WASHINGTON, D. C., SATURDAY, JANUARY 12, 1895—TWENTY PAGES.

Printers' Ink, the fifth schoolmaster of advertising, says: "It is claimed for the Washington Star, and probably truthfully claimed, that no other newspaper in the country goes into so large a percentage of all the houses within a radius of twenty miles from the office of publication."

All of the Pure Food Show Prize Loaves of Bread Were Made of Ceres Flour.

Mrs. H. N. Rose, 1st prize, used "Ceres."
Mrs. A. J. McCurdy, 2d prize, used "Ceres."
Mrs. R. Rivers, 3d prize, used "Ceres."

Mrs. Ball, honorable mention, used "Ceres."
Mrs. W. W. Hough, honorable mention, used "Ceres."
Miss Emily Gaines, honorable mention, used "Ceres."

WE APPEND HER LETTER:
Dear Sir: I received the second prize (\$20) at the Pure Food Exposition Bread contest at Corcoran Hall in November for making the second best loaf of bread. I used "CERES FLOUR," and in my humble judgment there is no flour superior to it. A. J. MCGURDY, 650 12th st. n.e.

Dear Sir: I wish to say that I used "CERES FLOUR" for my bread. I have used it for several years have tried other brands, but have found none to equal the "CERES." I always recommend it to my friends as being the best in use. Very respectfully, REBECCA RIVERS, 1632 R. I. ave. n.w.

THE NATIONAL GUARD

Arrangements for the Fifth Battalion Prize Drills Under Way.

THE MEMPHIS INTERSTATE CONTEST

New Brigade Army Not Ready for Occupancy.

AN ALL-NIGHT GUARD

An inspection of the new building to be used as an armory for the troops of the District of Columbia National Guard clearly shows that the home will not be ready for occupancy for a little while. A large amount of carpentering remains to be completed. The rifle gallery, however, is almost in condition to be used and the guardsmen will be able, when once settled, to make up back work in that line in a hurry.

It is now certain that when the removal occurs the brigade will not march from the old armory to the new building in a body. Boxes, probably, will be provided in the new building, and many of the men will be transported without being disarmed to any considerable extent.

Arrangements are under consideration for an opening reception at the new armory, to which officers of army and other prominent officials and citizens will be invited.

The Memphis Interstate Drill.

The proposed interstate drill and encampment at Memphis next June continues to boom. The latest in regard to it, according to a special correspondent of The Star, is that Colonel R. B. Snowden, who is considered the wealthiest man in Memphis, has agreed to guarantee the necessary amount of money to cover prizes, provided there is a reasonable chance of the enterprise proving a success. Colonel I. P. Peters is at present in communication with the committees having control of the drills held in Indianapolis, Omaha, Kansas City and Little Rock, seeking information in regard to such affairs. The management of the Memphis drill, it is thought, will be vested in Colonel Peters. General Keller Anderson, the secretary, has received an appointment to a government office and has undoubtedly severed all connection with the drill committee.

An All-Night Guard Suggested.

The suggestion in The Star last week that after the brigade takes possession of the new armory a guard be established each evening at the main entrance has met with general approval among the officers most concerned in the welfare of the regiment and its organized defenders. A prominent officer of the second regiment asks would it not be an excellent scheme to have an all-night guard. A room fitted with sleeping accommodations, he says, could be provided as a guard house and sentries posted on the first, second and third floors of the structure. This plan would give the men desirable experience. When in camp, this officer states, a great amount of time is devoted to instructing the men in what they should become familiar with in the armory, and the plan in question would prove a great saver of time and money. It would be made use of to continue during the evening men guilty of breach of discipline in the company rooms or while on drill.

Fifth Battalion Competitive Drills.

The chief topic of interest at present in the fifth battalion is the first annual company competitive drill, to be held on February 15th. The drill will be held in the drill room of the armory and will be held several times each week in preparation for the contest, and the rivalry is intense. Capt. Charles S. Damer of company C, second battalion, will act as chairman of the board of judges for the competition. His associates being Capt. W. E. Horton of the brigade staff and Harry Walsh of company A, fourth battalion.

Major Sues has prepared a number of stipulations to govern the drill. Full dress uniform will be worn, and the men will stand at attention, white gloves and black shoes. Enamel or patent leather footwear will not be allowed. The trousers and coats must fit well and the hair cut in a neat, trim style. Rifles with barrels brushed and stocks varnished or lacquered will not be permitted to be used. It is also a good authority that any rifle has been cleaned by a person other than the soldier to whom it was being regularly cleaned will be deducted from the marking of the company.

The interpretations of the United States Drill Regulations, as published by Lieut. John W. French, U. S. A., of the tactical board, will be the authority in case of dispute.

The company must comprise at least twenty-nine enlisted men and every commissioned officer in its ranks. In case there are but two commissioned officers in a company the sergeant will be permitted to command the second platoon. For each additional enlisted man one credit will be allowed.

The program will be handed to the commanding officers twenty-four hours before the time announced for beginning the drill. The program will be as follows: Drill, 500 arms; 10 accoutrements; 10 set up; 10 gloves; 10 collars; 10 coats; 10 trousers; 10 hats; 10 bayonets; 10 bayonet practice; 10 Total, 100. The decision of the judges will be announced shortly after the conclusion of the contest. The prize is a handsome cup of bronze and gold, which is now on exhibition in the show window of the store of a Pennsylvania avenue jeweler.

The company competition will be followed by an individual competitive drill, open to all enlisted men in the battalion. The squad is to be under command of the captain of the winning company in the preceding contest, while the same judges will serve. The prize is a gold medal.

The Clay of the second regiment has been invited to present the trophies to the winners. The contests will take place either in the Drill Room of the armory or in the Convention Hall, and the presence of the public is desired.

Advantages of the Magazine Pistol.

Several inventors are reported to be struggling with the problem of magazine pistols, says the United Service. The advantages of such an arm are great and obvious. So long as the powder chamber or cylinder and the barrel are separate the revolver cannot lay claim to the title of an arm of precision of high power. The break in the arm where cylinder or barrel meet, or are supposed to meet, permits a considerable escape of gas, with a resulting loss of pressure and consequent reduction of velocity. Any attempt to increase the velocity by the use of longer and more powerful ammunition adds unduly to the length and weight of the arm without equivalent gain, for the higher and longer sustained the powder pressure the greater the escape of gas. Moreover, the present ammunition gives quite recoil enough. The defects of the present arm are inseparable from the fundamental principles of its construction, and it is a recognition of this fact that has led to the present investigation of the magazine pistol.

The leave of absence granted Lieut. Col. Daniel W. Benham, seventh infantry, is extended two months on account of sickness.

REAL ESTATE GOSSIP

The Reason Given for the Inadequacy of the Water Supply.

THE NEEDS OF THE SUBURBS

Revision of the Realty Assessment Just Completed.

SOME IMPROVEMENTS

One of the reasons assigned for the inadequacy of the city water supply is the large increase in the number of mains. Water mains are being laid in all directions throughout the city is constantly going on, either for the purpose of furnishing water facilities in places where they have not existed before or to replace small pipes with those of larger diameter, in order to meet the needs of an increased population, it is not the extension of the water system in the city that is looked upon as the main reason why the supply of water is less than the demand. It is stated by the officials of the District that recently there has been quite an extension of the water mains beyond the bounds of the city and throughout the suburbs.

In some sections they have been laid for miles and miles, and while it is not claimed that the population has extended throughout the entire region, still there has been such an increase in the number of residents that the introduction of the water pipes into the suburbs, mainly at private expense. The size of the pipes that are laid, it is said, is determined rather by the demand of the future than of the present, and as it is nearly as cheap to put down a large pipe as a small one, it was thought wise to lay a pipe of ample provision.

However, the pipes are laid down and the water must run through them. Each additional new water pipe that is laid opens up a larger area, and in consequence the quantity, as well as the pressure throughout the city, is considerably lessened.

Appeals to Civic Pride.

While it is inconvenient as well as unpleasant for citizens to be unable to have water throughout their houses as they have been accustomed to, still such an explanation of the deficiency is an appeal to civic pride, which, perhaps, would in many cases reconcile the citizens with the progress that is being made in the necessary realization of the greater Washington which is in the near future.

However, the city can continue to grow and the water supply system can be improved without citizens being deprived of such a necessity as water. Collected funds have suggested a more cheap method of increasing the water supply by raising the dam at Great Falls, and Congress has thought so well of it that benefit was made for February 22, in National Rifles' Armory. Efforts are being made to secure the best talent in the city to add interest to the occasion.

Notes.

The first battalion continues to move rapidly to the front, so far as membership is concerned. Every company of the organization has passed low-water mark, forty, and it is said that company D has at least seventy-five men on its rolls. The battalion is making elaborate preparations for a smoky, to be held on the armory on the evening of January 30.

Company C, second battalion, at its regular monthly meeting on Tuesday last decided to hold the annual full dress ball of the organization on the evening of February 7, in National Rifles' armory.

At the next meeting of the officers' school of the fifth battalion, to be held on January 21, Major Sues will lecture on the company and battalion in extended order, and the duties of company commanders and platoon and section chiefs.

The President has accepted the resignation of Capt. Fabian Columbus, company B, fifth battalion, and of First Lieut. John T. Eiker of troop A.

An examination of candidates for warrant as non-commissioned officers in battery A, light artillery, will be held on the 15th instant. Lieut. Griffiths is to conduct the examination.

An election has been ordered for Thursday, January 17, to fill a vacant second lieutenantcy in company B, third battalion.

It is probable that the second regiment will be ordered out for drill and instruction on February 22.

THE STANDARD BOOK STORE,

314 Ninth Street.

ART NOTES.

Mr. Joseph Jefferson, the distinguished actor, during his present stay here presented to the Corcoran Gallery a landscape, executed in oils, by himself. The subject is an interior wood scene, with a very pleasing effect of sky and clouds, seen through the branches of a group of massive old trees.

At the last fall exhibition of the New York Academy of Design, which closed recently, twenty-four pictures were sold together, producing \$5,000. This is much better than the corresponding exhibition last year, when only fourteen pictures were sold, for an aggregate of \$2,500. The highest price realized by any one canvas this season was \$800, which was paid for "The First Snow," by Dubois F. Hasbrouck.

A notable addition has been made to the fine group of portraits in the east hall of the Corcoran Gallery by the placing there this week of a likeness by Elliott, painted many years ago, of the late James C. McChesney, Esq., who was the first opening up to the time of his death one of the trustees of the Gallery. By many persons this portrait is considered quite equal to the splendid likeness of Col. McKinney by the same artist, and by some it is admired even more. Where a copy is now drawn from this circumstance may be drawn from the fact that the artist, by competent expert authority, the painting is returnable within one year from the date of the price paid, plus interest at the rate of six per cent.

The special attraction at the Fischer art gallery this week is an exhibition of drawings by Childs Hassam, president of the New York Water Color Club. The collection includes some fifty numbers, and covers a wide range of subjects, treated in what may be termed the artist's later style. The collection is well drawn and held by his brother artists is sufficiently indicated by his official position, but as yet few of the drawings are marked sold.

Gerome, the distinguished French painter, whose works are so well and favorably known in this country, and who is now seventy years old, has given up painting,

UNIVERSITY NOTES.

Columbian University.

The Columbian women will hold their monthly meeting on Monday next. They will be addressed by Professor Langdon on "Higher Education." The professor is about to introduce a university extension course in the university.

At the residence of Miss Maguire a pleasant tea was recently given by the Columbian Alpha Chapter of the Pi Beta Phi to introduce the initiates to the alumni members of the fraternity.

Catholic University.

Rev. Father Grace, recently ordained in St. Mary's Seminary, Baltimore, has entered the University of the Holy Cross, Chicago, and Rev. Father Ringold, one of last year's students, has returned to resume his studies.

The first issue of the University Bulletin will be out in a few days.

Georgetown University.

The Debating Society met in regular session last evening evening. Henry B. Beck was elected president, D. Morgan, vice president, and Joseph P. Burg, secretary. The committee appointed to confer with a committee from Columbian University with a view to arranging for the joint debate made a report, which was chiefly one of progress, because they had not the authority to make final arrangements. Thus far it seems decided that there will be a series of three debates, one on the 13th of March, in the Metropolitan Methodist Church, being introduced by Mr. Justice Brewer of the United States Supreme Court, and speaking on "The Bible and Modern Discovery." The next lecture in the course will be delivered on the 20th of February by the Rev. Dr. Hamlin of the Church of the Covenant in Calvary Baptist Church on the theme, "The Bible a Finality," the introduction being by Representative William M. Springer of Illinois. The Rev. Dr. J. J. Muir will deliver the next lecture on "The Bible and Modern Discovery." The course will be continued by Mr. Justice Brewer of the United States Supreme Court, and speaking on "The Bible and Modern Discovery." The course will be continued by Mr. Justice Brewer of the United States Supreme Court, and speaking on "The Bible and Modern Discovery."

Against Cobble Stones.

The Commissioners have recommended a substitute for Senate resolution 79, entitled "Joint resolution to require street railway companies in the District of Columbia to pave and repair pavements with asphalt, brick or granite blocks," which was referred to them for examination and report. The substitute states no cobble stones shall be used in paving the space between the rails and tracks of street railways upon any paved streets; and whenever a street is paved, repaired or resurfaced, or the track relaid, cobble stones shall be removed and replaced with such form of block or street pavement as the Commissioners may deem advisable.

Gould and a London Theater.

George Gould when seen in reference to the cablegram from Europe stating that a member of his family was trying to lease a London theater for the presentation of a play, denied the report, so far as his family was concerned.

"Our family is not going into the theatrical business," said he.
