The Herald's Weekly Sermonette
The Christ Ideals in the New Age.
By James A. Edgerton,
President International New Thought Alliance.

The world war will mark the beginning of a new era in the world's history as did the civil war mark a new era in the history of this nation. Perhaps even more definitely, for the reason that the civil war only ended slavery and started a new nationalism, whereas the world war has already seen the change of many governments from monarchies to republics, has marked the birth of several new nations, has radically altered the map of Europe and in some degree the map of other portions of the world, has vastly accelerated the movement toward prohibition and woman suffrage, has started a new industrialism and has wrought other changes, political, economic and sociological that perhaps cannot be completely realized and measured for centuries.
