

DECEASED MR. RODES (Continued from First Page) unless he brought what she needed. A letter from Lexington, July 14, acknowledged the receipt of a letter from him which pleased her very much. He had sent her \$10, and now wanted \$10, which she said, would be the last of the money she would give him. She wanted him to come the next night, not unless he brought the money; he must come so often, as they were going to see her in the morning. She gave him some good advice about being careful of his money, and more so to whom he should lend it.

THE HOUSE. At their request Mr. Catchings (Miss.) and Mr. Baitzhoover (Pa.) were relieved from further service on the Pacific railroad committee. The speaker announced the appointment of Mr. Taylor as a member of the river and harbor committee.

TO DETECT MOONSHINERS. Mr. Henderson (N. C.) opposed the proposition to appropriate \$200,000 for the detection and punishment of violators of the internal revenue laws. The appropriation was to be used principally in North Carolina to bribe informers, and there was no justification for it.

TO CONVEY THE GUESTS. The United States ship Dolphin and the tug Triton and possibly the torpedo boat Duging, all of which are at the navy yard, will be used for the conveyance of the guests to and from Indian Head. The guests will leave the navy yard promptly at 6 o'clock tomorrow morning and will return about 4 o'clock. Luncheon will be served on board the Dolphin, and the steamer Band will sail on the occasion.

ONE OF THE TESTS. One of the tests of the huge gun will consist of firing the projectile into a great bank of earth battered down to receive the flying missile. The course of the shell will be through a number of stations, and will warn the passing ships and boats and will signal the operators at the gun when to fire the weapon. Officers will be placed at the stations with instruments to record the course of the projectile. The firing over the range is not for the purpose of securing the distance which the 1,100-pound shell capable of traveling 10 miles in the air will travel.

THE BLIND BILL. The seigniorage bill was one of the principal items of consideration at today's cabinet meeting. It was understood that the bill will be again considered by the cabinet. The bill was submitted to the president yesterday afternoon and he will have it up to the 25th. It is expected that the bill will be passed by the president.

CONFIDENCE HAS BEEN SHAKEN. The sugar schedule as prepared by the committee is known to contain the color and certain other modifications in the interest of refining, but for speculative purposes the price of the stock was depressed 1-4 per cent. The desire to accumulate some cheap stock to cover up their triumph under the new tariff is the reason for the color and the modifications in the schedule.
