**THE DRIVE BEHIND THE DRIVE.**

The drive in France is on--relentless, untiring, irresistible. The Hun is on the run. Your dollars will keep him running. Your dollars will overtake him. They will challenge him on his own soil and destroy him.

Your dollars must march behind each battalion of American soldiers. They are the motive power of victory. Your dollars are the drive BEHIND THE DRIVE.

Yet-- you are asked only to lend them. To lend them with profit to yourself. To become a full fledged member of the greatest financial institution in the history of the world--The United States of America. You are asked only to make the safest investment on earth. The man power is given. The money power is merely loaned.

A great British naval authority has just stated that American troops have yet to yield ground in action since the first division landed. Shall not the drive behind the drive be equally courageous?

Do you want your dollars to march proudly across the Rhine? Do you want them to help end the war--end it quickly--end it with victory? Of course you do. So you will buy all the bonds of the FOURTH LIBERTY LOAN you can.

Yours for the Fourth Liberty Loan,

*King's Palace.*
