LATE NEWS BY WIRE. An Anarchist Settlement Raided by Deputy Sheriffs. CAPTURE OF RIOTOUS FOREIGNERS

Dealing Promptly with the Striking Miners. QUIET GENERALLY PREVAILS. MANSFIELD, Pa., Jan. 31.—Twenty deputies, under Chief Lowrey, made a raid on the anarchist settlement in Bower Hill this morning and arrested ten Slavs and Italians. They are regarded as desperate men, and are now in jail. These were the men who wanted to hold a meeting on Monday, raise their flag and declare for dynamite and arms, but only two guns were found.

Another raid under Deputy Haws and his assistants was made during the night and thirty foreigners, suspected of burning the Essen tippie on Saturday, were captured. The men were all armed and several resisted arrest, but no one was injured. They were Russian, Poles and Italians. Quiet prevails throughout the region, but the miners are still under guard.

A large number of Slavs applied for work today and this is looked upon as a guarantee that they have given up the fight and are willing to accept the situation. A meeting to consider the strike will be held by the miners in Mansfield this afternoon. PITTSBURG, Jan. 31.—The reported riot at the Vesuvius iron works of Moorhead Bros. & Co., Sharpshooter, Pa., last night, which was allowed to burn, was not a strike, as phoned to a morning paper at 1:30 o'clock this morning by a correspondent, supposed to be reliable, there was no trouble at the mill and nine furnaces are in operation today.

COLUMBUS, Ohio, Jan. 31.—John McBride, president of the United Mine Workers of America, said today to a reporter of the Evening Dispatch that the direct cause of the rioting was the starvation of the miners held the operators responsible for that condition. Being desperate, the miners destroyed property. Mr. McBride said the Ohio miners are practically closed, and that the Ohio miners would not accept wages below the scale to meet the present situation. He closes by rapping the knuckles of the men who brought the non-union English-speaking miners here, because they were supposed to be more tractable than the native born, or English-speaking workmen, and are now abusing the Huns because they are desperate and account a lack of work at rates necessary to keep them in food.

WRECKED OFF NOVA SCOTIA. A Massachusetts Schooner Driven Ashore in the Gale. HALIFAX, N. S., Jan. 31.—In the heavy gale last night the schooner Gerlie E. Foster of Gloucester, Mass., was driven ashore at Strawberry Point, about four miles below Liverpool, N. S., and will probably prove a total loss. There were sixteen in the crew, five of whom were drowned in trying to reach the shore in their dory. The remaining eleven men were taken off the wreck this morning.

KENTUCKY SENATORS INSTRUCTED. The Legislature Wants Them to Vote Against Peckham. LOUISVILLE Ky., Jan. 31.—The Kentucky legislature today adopted a resolution instructing Senators Blackburn and Lindsay to vote to reject the nomination of Peckham to be associate justice of the Supreme Court.

NOT TO SUCCEED SATOLLI. Archbishop Ireland Gives Reasons for the Incoherence of the Rumor. CHICAGO, Jan. 31.—A dispatch from St. Paul states that Archbishop Ireland says there is no foundation whatever for the rumor that he is to be Satolli's successor. The archbishop commented upon the report as follows: "When Mr. Satolli shall be recalled he will come from Rome. It is decidedly the policy of the pope that no bishop occupying any see in the United States could be the delegate to Rome on the subject of Ireland. The bishop himself—any bishop—may himself have cases to be adjudicated and no one member of the hierarchy is presumed to be a delegate should be absolutely above all bias, personal or local interest in the decisions which should come from the supreme court of the church. His position is positive and final, no matter what reports to the contrary may come."

THE DISCONTENT IN CAMP. Is Believed by Republicans to Be the Main Cause of the Election of Mr. Quigg. The republicans in the House, and republican politicians here, generally, are developing a great deal of dissatisfaction with the election of yesterday of Lemuel E. Quigg in the fourteenth New York congressional district. They recall the fact that at the last congressional election Col. Fellows carried this district by nearly 10,000 majority. The republicans figure that the great change of vote in that district is due largely to the mistake, they claim, in the democratic administration has made since it came into power March 4 last, and further due to the dissatisfaction of the people over the handling of the election.

Admiral Benham's Instructions. It is believed that Admiral Benham will be instructed not to interfere with the combatants at Rio further than may be necessary to protect the rights of American citizens, and to make no further demonstration against the insurgents, except in self-defense, or if it should again become necessary to protect American merchantmen. The object of these instructions, it is said, is to avoid complications that might result from a conflict with either party to the strife.

The surrender of the insurgents to the American admiral, it is said, would be most unwise, because the administration, which is understood to be strongly averse to the acceptance of such a vast responsibility, is anxious to see the admiral's sheltering and caring for several thousand foreign citizens. It is therefore believed that Admiral Benham will be instructed to do his good office in the harbor about as in some other way than by the surrender of the insurgents to the American forces.

DISCUSSING THE BOND ISSUE. An Exceedingly Interesting Debate in the Senate Today. Mr. Allen on the Power to Redeem United States Notes—Mr. Allison and Others Participate. The religious societies appear to be making a systematic fight on whisky and beer and desire to take these articles to such a degree as to make them prohibitory luxuries.

Special Message to the President. NEW YORK, Jan. 31.—The opening of today's stock market recovered fractional ground from last night's closing price, but as usual the demand was irregular. London was irregular, selling United Pacific on rumors of a 25 per cent assessment and buying moderate amounts of Nashville. The patriotism of the local bankers came to the rescue of the new bond issue last evening and in subscribing for \$30,000,000 have secured the success of the entire issue. Traders were inclined to favor a general advance in prices as a result of this announcement, but beyond the slight improvement immediately after the opening there was no important movement.

THE PECKHAM NOMINATION. The Opponents Say That Its Rejection Is Assured. It is asserted with considerable confidence in certain quarters that Wheeler H. Peckham, President Cleveland's latest nominee for associate justice of the Supreme court, will not be confirmed. This assertion is based, it is explained, upon a canvass of the opponents of Peckham in the Senate. It is understood that Senators Hill and Murray and other democrats have not permitted any grass to grow under their feet since Monday, and are now perfectly satisfied, it is claimed, according to inside information, that no protest will be made against Peckham's nomination. They understand full well that there is foundation for the reports that Mr. Cleveland is endeavoring to placate certain democratic Senators who have not been in the mood to vote for him, and that in a few instances, but while he may succeed in a vote those opposed to Peckham's confirmation on the democratic side feel absolutely certain that he will be defeated.
