

THE CONSERVATION OF MAN POWER ---and the Transmission of Good-Will

America's most formidable and valuable investment now resides in Europe in the form of two million victorious Yankee soldiers. These boys are the fathers of the coming generation. Their health must be preserved. Their morale maintained. We must conserve this man-power--conserve it and protect it as we would our very lives--we must see that nothing is left undone to keep them CLEAN in mind and body.

The transmission of good-will to the United War Work Drive solicitor who comes to you asking a gift is alright, but it's DOLLARS that count. It's real, round American cart wheels that will help those seven humanitarian organizations keep our boys in the proper frame of mind---that will bring our boys back to us healthy, happy and immortal heroes.

Give Freely and Unstintingly
