WASHINGTON RAILWAY AND ELECTRIC SYSTEM NOTICE

Conductors and motormen now on strike who wish to be reinstated and retain their standing as to pay, due to number of years in service, must report for duty on or before midnight Tuesday, April 10th, 1917.

They will be entitled to pick scheduled runs dating from the time they report for reinstatement. In addition to the men who remained in the service during the strike and those who have since returned to work, a large number of new men have been permanently employed since March 12th, 1917, and have been assigned to and will retain regular runs. There are, therefore, only a comparatively small number of regular runs open at this date.

Trainmen will not be required to return to the same division on which they formerly worked if their chances for regular runs are better on some other division. Any conductor or motorman not reporting for duty by the time above stated will lose all his rights of seniority and can only return to the service at the rate of pay of a new employee. The company reserves the right to reject any application for reinstatement or re-employment. By order of, J. H. STEPHENS, Superintendent. April 6th, 1917.

Commerce Department Wants Men for Foreign Service.

High-class men are wanted by the Bureau of Foreign and Domestic Commerce, Department of Commerce, to fill positions as commercial attaches in foreign countries. From this list will be chosen men to fill vacancies as they occur in South America, Australasia, and the Far East.

Commercial attaches are frequently termed "trade diplomats." They receive salaries up to \$5,000 a year, and as they are accredited by the State Department to the embassies or legations in the countries to which they are assigned, they have a diplomatic standing. The examination will be conducted by the Civil Service Commission in the principal cities of the country and will consist of separate papers on foreign trade, current events in history and government in foreign countries, industrial conditions, economic and commercial geography and transportation, and foreign languages. Out of the 2,766,000 children in England between the ages of 12 and 16, only 1,200,000 received any further education after 12, according to the latest reports.

RAILROADS ASK RATE INCREASE

Southern Lines Plead Increased Cost of Operation.

Thirty Southern railroads have filed with the Interstate Commerce Commission a joint petition asking for a horizontal increase in freight rates of 15 per cent, except as to coal and coke, on which a maximum increase of 15 cents per ton is asked.

The petition asserts that the cost of operation of railroads has increased so materially during the last year, especially since the Supreme Court has held the Adamson law valid, that efficient railroad service cannot be performed unless additional revenues are granted.
