J. J. STORROW DEAD.

He Expired Suddenly in the New Congressional Library Building.

The Foremost Authority on Patent Law, and the Counsel of the Venezuelan Government.

James J. Storrow of Boston, chief counsel for the Venezuelan government to conduct the arbitration negotiations pending between that country and Great Britain, and for many years chief counsel of the Bell Telephone Company, and the foremost authority in the world on telephone patent laws, dropped dead yesterday afternoon in the new Congressional Library.

Mr. Storrow came south two weeks ago, accompanied by his wife and daughter, going to Old Point Comfort for rest and recreation. While at Old Point he spent considerable time in preparing his case in the telephone arbitration matter, and came to Washington on several occasions to consult law books. Yesterday morning he came here to keep an appointment with Senator Andrade, the Venezuelan minister.

He was apparently in perfect health, in fact, much better than he had been for a long time. He expressed himself as having enjoyed his visit to Old Point Comfort and benefited by it. He intended to return there on the night boat. After breakfast he had a conference with the Venezuelan minister at the State Department, and during the afternoon he called on Justice Brewer, the president of the Venezuelan boundary commission, and later, with Mr. Malet Prevost, the former secretary of the Venezuelan commission, and Mr. Marcus Baker of the geological survey, visited the new Congressional Library.

Mr. Storrow and his friends spent some time in admiring the building of the library building, and when they were preparing to leave Mr. Storrow complained of feeling ill. He was very dizzy, and fell into a chair. His companions summoned the captain of the watch, and Mr. Storrow was placed on a sofa, and every effort made to revive him. He died at 1:30 p.m.

It is believed that death was caused by heart disease. The remains were taken to the home of Gardner G. Hubbard, 1328 Connecticut avenue. Mrs. Storrow was communicated with by telegraph, and she was relieved from her, stating that she would arrive here at 3:30 o'clock, and desired to have the remains leave for New York on the 10 o'clock train. Mr. Storrow's son, J. Storrow of Boston, will arrive here at 2:30 o'clock. The remains will be taken to arrangements for which have yet been made.

No one has ever disputed the credit given to Mr. Storrow of being the greatest authority on telephone patents in the world. He had long been the chief counsel of the Bell Telephone Company, and had taken the enormous amount of litigation that has taken place in all the courts of the country in relation to the patents of that company.

Mr. Storrow made a trip to Venezuela last year ago, his health not being good at that time. The result of this trip was that when the Venezuelan government came to select some one as its counsel it immediately applied to Mr. Storrow. As the representative of the Venezuelan government he took an active part in drafting the treaty which was signed by Secretary Olney and the British ambassador, and later he went to Caracas with the Venezuelan minister, and secured the acceptance of the protocol by that government.

Mr. Storrow was about sixty years of age. Hard work had made inroads upon his health, but he was much better than for a long time. Only a week from last Monday he filed a long and active part in the case of the States, and since that time he has worked laboriously on the Venezuelan case.

A report was made to the police yesterday that Mr. Nathan Barber of Cambridge, Ohio, had been robbed of his gold watch and chain. Just where the alleged robbery was committed, or under what circumstances, the police did not learn. But the keepers of pawnshops were told of the alleged robbery, and today the police were presented to one of the several "unlabeled" with a request for a loan. The pawnbroker touched the button, and Precinct Detective Sutton of the first precinct responded.

"I got them from a man across the avenue," the man said, and he escorted the detective over to where he had left the one wanted. He later studied the case of Mr. W. Wright, which his wife had reported to the police, and he escorted the detective over to where he had left the one wanted. He later studied the case of Mr. W. Wright, which his wife had reported to the police, and he escorted the detective over to where he had left the one wanted.

Harris & Shafer's Opening Tomorrow. Harris & Shafer, jewelers, 1113 Pa. ave., announce the opening tomorrow of the very latest styles of ladies' belts, parasols, umbrellas, pocket books and card cases. In inspection is invited. Prices remarkably low.—Advertisement.

Thefts Reported. All the bicycle thieves are not yet in custody, for two such thefts were reported to the police yesterday. E. W. Taylor of 1263 Roanoke street was one of the victims. His Tribune bicycle, No. 12,724, having been stolen from in front of the Ebbitt House Monday afternoon. The other person to lose a wheel was Mr. Thomas Williamson. His Suburban wheel, No. 1,263, was taken from in front of the Southern railroad office last night.

Miss Cora Ireland complained this morning that a vacant house, No. 723 13th street, had been robbed of its lead pipe and hot tub lining since Sunday. Miss Cora Ireland complains of the theft of \$30. The money was stolen from her house, No. 1263 Rhode Island avenue. J. P. Sullivan reports the larceny of a coat and vest.

Easter Hives, plants and blossoms. Gude's, 1224 F.—Advt.

If your child looks upon Scott's Emulsion as Cod-liver Oil and is repelled by it, begin with part of a teaspoonful in twice the quantity of water, and it will take it and relish it as though it were milk. There is no food or medicine for children of from three or four to ten or twelve years that is so good as Scott's Emulsion.

Thorough tests by chemists prove that it actually possesses the virtues attributed to it. Send for pamphlet giving fuller details. At druggists.

SECOND GAME FORFEITED.

The Eastern Girls Win in the Basket Ball Championship.

Because of the failure of the Central High School team to put in an appearance at the Carroll Institute gymnasium at 3:30 yesterday afternoon, the hour set for the second game to determine the champion high school girls' team of basket ball, Umber Joyce gave the game to the Eastern School team. The first game was won by the Eastern School girls last Saturday morning by a score of 6 to 4, and the second and deciding game going to them by default they, therefore, hold the championship.

It had been generally believed that because of the reported indisposition of Miss Kate Tyndall, the captain of the Central High School team, the second game would be postponed until tomorrow morning. But when Miss George Forbes, the captain of the Eastern School team, arrived at the gymnasium yesterday afternoon, she informed Prof. Joyce that she had no objection to the postponement, and as she insisted that the game should be called, as previously arranged, Prof. Joyce was forced to declare the game forfeited to the Eastern team because of the non-appearance of their opponents, and to award the championship to the Eastern girls.

As some engineers are able to handle their engines to better advantage than others, this system is calculated to insure the best results in this direction. It also establishes a new standard to which all engineers are required to measure their work, and enables the accumulation of data which will be of value in improving grades and roadbeds. At present, trains are being loaded up to the maximum, and the highest efficiency will, it is stated, insure the best results in this direction.

The system has been in operation on the lines west of the Ohio river for about six months, and General Superintendent Grant has reports that it has worked to great advantage from the standpoint of economy and efficiency. Since its recent adoption by the Eastern School, it has worked to the advantage of the Eastern School, and it is said that a gain of from two to six cars per train has been secured.

THE TONNAGE SYSTEM.

A New Plan of Handling Freight on the Baltimore and Ohio Lines.

A meeting of the division superintendents of the Baltimore and Ohio railroad east of the Ohio river was held Tuesday at Camden station to arrange for the adoption of the tonnage system for the handling of freight.

Under an order issued by General Manager Green this system will go into effect May 1. Its object is to secure the hauling of a maximum amount of freight according to certain fixed rules. These were discussed at the meeting and are designed to show what each engine under normal conditions of track and handling can haul. This is ascertained by tests made on which heaviest grades of the division on which they run.

A unit of weight is provided, which amounts to six and a half tons, and the performance of the engine on the record, it is known what can be accomplished. Each car is marked when loaded and the weight of the load, as well as the car, is shown in this mark. Such marks indicate the number of cars to be placed in a train to be hauled by the engine selected for service.

As some engineers are able to handle their engines to better advantage than others, this system is calculated to insure the best results in this direction. It also establishes a new standard to which all engineers are required to measure their work, and enables the accumulation of data which will be of value in improving grades and roadbeds. At present, trains are being loaded up to the maximum, and the highest efficiency will, it is stated, insure the best results in this direction.

The system has been in operation on the lines west of the Ohio river for about six months, and General Superintendent Grant has reports that it has worked to great advantage from the standpoint of economy and efficiency. Since its recent adoption by the Eastern School, it has worked to the advantage of the Eastern School, and it is said that a gain of from two to six cars per train has been secured.

As some engineers are able to handle their engines to better advantage than others, this system is calculated to insure the best results in this direction. It also establishes a new standard to which all engineers are required to measure their work, and enables the accumulation of data which will be of value in improving grades and roadbeds. At present, trains are being loaded up to the maximum, and the highest efficiency will, it is stated, insure the best results in this direction.
