PACT FOES SEE FRESH DANGER IN 'TIGER' NOTE

Say Clemenceau's Letter to Poland Shows League To Be Meddlesome.

NORRIS OPPOSES PACT Asserts He Will Never Vote For Covenant Because of Injustice to China.

Premier Clemenceau's letter to Poland explaining the provisions of the peace treaty was studied yesterday with a great deal of interest by Senators opposed to the league of nations. In their opinion, Article XI of the league covenant is already construed to authorize interference by the league in the domestic affairs of nations. The letter of the French Premier and its application are regarded by anti-league Senators as a concrete illustration of what the league will attempt to do if Article X and Article XI remain unchanged. Clemenceau, in his communication to Premier Paderewski of the Polish republic, said that under the treaty the allied and associated powers have "an obligation, which they cannot evade, to secure in the most permanent and solemn form guarantees for certain essential rights which will afford the inhabitants of Poland the necessary rights, whatever changes may take place in the internal constitution of the Polish state."

Plans Completed To Make Tomorrow "Greatest Fourth"

All is set for Washington's Independence Day festival tomorrow. "Stay in Washington," is Commissioner Brownlow's significant advice. His committee announced last night that every detail of the festival has been completed and all are waiting for the dawn of the greatest Fourth of July in Washington's history.

While President Wilson will not be able to attend the ceremonies in front of the National Capitol in the evening as it had been expected he could do, a message to the people of Washington and to all of the individuals taking part in the celebration is expected from him tomorrow.

Financial arrangements are gaining momentum each day, but despite the efforts of Chairman Richard W. Hynson, of the finance committee, and his twenty-five co-workers, further co-operation on the part of Washingtonians is necessary. Financing of the pageant, with the exception of the embassy floats, is to be borne by the War Camp Community Service in co-operation with the public-spirited citizens. To date

U. S. EMPLOYEES PLAN BIG DRIVE

To Conduct Nationwide Campaign for Civil Service Retirement.

A nation-wide publicity campaign to aid in the passage of the Lehigh and Sterling retirement bills for Federal employees was decided on last night by the Joint Conference Committee on Retirement of the Civil Service at a meeting held in the American Federation of Labor Building. Every organization of government employees from the Atlantic to the Pacific coast will be called upon to use pressure on Congress and to furnish funds for publicity work. While all the members of the joint conference approve both bills, some of those present last night suggested several changes, but these were argued down with the statement that the enactment of either bill will constitute the first step and that amendments and improvements to the bill naturally will follow.

NAVY TO BUILD DIRIGIBLE PLANT

Will Buy Airship from British Preparatory to Establishing a Factory.

The Navy Department will buy a dirigible of the rigid type from Great Britain preparatory to its plans of establishing a factory for that type at or near Cape May. It is understood that the navy wants to begin operations in the development of dirigible ships as soon as possible and that it was not feasible to make an immediate purchase from Germany as the navy says we are still technically at war with that country. The navy proposes to spend up to \$2,500,000 for the British ship, but it is said that the Bureau of Construction and repair will in the long run be able to duplicate it for \$1,500,000.

6,000 TO STAY TO WATCH HUNS

Paris, July 2.—Six weeks from now the American troops in Germany will number not more than 6,000, providing the Germans show an intention in the meantime faithfully to carry out the terms of the treaty of peace. General Pershing made this announcement at a conference with American newspaper men today. But he added: "America's army of occupation ceased to exist today. It will be known henceforth as the 'American force in Germany' or 'on the Rhine.' General Henry Allen, former commander of the Ninth Division, will command it. General Hunter Liggett returning home at his own request. The force will be stationed only at one point, probably Coblenz. "Of the five American divisions now on the Rhine, the Fourth and Fifth are preparing to move homeward within the next few days. "The Second and Third Divisions are scheduled to follow in a few weeks."

Surplus Food for D. C. Put Up to Secy. Baker

In an effort to have surplus army food supplies put on public sale in Washington, Representative William B. Oliver, of Alabama, will confer with Secretary of War Baker at 3:30 o'clock this morning. "Washington is the proper place to test the general feasibility of this plan," declared Representative Oliver last night. "If Washington can put it over successfully I will try to benefit my home town in the same way." Commissioner Gardner and John G. McGrath, president of the Citizens' Food Council, were unofficially informed yesterday that the nearest supply of army stores is in Baltimore. Mr. McGrath stated last night that the success of the plan will depend on whether the cost of transportation and "overhead" expenses in bringing the supplies to this city would be excessive. In a conference yesterday between

DR. ANNA SHAW GREAT "SUFF" CHIEF, DIES

Honorary President of Suffrage Association Succumbs at Moylan, Pa.

WAS 71 YEARS OF AGE Most of Later Days Spent in Making Her Home "Rich in Personal Values."

Philadelphia, July 2.—Dr. Anna Howard Shaw, honorary president of the Woman's Suffrage Association, died tonight at her home in Moylan. She was 71 years old, and devoted virtually all of her life to the cause of equal suffrage. When the United States entered the war in 1917 Dr. Shaw was a leader in the movement to place the suffrage organization at the service of the government, and President Wilson named her as chairman of the women's committee, a post in which she had full opportunity to exercise all her diplomacy, energy and patriotism. Dr. Shaw spent most of her leisure time of late at her farm at Moylan. Speaking recently of the joys of farm life, she said:

"I resolved that I would not grow old unhappily and that I would keep to the end the cheerful disposition which has been my mainstay through life. That was my reason for building a home to which I could retire when I should no longer be able to travel. I decided, too, that while still active I would make that home a place rich in personal values. Dr. Anna Howard Shaw came from England to this country an unknown pioneer girl of 4 years, and through her efforts eventually became the president of the National Woman's Suffrage Association. In her girlhood she lived with her parent immigrant family in a Michigan wilderness forty miles from a postoffice and 100 miles from a railroad, starting her career as a school teacher, walking eight miles a day and receiving \$4 a week. Her home was a poverty-stricken log cabin built by her father, who was compelled to leave his wife and children at the mercy of Indians and wild animals, while he earned a living for them.

From her Michigan home Dr. Shaw went to live with one of her married sisters in a northern town. After studying at Albion College from 1872

TRADE BAN TO GO AS HUNS RATIFY

State Department Takes Issue with Palmer on Blockade End.

The State Department stands pat on the official agreement received here from the Peace Conference that the blockade will be lifted and trade resumed with Germany the moment it becomes known to the nations interested that Germany has ratified the peace treaty. In this conclusion the State Department and, as far as essentials go, Senator Knox are opposed to the understood opinion of Attorney General Palmer that there can be no resumption of peace functions until after the Senate has ratified the treaty. Knox holds that when three of the big nations ratify the treaty peace then becomes an accomplished fact. The State Department and other authorities do not discuss this particular opinion, but it is evident that on the main proposition, namely, the lifting of the blockade, the State Department and Knox are not far apart.

D. C. BOY DEAD IN PIKE CRASH

One man is dead and another is badly injured as a result of a motorcycle collision on the Baltimore Pike. Albert J. Myers, 23 years old, 1114 Fourteenth street, is the dead man, and Milton J. Berry, a brother-in-law, was the man who was badly injured. Driven by Myers the motorcycle was rounding a curve near Beltsville when the driver lost control and the machine upset. Both men were thrown to the road and before they could get out of the way an army motorcycle, traveling at a high rate of speed, struck them. The army machine did not stop. Picked up by a passing motorist the injured men were brought to the Emergency Hospital for treatment. Suffering from a fractured skull, Myers died several hours later. Berry was treated for bruises to his body and was taken home. Coroner Nevitt was notified.

NEW REVOLUTION SWEEPS OVER GERMANY

Radicals and Troops Clash In Dusseldorf Resulting In State of Siege.

NOSKE, NEW 'IRON MAN' Decree Declares Strikes Illegal and Minister Orders Arrest of Participants.

Copenhagen, July 2.—A brand-new revolution is brewing in revolt-torn Germany. Berlin and Hamburg are practically in a state of siege. Clashes between radicals and government troops in Dusseldorf have resulted in that city being declared in a state of siege also. Twenty thousand laborers handling the distribution of food in Berlin threaten to strike regardless of the fact that a famine will result and chaos reign. In connection with this labor agitation a Spartacan coup is feared. The Spartacans have smuggled guns from Hamburg to Berlin in coal cars. Attempts were made yesterday to blow up huge stocks of food in Hamburg.

Under Martial Law. Government forces have occupied the principal buildings in Berlin. Troops with machine guns are on hand and soldiers are patrolling the streets. Traffic is at a standstill. Many factories, including those that have reopened since the signing of the armistice have been closed because of the disorders. Gustav Noske, minister of defense, the new "iron man" of Germany, has issued a decree declaring all strikes

PLAN TO PROBE U. S. WAR FILMS

Chairman Believes Committee May Develop Evidence Of a Criminal Nature.

Chairman Graham, of the House committee investigating the War Department, expects to develop evidence which will result in "somebody going to the penitentiary" for fraud in connection with governmental film activities during the war. Mr. Graham said yesterday that he had received information which strongly indicated "criminality" in the preparation and distribution of Government films. The testimony to be taken by the committee next week, he believes, will confirm this information. Motion pictures made by the Government entirely at the Government's expense, Mr. Graham said he was advised, have been and now are being exhibited over the country by private interests, and the money derived from the exhibitions is going into the private exhibitors' pockets, instead of the Treasury. Mr. Graham said he is informed that the Government films in many instances were not legitimately obtained. The system under which this is permitted and the officials responsible for it form two of the "objects of the probe."

HUNS TO RATIFY PACT NEXT WEEK

Blockade Will Be Lifted And Prisoners Returned When Treaty Is O. K'd.

Paris, July 2.—The German national assembly will ratify the peace treaty early next week, and President Ebert will enforce the terms immediately upon ratification. The Big Five were notified of this effect by a communication from the Bauer government today, in reply to the allied note that the blockade must remain in force until the treaty is ratified by the Germans. The Germans in their reply express the hope that simultaneously with the lifting of the blockade the repatriation of the German prisoners of war will begin. It is generally believed this request will be granted. Much optimism was caused in official circles by the German reply, though it was somewhat counteracted by Berlin reports received by the French foreign office that the German communists are openly boasting they will start a revolution in a few days, backed by money from Bela Kun, the Hungarian Soviet chief.

3 FIREMEN INJURED IN NEW YORK "L" FIRE

New York, July 2.—Three firemen were injured in a fire which virtually destroyed the South Ferry Elevated Railway terminal this afternoon. The fire is believed to have been caused by a short circuit on a train which had just been emptied of passengers. Passengers and train crews escaped without injury. In addition to the station, structure about the platform and trestle work was burned. The damage was estimated by an official at \$100,000.

Ecuador to Celebrate Peace and Our July 4th

Ecuador will celebrate the American independence day—July 4—in connection with its peace celebration. The State Department was informed yesterday that the Ecuadorian government will hold exercises at Quito in co-operation with the American legation in celebration both of peace and the American national holiday. Ship Brings NC-4 Back. New York, July 2.—The steamer Aroostook arrived here today bringing the seaplane NC-4, the first aerial craft to cross the ocean.

Red Outbreak May Occur at Any Time, Says Burlingame

Camouflaging their activities under various deceitful guises, ultraradicals are busying themselves singly and collectively throughout the Eastern part of the United States, in a spirit of "suppressed excitement."

This is the pith of observations made by Detective Sergeant Guy Burlingame, who has just returned to Washington after a three weeks' absence during which he visited over two-score cities in his investigation of the radicals. Burlingame admits that he found conditions "very bad."

Starting at Philadelphia, where the hat, which the Washington victim of his own bomb wore was purchased, Burlingame conducted a thorough investigation in every large city in the East and also many small towns in Pennsylvania, New York and Massachusetts. His work each day generally covered from sixteen to eighteen hours. "Meetings are being conducted by the radicals in various places and they are being conducted under whatever name the community in point will stand for," said Burlingame. "The radicals use camouflage in the names under which they meet, sometimes as Socialists, sometimes under other names. "But when you determine the identity of the men who you find you see that they are the same set. Their utterances against the government and their threats are only thinly veiled. I find suppressed excitement in different parts of the country and indications are that trouble may break out at any time." "The investigation of the anarchist plot is a big job. There are many things to be done in order to find out the principals in the plot. A great deal of work has been done in this line but I cannot go into details." Department of Justice agents and police are making preparations to ensure against Fourth of July radical outbreaks. Lieut. last night issued a call for the loan of automobiles by public-spirited citizens for use in patrolling the residential section of the city during the Fourth of July celebration tomorrow. All principal automobile dealers were sent letters last night asking for their co-operation, not only in furnishing the cars themselves, but drivers for them. Lieut. Howard Pisk, U. S. N., will have charge of this patrol, which will assemble at the Fourteenth street entrance of the District Building at 4:30 on the afternoon of the Fourth. Any private individual or auto dealer who will donate cars for this necessary means of protection for their property should immediately telephone Harry Almond, secretary of the Home Defense League, Main 400, branch 25.

Picture of Part Of Heaven Gets Dealers in Bad

"Just a Little Bit of Heaven" landed Solomon Walker, 641 Louisiana avenue northwest, and Isaac Felker, 611 Louisiana avenue in the First precinct charged with theft. Both men are dealers in secondhand furniture and when arrested last night by Detective Sergeants Hughtlett and Connors, are alleged to have had in their possession a picture of St. Peter holding the key to the pearly gates in his hand, which the police say was stolen. The picture is valued at \$300 and is claimed by Mrs. Katherine Young, 1331 Kenyon street northwest, who complained that it was taken from her home by the two men when they called to remove some furniture.

N. Y. ASKS THAW BE EXTRADITED

Wanted for Alleged Attack On Youth in Hotel Several Years Ago. Harrisburg, Pa., July 2.—Papers asking extradition of Harry K. Thaw from Pennsylvania to New York, where he is charged with an assault on Frederick Gump, a Kansas City youth at the Hotel McAlpin several years ago, were received at the office of Gov. William C. Sproul today. The papers come from District Attorney Swann, of New York City, and are signed by Gov. Smith, of New York. No motion will be taken this week, as Gov. Sproul is away. In the meantime Attorney General William I. Schaffer is reviewing the papers in the requisition asked of Gov. Brumbaugh shortly after the Thaw indictment. At that time Attorney General Francis Schunk Brown advised against granting the requisition. Thaw is now confined in a sanitarium near Philadelphia after being judged insane. The New York authorities will be given a hearing before any action is taken.

BORAH ASSAILS FINANCE SCHEME

Says It Is Attempt to Exploit Resources and People of Europe. The international bankers who are planning to finance the nations of Europe count upon the "moral" support of the United States government to help them in their plans. Admission to this effect was made in a statement issued yesterday from the office of Senator Walter E. Edge, of New Jersey, who is fathering a bill to facilitate the bankers' undertaking. Senator Edge himself was in New York conferring with representatives of the financial interests which are back of the proposed legislation. Senator Borah, in a speech in the Senate last Tuesday, designated the plan as an attempt "to exploit the natural resources of the peoples of Europe and reap untold profits." He charged that the bankers who were interested in the measure now in Senator Edge's hands were back of the movement to force ratification of the league of nations covenant in order that the league might enable them to carry out their plans. It is denied in Senator Edge's statement that the scheme proposed by the bankers has anything to do with the league of nations controversy.

NEW ARMY BILL REDUCES AUTOS

Several thousand additional automobiles will have to be disposed of by the War Department if the new army bill, which reduces the regular establishment to 42,000 men, is signed by the President. Practically all surplus motor equipment of the War Department in this country already has been transferred to other government departments. No sales of any cars have as yet been made to the public, however, and it is not intended to sell any unless they are deemed unserviceable for the Federal government. Transfers made thus far have disposed of approximately 30,000 vehicles, including 3,600 motorcycles, 5,300 passenger cars and about 20,000 trucks. The Postoffice Department has received 10,664; the Public Health Service, and the Bureau of Public Roads of the Department of Agriculture, 27,983.

BIG BLIMP 880 MILES ON WAY LAST MIDNIGHT

British Airship May Not End Voyage Before Saturday.

FOG AND WINDS DELAY Speed so Far but Little Better than that of Fast Steamer.

London, July 2.—At midnight last night, the big British dirigible R-34, which started from East Fortune, Scotland, at 1:48 o'clock yesterday morning, reported her position by wireless to the air ministry as 64 north latitude, 24.15 west longitude. This is approximately 880 miles from the starting point and would indicate an average speed of about thirty-five knots an hour. Further tidings of the dirigible was received tonight by the air ministry in an unsigned message bearing the code sign G. R. R. It read: "Had the following from R-34: 'Flying at 2,000 feet. Brilliant sunshine above clouds.' " "Arrive Friday," is message. "We signalled: 'Give us your position.' " "5430 North, 18.20 West," came the answer, followed by "Arrive about Friday morning. Report speaking us." Unless this speed is increased the dirigible will not reach Mineola before 10 a. m. Saturday. It is understood, however, that the fog encountered around noon Wednesday had the effect of greatly reducing the airship's speed. Adverse winds also played their part in holding her back in the first twelve hours and it is expected that Maj. Scott will run the speed up to about forty-five knots as soon as conditions are favorable. The airship has maintained an average altitude of 2,000 feet. This was in accordance with the plans announced by Maj. Scott before leaving East Fortune. Little Faster Than Steamer. Up to now the big air liner has not shown a speed greater in excess of the fast steamships. The Mauretania, in establishing her record of four days, ten hours and forty-one minutes for the Queenstown-New York trip in September, 1916, reeled off an average of twenty-six knots an hour. The pioneer westward flight across the Atlantic also seemingly is being made in a fashion as prosaic as a regular trip of a passenger steamer in peace times. Indeed, during her recent 2,000 mile cruise over the German Baltic coast, the big dirigible

BIG U. S. WARSHIP TO MEET WILSON

All Cabinet Officers May Make Trip to Greet The President.

Led by the Superdreadnought Pennsylvania all of the big ships of the Atlantic fleet at New York will set out to meet President Wilson on his approach to New York on the George Washington. Admiral Henry B. Wilson, commanding the fleet, and Rear Admiral Glennon, commandant at New York, are making the final preparations. Secretary of the Navy Daniels said today that possibly all of the cabinet officers and members of the New York reception committee would be on the Pennsylvania when she steams out of the harbor. It is not yet known how far the fleet with the welcoming party will go. Daniels said if the George Washington were to arrive at an early morning hour the fleet would not go out very far. Secretary Baker said he would be one of the party and Mr. Daniels is to go from Columbus, Ohio, on Saturday to New York. He is to make a speech at Columbus Saturday.
