should be willing to take the statement as a fact backed up by the experience of others. Even if we have our usual incomes, there are many whose incomes have been greatly lessened, and we must economize, not to store our savings in a bank, but to help the world's need on its feet through this period of hard times and warfare.

FAMOUS WOMAN Her Birthday And Yours

December 2—Mary Mortimer.

Mary Mortimer, who was born in Trowbridge, Wiltshire, England, ninety-eight years ago, came to this country with her parents when she was five years old and settled with them in New York. She managed to get a common school education here, but still thirsted after more learning. So she went to work as a school teacher, thereby earning enough to pay the expenses of a few years at the College of the Holy Cross, where the course of study she became principal of the school at Geneva, and later became principal of Brookport Normal School in New York State.

HOROSCOPE.

Wednesday, December 2, 1914.

Astrology finds this rather a favorable day for most activities. There is a place read as lucky for those who do not depend upon superiors for their success. The sway of the stars is read as peculiarly fortunate for those who believe in mystic and new thought doctrines. The spread of ideas that incline the mind toward psychological speculations is foretold.

Keep on Knitting.

She was a girl who lived in the outskirts of Washington, but because she worked in the city she had to spend every day two or three hours on the trolley cars going back and forth to her office. When she was out, long before Mr. Burleson and Mrs. Walsh and other prominent women took to knitting in the boxes of the theater and in their limousines, this girl began to knit on her daily trips, to make socks and mufflers and cholera bands for the European soldiers and the Belgians in need.

Transparent tunics falling in circular effect over skirts of satin are among the exclusive styles of the season. With them are worn the little cape basques that have a semi-military effect. Black, Frasier or American red tiffon, combined with satin of the same tone, is suggested for this model.

ALEXANDRA'S BIRTHDAY.

She was not visited by the German Emperor although he had been invited to come here for the occasion before the war broke out.

KINDERGARTEN SYSTEM BOON TO INSTITUTIONS

Bulletin of United States Bureau of Education Tells of Good Done by Kindergartens.

The kindergarten as a "humanizing factor" in orphanages and other institutions is described in a bulletin, "The Kindergarten in Benevolent Institutions," just issued by the United States Bureau of Education. Heads of such institutions declare that the kindergarten supplies at least a partial substitute for the family influence and for the spontaneous activity lacking in institutions.

EVERY WOMAN HAS HAND IN SWEATER FOR JOFFRE

Every Woman in the Community Contributes a Few Stitches to Presentation Garment.

Cable dispatches from Paris tell of the work of the women of Persigman, Gen. Joffre's native town, have combined to make him a sweater. Because there was at one time a general belief that trees and humanity were allied in close bonds of union, and that certain trees had healing qualities, it was customary for a person afflicted with disease to take a wooden string of three colors, and with his right hand tie the left loosely to the limb of a tree, then slip it off and hasten homeward with- out casting a glance back, the belief being that the disease was transferred to the tree by touching it. Thus from a tree it has become a common practice to touch any article made of wood to ward off misfortunes.

Patched Youth Would Not Even Drink Water from Whisky Flask. Annapolis, Md., Dec. 1.—An example of the strictness with which the midshipmen are observing the Navy Academy regulations against the use of intoxicating liquors, together with the prohibitory order of Secretary of the Navy Daniels, was furnished at the service football game at Philadelphia last Saturday.

The incident occurred while the struggle between the rival teams was at its height. The midshipman seated in the north stand, directly beneath the press box, had been cheering and aiming until their voices were hoarse and their throats sore and dry.

RASH OVER BABY'S HEAD AND BODY

Scurf on Scalp, Grew Worse, Very Restless, Formed Crust, Used Cuticura Soap and Ointment, Trouble Disappeared. 1241 Parkwood Pl., N. W., Washington, D. C.—"When my baby was about two weeks old I noticed a scurf on her scalp which gradually grew worse. It started with a fine rash over head and body and made her very restless at night. The rash left the thick scurf on her head. We used Cuticura, a well-known anti-septic and other remedies recommended by friends, but nothing seemed to do any good. This continued until she was three months old and by that time it formed sort of a crust so that her scalp never looked clean. It was especially bad on the soft part of the head. Nothing helped until we used the Cuticura Soap to bathe her and Cuticura Ointment to anoint her. They acted like magic, clearing the scalp entirely. The trouble disappeared." (Signed) Mrs. H. L. Anderson, Mar. 20, 1914.
