

**MOST VOTERS BOUGHT,
REFORMERS DECLARE**

Popular Government League Exposes Corruption in Election.

The greater percentage of voters are "bought and paid for" at elections in this country.

This was one of the hot shots taken at politicians by a number of prominent "insiders" in exposing the alleged coercion, corrupt practices, and influence of money in the recent Presidential election in addresses to the third national conference of the National Popular Government League, which convened in the New EBitt yesterday.

The "general" buying and selling of votes in this country was styled a species of "all quating petty treason." William J. Creasey, former master of the Pennsylvania State Grange, better known as "Farmer Creasey," who believes that the "gang" of the Keystone State "knows him well but loves him not,"

rapped the climax at yesterday afternoon's session of accusations of election frauds when he declared:

Pennsylvania Leads.
"Pennsylvania takes the cake for corrupt elections. From the best information at hand, men have been cheated out of their offices from governor down to director of the post."
Several years ago Mr. Creasey was a candidate for State treasurer in Pennsylvania, and he said that in that election ballot boxes were stuffed before balloting began. He cited one instance where 216 ballots for his opponent were placed in the box before the polls opened.

Mr. Creasey claimed that frauds are like fashions and change considerably from year to year, so that the "tricks" used at one year's election may be changed to some other plan for the coming election.

Of the many exposures which the speaker made he placed considerable stress upon a condition which he discovered in a Pennsylvania precinct of 143 voters, where he said 22 of these were paid \$2 each by parties "that marked the ticket for the voters in the booth."
Senator Owen estimated that \$25,000,000 was spent in 1916 for influencing the elections.
The conference adjourns this evening.

Union Pacific Opens Traffic Office and Information Bureau Here, in Charge of George A. Garrett.

In recognition of the rapidly growing popularity of Colorado, California, the Pacific Northwest and Alaska as winter and summer vacation resorts by Washingtonians and the increased importance of freight traffic from this city to the West, the Union Pacific system has established permanent traffic offices in this city, at Room 301, Riggs Building.
George A. Garrett, vice president of the Dupont National Bank, prominent in social and business circles, is general agent, and T. E. Reese is city passenger agent.

She Dances Poorly? Try "Greenback Yelp!"

Special to The Washington Herald.
Chicago, Jan. 5.—Is the East responsible for the "Greenback Yelp?"
What is it? Oh, beg pardon. Suppose you are dancing with a lady whose grace, charm and agility are not what they should be. Behind the lady's back, you make frantic signals toward the stag line, holding up a hand with two fingers crossed. Possibly you may signal with one, two or even five fingers, indicating a willingness to pay that number of dollars. A relief corps will be forthcoming to take over your obligation—C. O. D.

A Chinese firm is in the market for a heavy woven waterproof fabric suitable for jinkisha tops and curtains.

Velvet
THE SMOOTHEST SMOKING TOBACCO

A STRONG tobacco may have lots of flavor, but you can't smoke as much of it as you want. A mild tobacco often has only its mildness to recommend it.

VELVET combines mildness and flavor in such a way you can smoke all you want, and want all you smoke.

THE fresh ship that's hardest to gain, usually lasts the longest. The harder it is to please yo' tobacco taste, the longer you will stick to Velvet.

Pure Yeast Was Unknown in the United States Until Made by the Corby Company

It is a matter of official record, in investigations made by the government bureau charged with such duties, that adulterations entered into the manufacture of practically all yeasts except that produced by the Corby Compressed Yeast Company, and were by direction so labeled, up to within a very short time. Even now in many sections of the country those yeasts still bear this label denoting adulteration.

At a hearing appointed by the Board of Food and Drug Inspection of the Department of Agriculture, August 3, 1909, every yeast manufacturer present but ONE defended the adulteration of his product—the CORBY COMPANY ALONE CONTENDING FOR A STANDARD OF PURE YEAST, free from all foreign elements which render strength uncertain, and propagate impurities, SUCH AS IT ALWAYS HAD, WAS THEN, AND IS NOW PRODUCING—all of which is a matter of official record.

The organization of the Corby Compressed Yeast Company was directly due to the impossibility to obtain from existing sources yeast of the strength and purity essential to the baking of the best quality of bread. The standard of yeast then created has been consistently maintained—making such improvement as study and scientific research has made possible. Its demand has been established solely upon the recognition of its superior quality—and Corby Yeast is today the accepted standard by the largest and most discriminating bakers throughout the land who appreciate not only the merit of the Corby product itself; but have found in its methods of legitimate competition relief from the arbitrary policy and price which a previous virtual monopoly made possible, and that would inevitably return, following legislation making the operation of the Corby plant impossible because of the unavoidable creation of alcohol as a by-product—which, however, has always and solely been sold for use in the arts, sciences and manufactures.

It may not be generally known to what extent ethyl alcohol is required in pharmaceutical preparations.

The United States Pharmacopoeia, which is the official standard—the law of the land by Congressional enactment—publishes in its latest revision, issued in September, 1916, a list of no less than one hundred and thirty-seven recognized ethical preparations in which alcohol is indicated either as a principal or as a solvent.

Alcohol As a Raw Material

- | | | | |
|------------------|--------------|-----------|-------------|
| Iodoform, | Bromoform, | Chloral, | Acetanilid, |
| Ether, | Chloroform, | Trional, | Aspirin, |
| Ethyl carbamate, | Paraldehyde, | Sulfonal, | Antipyrine. |
| Ethyl chloride, | | | |

Alcohol As a Solvent, Etc.

- | | | | |
|-----------------------------|-------------------------------|--------------------|------------------|
| Camphor water, | Fluid extract of— | Resin of— | Tincture of— |
| Colloidion, | Eucalyptus, | Jalap, | Cinchona, |
| Aromatic elixir, | Gelsemium, | Podophyllum, | Cinnamon, |
| Extract of— | Gentian, | Scammony, | Colchicum, |
| Aconite, | Licorice, | Spirits of— | Catechu, |
| Belladonna, | Grindelia, | Ether, | Digitalis, |
| Cannabis, | Guarana, | Nitrous Ether, | Ferric Chloride, |
| Cimifuga, | Hellebore, | Ammonia, aromatic, | Gelsemium, |
| Colchicum, | Hyoscyamus, | Bitter Almond, | Gentian, |
| Colocynth, | Nux Vomica, | Anise, | Ginger, |
| Ergot, | Pilocarpus, | Orange, | Guaiaac, |
| Ox Gall, | Podophyllum, | Camphor, | Hydrastis, |
| Gelsemium, | Rhubarb, | Chloroform, | Hyoscyamus, |
| Hydrastis, | Sabal, | Cinnamon, | Iodine, |
| Hyoscyamine, | Sarsaparilla, | Nitro Glycerin, | Kino, |
| Nux Vomica, | Squill, | Juniper, | Lactucarium, |
| Physostigmine, | Senega, | Lavender, | Lavender, |
| Rhubarb, | Senna, | Peppermint, | Lemon, |
| Stramonium, | Staphisagria, | Spearmint, | Lobelia, |
| Sumbul, | Stillingia, | Tincture of— | Musk, |
| Taraxicum, | Subul, | Aconite, | Myrrh, |
| Viburnum, | Viburnum, | Aloes, | Nux Vomica, |
| Granulated ferrous sulfate, | Xanthoxyhum, | Arnica, | Opium, |
| Belladonna, | Compound Solution of Cresol, | Asafoetida, | Physostigmine, |
| Buchu, | Compound Mixture of Licorice, | Bitter Orange, | Pyrethrum, |
| Cannabis, | Glycerite of Hydrastis, | Sweet Orange, | Quassa, |
| Cascara, aromatic, | Oleate of Mercury, | Belladonna, | Rhubarb, |
| Cimifuga, | Oleoresin of Cubebs,* | Benzoin, | Squill, |
| Colchicum, | Soap liniments, | Bloodroot, | Stramonium, |
| Digitals, | Soft soap, | Calumba, | Strophanthus, |
| Eriodictyon, | | Cannabis, | Tolu, |
| | | Cantharides, | Valerian, |
| | | Capsicum, | Veratrum. |
| | | Cardamom, | |

*Ether, derivative of alcohol, is also used in the preparation of a number of oleoresins.

Syrups: The syrups constitute simply another form for the administration of a number of drugs, for the most part those occurring also in other preparations; alcohol is a constituent of a number of them, appearing as a solvent or stabilizer.

A recent volume, "Pharmacology of Useful Drugs," compiled by Dr. Robert A. Hatcher and Dr. Martin I. Wilbert, and published by the American Medical Association, the highest medical authority in this country, states on page 102, in the section on alcohol, the following:

"In pharmacy it (alcohol) is widely used as a solvent and preservative, and many of the extractive preparations, including tinctures and fluid extracts, contain from 30 to 80 per cent of alcohol."

Thus it will be seen that alcohol plays a tremendously important part in medicine and surgery, rendering it a positive necessity in the successful preparation of the most potent agencies employed in the prevention and cure of diseases which endanger health and jeopardize life.

The Corby Plant is strictly a yeast manufactory; and every gallon of the alcohol which its legally prescribed process produces has by strict understanding been sold and used ONLY in these important industries.
