SUBSCRIPTION RATES BY MAIL: Daily and Sunday, 45 cents per month; \$5.00 per year. Daily only, 35 cents per month; \$4.00 per year.

Entered at the postoffice at Washington, D. C., as second-class mail matter.

SUNDAY, DECEMBER 2, 1917.

The National Guard Abroad.

The "Rainbow Division" has arrived in France. About that fact a whole romance might be woven, without wandering far from the facts; but that story will be one for Americans to read and think about after the war is fought and won.

Less than two years ago our National Guard was a "joke." It was openly derided by officers of the regular army. Some of the State Guards were in a deplorably low state of efficiency; others were so badly off. Some were paralyzed by politics. Some had officers so physically impossible from the military point of view that it would have been ridiculous to put them in the field.

Then came the Mexico imbroglio on the border. President Wilson sprung a real coup d'etat when he called the Guard to the colors. The nation rubbed its eyes in astonishment when it saw thousands of young men—many of whom had enlisted in the Guard because they wanted the "exercise and training," and because of the two weeks' summer camp—actually forced to abandon their regular employment and do real soldier work guarding the Rio Grande from "Greaser" incursions.

Since that time much work has passed under the bridge. The Guard has come into its own. It has been transformed into an efficient fighting force. It is not far behind the regular army in efficiency. The best proof of that is its presence on French soil, where it will soon be thrust into the trenches facing the Boche.

Farm Tractors a War Necessity.

The War Industries Board will soon decide who will have priority, after the government, in the matter of securing steel for industrial purposes, and it is pertinent to remark that in the judgment of those who read as they run, the manufacturers of farm tractors should have the call.

England led the way for the adoption of the farm tractor as a war machine. Threatened by isolation from the food-producing countries of the Western hemisphere by the submarine, she took heroic measures to protect herself from famine.

The minister of agriculture organized an army of farm tractors, placed headlights on them, and plowed day and night for weeks and weeks in the spring of the year. When the harvest was gathered and England found she had enough food to withstand any blockade of submarines for another year, credit was given the tractor as the most effective weapon of warfare yet discovered.

France had the same experience. The government subsidized the manufacture of tractors and organized schools for their operation.

The United States, the last great power to enter the conflict, is soon to find that the farm tractor is a necessity of war. With the day approaching when the essentials will be separated from the nonessentials, and the former given preference in the delivery of fuel and materials, the priority committee of the War Industries Board must recognize the farm tractor, as it was recognized in England and France, as the most effective weapon of the war.

At the Helm.

A happy omen of the times lies in the fact that we have in the White House another Lincoln. Mistakes were made, as they were made in the early sixties—and malevolence will show its venom as it did in the early sixties—but the fact remains that at the helm is the pilot unafraid.

Surely the man who could stand the ribaldry of the mob when he was "watchesfully waiting"—the man who smiled grimly when the crowd misread his "too proud to fight" utterance—was the bravest man of his time, and how clearly events have justified his acts.

We saw him at the theater the other night, seeking succor from a burden such as no other man in history has carried, and we marveled at the witchery of that wonderful face. It was a rare treat to note his evident enjoyment—and to feel that the fate of our children rested with such entire confidence in his wise keeping.

And how splendidly the great mass of the people is upholding him. It must hearten him to know that the true sentiment of the country is undoubtedly back of him.

It Is a Pointer.

A New York jury has indicted Sweeney, head of the program of that army and navy bazaar which took in \$71,000 and turned out \$750 for the soldiers and sailors.

Better yet, the aldermen have passed an ordinance under which all entertainments given in the name of charity must obtain permits from the department of licenses and be under its control. There's a pointer in this for every community in the country not similarly safeguarded.

Don Juans of the Day.

Rumor has it that an actor of note is about to be divorced by his fifth or sixth wife. This particular Don Juan has enjoyed public favor for many years, and, in truth, on his ability he has gained it, but we are growing weary of the jokes that accompany his matrimonial ventures and failures. As items salacious they may appeal to a few, but as a homily on what ought to be considered a sacred relation they are becoming tiresome.

To our everlasting shame men and women marry and divorce with too much ease. To vitiate a contract, made sacredly, by the whim of one or the other, is the vogue. We are becoming loose in our mental morals. Too many seem to have thrown away the anchor of sanctity and are drifting on the ocean of passion.

equal to the occasion; are there not laws that are pliable, and courts where justice does not reign?

Perhaps this war will make us care more about the men who are to be fathers, and the women who are to be mothers—and less about the ways of the morally loose.

At least let us stop and think—and when we do we will especially condemn the journalism that flaunts this form of legalized vice in the faces of our families.

A Conflict Easy of Compromise.

Between food and fuel there is little choice. Both are necessary. It is to be hoped that the director of priority will not have to face a fight between them.

The protest of the Food Administration against any priority order being issued in favor of coal and coke seems reasonable, in view of the case that it presents. It is true that a panicky feeling has been created by the threat of a fuel famine, but it is equally true that a condition essentially worse would result if a drastic priority order should result in a sidetracking and indefinite delay of food shipments, which is feared by Mr. Hoover's associates.

It was thought that the Food Administrator and the Fuel Administrator were working in perfect harmony. They have been up to the present hour. Nor is the cleavage between their separate interests irreconcilable. A drastic priority order which gives exclusive preference to either food or fuel ought not to be issued by Judge Lovett. Both should be given preference, as far as is compatible with war shipments. The question is essentially one to be handled according to local needs. In districts where there is a real or supply of foodstuffs, a full priority order for coal and coke would work no damage. In other sections not so fortunately situated, there must be a skillful balancing of interests.

What appears to be a conflict may be only a tempest in a teapot after all, to be straightened out by a friendly conference between Mr. Hoover and Mr. Garfield.

Times and Maidens Change.

Remember that time when Bill Taft, with his mighty bosom swelling with tariff reciprocity, sparkled Miss Canada, and got the mitten so's that all the world saw it?

Well, the haughty maid has relented. There's a soft glad hand at her front door and room on the parlor sofa for Uncle Sam, with the lights turned low.

Since April last Miss Canada has sent into the United States over fourteen million bushels of wheat duty free. On April 16 she removed her import duty on wheat and this act automatically broke down the tariff walls.

A common distress makes neighbors akin. After Uncle Sam doffs his khaki, gets a bath and a shave and dons his old reliable boiled shirt, watch him perk up to Miss Canada once more!

Bill Stone, of Missouri, declares war on Bulgaria, hey? Somebody's been canvassing the Missouri Bulgarian vote, perhaps.

The U-boats, says the Kaiser, must have divine help, to succeed. Sounds like blaming the bankruptcy on the silent partner, as usual.

Norway gives convicted German bombers seven months' imprisonment. It's simply dangerous to slap the Kaiser's wrist that way.

Uncle Sam is making a lot of "tanks" that are to be less unwieldy but bigger and stronger than the British. When it comes to "tanks," watch us!

Russian armies in the Riga region are starving and are expected to go on a raid for food. We suggest that the German bread-basket is pretty full.

Germany's reported peace terms to Russia show that the Kaiser still clings to his idea that he'll keep what he's got of the other fellows and ask for more.

Von Bethmann-Hollweg, with a big staff of assistant diplomats, is going to Switzerland "on a political mission of great importance." Now is the time for the Swiss to lock up their hams and cheese.

"Latest edition! All about Byng hanging Hindenburg!" cries a Berlin newsboy. Then the Kaiser has him hanged, which is a wise, if not cultured, thing to do. This is a fairy story for the American newsy.

Daughter of a Seattle judge marries a Jap, because, she says, they are "mental plane mates." Everything goes, these days! If they can't marry for love's sake they go to it because they both wear No. 6 shoes!

Russian Was Easy.

Reference at a social session was made to lingual dexterity when Congressman John M. Evans, of Montana, said he was reminded of a little incident along that line.

Down at the cigar store one night the regulars were talking about the war and remarking how it gave one something worse than face ache to pronounce the Russian names that appear in the news.

"Those Russian names are nothing," remarked a man named Johnson, with an expansive smile. "You just ought to hear what I stack up against in my own home every day of my life."

"What's that?" demanded one of the regulars, amazedly. "Do you mean that you have somebody in your family who can put a kink in those Russian syllabic twists?"

"Well, I should say that I have," rejoined Johnson. "You should come around some time and hear the baby and the parrot when they get to talking together." Philadelphia Telegraph.

The Maple Leaf Forever

In days of yore from Briton's shore, Wolfe, the dauntless hero came, And planted firm Britannia's flag On Canada's fair domain.

Here may it wave, our boast, our pride, And joined in love together, The Lily, Thistle, Shamrock, Rose, And Maple Leaf forever!

The Maple Leaf, our emblem dear, The Maple Leaf forever! God save our King, and heaven bless The Maple Leaf forever!

At Queenston Heights and Lundy's Lane Our brave fathers, side by side, For freedom, homes, and loved ones dear, Firmly stood and nobly died; And those dear rights which they maintain, We swear to yield them never! Our watchword evermore shall be, The Maple Leaf forever!

The Maple Leaf, our emblem dear, The Maple Leaf forever! God save our King, and heaven bless The Maple Leaf forever!

On merry England's far-famed laud May kind heaven sweetly smile; God bless old Scotland evermore, And Ireland's Emerald Isle! Then swell the song, both loud and long; Till rocks and forests quiver, God save our King, and heaven bless The Maple Leaf forever!

The Maple Leaf, our emblem dear, The Maple Leaf forever! God save our King, and heaven bless The Maple Leaf forever!

THE WAR GIVETH AND THE WAR TAKETH AWAY

THE OPEN FORUM

CASE OF CAPT. SCHNEIDER.

H. E. C. Bryant-Makes Plea for Justice and Fair Play.

Editor The Washington Herald—I wish to say a word for Capt. Henry Schneider, formerly head of the Ninth Metropolitan Police precinct. For three years I lived near Capt. Schneider, and I know him and his family well. I have never been an intimate friend of Capt. Schneider, but have been close enough to him to know that the biggest thing about him is his heart. No man in Washington is more thoughtful of his friends and his family than Capt. Schneider. He has a wife, a daughter and two sons. His oldest son is in the navy, somewhere in the war zone, fighting for his country.

Capt. Schneider is asking for a fair trial. He demands that justice be done him. This is all. He does not want his character blackened with an unproved charge. He would keep his record clean for the sake of his children, as well as himself. Here is his statement of the facts as he recalls them: "On Saturday, August 27, 1917, at 6:30 p. m., I received the following from Maj. Pullman: 'Pending investigation of charges filed against you at these headquarters (police headquarters), you are hereby relieved of the command of the Ninth precinct.'"

"The nature of the charges were not indicated and I knew of no reason why charges of any kind should have been made against me. As soon as possible I saw Major Pullman, and he informed me that it was in connection with the Ellison matter; Ellison had been arrested for the Virginia authorities, and was fighting extradition.

"I told Major Pullman then, and Commissioner Brownlow later, very frankly of my entire connection with that matter.

"The facts, as I stated them, are: Ellison, whom I had known for some time, came to me for advice, which is a common practice between citizens and police officers. He told me he would try to find out what could be done. I saw Mr. Ball, commonwealth attorney for Alexandria county, and he told me about the case. I advised Ellison to stop fighting extradition and go to Virginia for trial. Ellison, who knew that I was well acquainted with the Virginia authorities, asked me to intercede for him. I told him that I could not and would not interfere. I did this at least three times in the presence of witnesses. I did speak to Mr. Ball a number of times about the matter—in fact, every time I met him I would ask him how he was coming out with the case, but never did I make any effort to have it settled out of court. Nothing was ever said about money, as was intimated to me by Maj. Pullman August 27. The Trial Board records will show that in response to questions Mr. Ball stated positively there were no improper suggestions on the part of myself and that all of our meetings were accidental. I could not have influenced Judge Cloth in the matter, for he had no jurisdiction in it at all.

"I admitted all the facts in the case. I did not consider that I had done wrong, and I am still of the opinion that if a mistake was made in this matter it was of the head, and with no thought of personal gain. I have no axe to grind. All that I ask is simple justice. It does seem to me that my clean record of twenty-six years' service should entitle me to fair and just consideration."

These are the details given to me by Capt. Schneider. It is a serious matter to blacken a man's character, and damn him without a full and fair hearing. Any alleged criminal is given the benefit of the doubt. To brand a man as a criminal, without a thorough application of justice to his case would be a great wrong to him and his innocent family.

"I never asked a favor of Capt. Schneider. He never did me one. I owe him nothing. He is not in debt to me for anything. But I do know his family, and his disposition to do right, and I do not believe him guilty of anything that involves his integrity.

Capt. Schneider was appointed to the Metropolitan Police November 5, 1911, and was promoted to sergeant in 1912, lieutenant, and captain in 1913. He served six years in the

PLANES COULD WIN WAR.

John L. Quinn Says Flyers Would Defeat Germany Quickly.

Editor The Washington Herald: "To win the war in as short time as possible, please permit a suggestion with a few comparisons for your consideration: "The quickest way to trim a tree of all its limbs is to cut down the tree and then cut off the limbs. The submarine is but one limb of the German war machine, and the cost in men, food, money and munitions to cut it off would seem as great. If not greater, than to capture the main supporting body—Germany. "A hollow iron ball six inches in diameter composed of a cast iron shell one inch thick, with a small opening in the side will withstand the heavy blows of a hammer in the hands of a strong man without breaking it because it is supported all around, but it may be filled with water, allowed to freeze and it will burst wide open, or it may be filled with water, placed over a hot fire for a short time and it will soon be blown to fragments. Here a small quantity of water accomplishes what a strong man and a heavy hammer cannot. Germany has not been touched. Like the hollow iron ball it is comparatively small, but strong fortified, and for three years has successfully withstood the hammering of military operations and (much more) the hammering of the great air force of the United States. By way of a hot fire for a short time and it will soon be blown to fragments. Here a small quantity of water accomplishes what a strong man and a heavy hammer cannot. Germany has not been touched. Like the hollow iron ball it is comparatively small, but strong fortified, and for three years has successfully withstood the hammering of military operations and (much more) the hammering of the great air force of the United States.
