

It Kills the Germs

WHICH CAUSE DISEASE.

Catarrh, Consumption, Bronchitis and Pneumonia Are Germ Diseases.

THIS ALL MEDICAL MEN ADMIT.

Through the Air We Breathe, is the Only Way by Which these Diseases Can Be Reached.

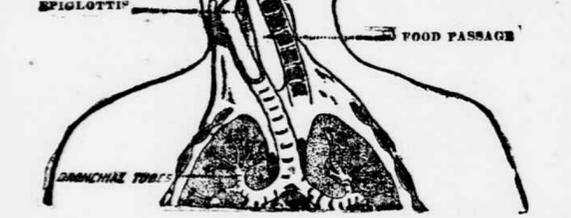

NO PHYSICIAN WILL DENY IT.

There is but One Germicide that Can be Inhaled, No Other Has Yet Been Found.

THESE ARE FACTS.

How, then, Can You Expect to Cure these Diseases In Any Other Way?

THIS LITTLE VALVE Has for Hundreds of Years Prevented the Cure of All Diseases of the Air Passages.

It is now acknowledged by all medical men that this little valve, called the epiglottis, has effectively prevented the cure of consumption and all deep-seated diseases of the respiratory organs for hundreds of years. It is due to its presence at the entrance of the windpipe that all liquid medicines, no matter in what form they are administered or how minutely divided by sprays or atomizers, are prevented from entering the bronchial tubes or lungs, yet, if it were not for this little valve, liquids and food would enter these passages and cause instant strangulation and death. The epiglottis is always open to permit the passage of air to the lungs, but so constructed that the slightest contraction of the throat causes it to close over the opening to the windpipe, and prevent the least drop of moisture from entering the passages which lead to the lungs. Try to breathe and swallow at the same time and you will see how perfectly this little valve does its work. Is it a wonder, then, that the number of persons afflicted with Catarrh, Bronchitis and Consumption have steadily increased every year, and that the medical profession should have become so much interested in the discovery of a germicide, the first ever found, that can be carried to all parts of the head, throat and lungs in the air you breathe? No other treatment or medicine has ever created such a profound interest among the doctors, and this interest is being increased hourly by the wonderful recoveries made under their own eyes. Not alone among the medical profession in this been felt, but hundreds of thousands of men and women throughout the United States, through free treatments given, and influenced by the knowledge that their money would be returned in case of failure, have tested this new remedy, been cured, and are today recommending "HYOMEI" to all their friends and acquaintances. There has been for months "NO DOUBT" whatever in the minds of medical men as to the efficacy of "HYOMEI" in the treatment of Asthma, Coughs, Colds, Catarrh, Catarrhal Deafness, Bronchitis and Consumption, and fathers and mothers who are acquainted with the honest method used by the R. T. Booth Company in introducing "HYOMEI" are not doing right by themselves, or their families, if they do not test this new treatment, which costs nothing if it fails to give relief, and can be tested free in all large cities.

"HYOMEI" CURES BY INHALATION.

It is Nature's own remedy, given through the air you breathe. There is no danger, no risk. Your money is refunded if it fails to relieve. "HYOMEI" Inhaler Outfit, \$1.00. Extra Bottles "Hyomei," 50c. "Hyomei" has a wonderful healing power. Can be obtained of your druggist, AT OFFICE, OR BY MAIL. Pamphlets, consultation and advice, free. Send for the story of "Hyomei." Mailed free.

Where Iron was First Made in U. S. To the Editor of The Evening Star:

The person who wrote the article published in The Star of the 23d instant in reference to the sale of the famous Warwick farm in Pennsylvania, in which he says "on this property the old Warwick furnace, probably the first to make iron in the United States, was put into blast about the year 1730," is nearly 100 years out of the way.

Iron works were first built at Falling Creek, in Virginia, in 1619-21, and Beverly Steel, over 8,000,000 tons, and Schwanck in his history of "Iron in All Ages" says that "for a hundred years after its settlement in 1620 Massachusetts furnished 40 per cent of the iron manufacture of this continent."

By an act of parliament in 1750 the manufacture in the colonies of all forms of steel and iron except cast iron was prohibited, the object being to compel the colonists to ship their pig iron to England, where it was manufactured, and such of the articles as were needed were returned to the colonies. It was then that Lord Chatham said: "I would not permit the colonists to make even a hob nail for themselves."

What a comment on that is the present condition of the iron and steel business in the United States and England. In 1878 Great Britain produced 49 per cent of the world's supply of pig iron, and the United States only about 15 per cent. In 1887 the United States furnished 29.30 per cent of the world's supply of pig iron, and 34.58 per cent of the steel, the amounts being: 11,773,934 tons, a total of near 20,000,000 tons. In 1898 it was still more, and the present year will far exceed all previous years. The United States is the iron master of the world.

W. C. DODGE, November 24, 1899.

WAR SPIRIT WAXING

Revolt Against Jingoism in Conservative English Press.

GOSSIP REGARDING GEN. KITCHENER

Rumor That He Wanted the Command in South Africa.

JOCKEY REIFT AT SCHOOL

(Copyright, 1899, the Associated Press.)

LONDON, November 25.—Among the serious-minded, conservative English people there is a growing feeling of disgust at the spread of the nauseating namby-pambyism which finds an excuse in the war. The hysterical outbreak which has ensued since "Tommy Atkins" and his officer became a full-blown society craze has already been the subject of satirical articles in the better class of British publications, and now all signs point to a reaction from that unreasoning enthusiasm which is responsible for so many undignified antics. Never were the old English army officers so agitated as when they read of the queen's decision to send a box of chocolates to each man in the field as a Christmas present. Compared with her simple speeches at her farewell to the troops, this announcement appeared as a sudden descent from the sublime to the ridiculous. On top of this came the heroic accounts of Correspondent Churchill fighting battles and commanding troops, and regular officers being contrasted with the alleged action of the French and Germans, who, it is claimed, during the war of 1870 shot all non-combatants found carrying arms.

Plum Puddings and War.

While the big West End caterers are busy shipping hundreds of cases of champagne and pate de foie gras to the regimental messes in South Africa, society women are working feverishly, making plum puddings for thesefortunates. Many of the puddings contain costly jewelry, the pins, rings and other ornaments from adorning womankind. Lady Colin Campbell has made no fewer than 100 plum puddings for the Dublin Fusiliers, and several puddings have been sent to Winston Churchill, who is in Pretoria. Though the majority of such efforts are doubtless prompted by genuine patriotic motives, they are contrasted with the alleged action of the French and Germans, who, it is claimed, during the war of 1870 shot all non-combatants found carrying arms.

Princess of Wales' Enterprise.

On the other hand, the hospital ship Princess of Wales, fitted up at the instigation of and with the personal supervision of the member of the royal family after whom she was named, was done quietly, and is now ready to sail. A great part of the cost was borne by the princess' own pocket, but its complete control is given to the army medical department.

Princess of Wales' Enterprise.

"Mainly About People" is authority for the statement that Gen. Kitchener, before leaving England recently, made a strenuous attempt to induce the supreme commander in South Africa, but was refused on account of his junior rank and lack of knowledge of the details of the war. The chief seat of the articles as were needed were returned to the colonies. It was then that Lord Chatham said: "I would not permit the colonists to make even a hob nail for themselves."

CASE OF ALLEGED FORGERY

Treasury Department Clerk Arrested for Imposing on a Bank.

Institution Said to Have Fraudulently Notes of His Amount of \$1,200.

Middleton Smith, aged fifty-five years, employed as a clerk in the Treasury Department, and living at No. 1616 10th street northwest, was arrested shortly before noon today by Detective Sam Browne of the ninth precinct and locked up in the first precinct station to answer the charge of obtaining several hundred dollars from the Riggs National Bank of this city in an unlawful manner. The exact amount obtained by the defendant is not yet known. The case will probably be heard in the Police Court Monday.

It is alleged that the accused man has been getting notes discounted at the bank for a number of months past, on each of which, except the first, the initials of Mr. James M. Johnson, the vice president of the bank, by means of a forged note, he admitted that he had been getting money from the bank by means of forged notes for upward of two years, and that he used this means to recoup his losses caused by unfortunate speculations and by indulging in the same means to recoup their obligations when they became due.

A little more than two years ago, so it is alleged, Mr. J. M. Johnson, who, as above stated, is the vice president of the bank, victimized, placed his initials as an endorsement on a note of Smith's for a small amount, thus enabling him to get the money upon the note, which was not paid at maturity, and Mr. Johnson, it is understood, informed Smith that further favors could not be extended to him.

Instead of regarding this warning, Smith, it is alleged, a few days later drew up another note, and on the same day he forged the name of Beverly H. Jackson as the signer, and also forged the initials "J. M. J." upon it as an indorsement and obtained the money upon it, which he used in the same way as the Smith took it up, and in a day or two more submitted a note for a larger amount signed and indorsed in the same manner as the first note, and on the same day Smith is charged with pursuing until the bank now holds, it is said, about \$1,200 worth of the forged paper.

Officials Become Suspectious.

Wednesday last the bank officials suspected that Smith was not acting honestly with them, and they reported the matter to Maj. Sylvester, superintendent of police, and Chief Inspector Boardman, and Detective Browne was detailed to capture Smith. By some means it was learned a couple of days ago that he would probably ask that the money be returned to him, and Detective Browne went to the bank soon after it was opened for business this morning, and awaited developments.

About 11:20 o'clock Smith walked into the bank and handed in a note amounting to \$75 for discount, and asked that he be given \$25 as a partial payment on the note. The prisoner was escorted into the office of Mr. C. C. Glover, president of the bank, and Vice President Johnson, Thomas Hyde, the note clerk, Mr. Norman Bestor and Detective Browne, Smith, it is said, gave \$25 to the latter, and took the rest of the money. He also, it is said, wrote a long letter to his wife telling her what he had been doing.

To Float Securities.

Most Local Capitalists Prefer Home to Overseas Investments.

Bankers and others who control large sums of money frequently receive visits from representatives of interests in other cities who desire to place here blocks of bonds or other securities of enterprises located in their respective towns. It is evidently thought the opportunities here are excellent, and hence efforts are being constantly made to secure the market. It is believed by some that applications of this sort are numerous since the opening of the past year, which have to a certain extent brought Washington prominently into notice in the financial world, on the theory that as the holders of such large blocks of street railroad and other local securities have done well for themselves, they are desirous of the opportunity of directing a portion of the cash into particular directions was especially good.

ART SPECIMENS.

Exhibit of Drawings in Color and Black and White.

Arrangements have been made for an exhibit in drawings in color and black and white in the rooms of the All Baba Club west from Tuesday until Saturday night. The display will include studies in pastel, water-color, charcoal, colored chalk, pencil and oil, and is intended to represent the serious work of the club members since the organization of All Baba last April. Nothing is to be hung which has not been done under club influences and as a result of club activity.

UP ON CHARGES.

Two Policemen Arraigned Before Trial Officer Pugh.

Policemen Dean of the first precinct and Browne of the ninth were today before Trial Officer Pugh on charges. It was alleged by Sergeant Robertson that he met Dean coming out of a saloon for some time before midday, and that the officer had been drinking. He was taken to the place after a toddy, which he obtained. This was denied by Mr. Dean, and the further hearing of the case was postponed until Monday, to allow the production of another witness.

Looking After British Prisoners.

Mr. Macrum, the United States consul at Pretoria, has been instructed by cable to impress upon President Kruger that in the view of this government the usages of all civilized nations sanction the ministry of a neutral representative in the interest of the citizens and captives of one of the parties to the war, and he must further insist upon performing the sacred duties imposed by all considerations of humanity. This is practically an announcement of the insistence of our government upon the execution of the trust it assumed to look after the interests of British citizens in the South African Republics.

TRADE WITH RUSSIA

Talk of Making a Reciprocity Agreement.

STATEMENT OF COUNT MOURAVIEFF

Preparing Arguments for the Senate.

TREATIES TO BE RATIFIED

Relative to the statement attributed to the President, it is understood that Count Mouravieff, the Russian minister of foreign affairs, that the propriety of remodeling the trade treaty of 1832 between the United States and Russia was now under consideration, it is learned that about two months ago a movement to that effect was initiated by the Russian embassy here. The success of the French government in negotiating a reciprocity treaty was probably the incentive to the Russian government to follow the example of that government. From the number and scope of the reciprocity agreements and special treaties which have been drawn up under the terms of the Dingley tariff act, besides those which are nearing the point of conclusion under the broad constitutional powers of the President, it is not possible to omit from the list of privileged nations would be at a great disadvantage in continuing its trade with the United States.

Germany After Reciprocity.

That fact first dawned upon the German government, and it has been struggling, though so far without success, to obtain a reciprocity treaty, the obstacle being the uncompromising attitude of the agrarian interests against the United States meat and provision trade, though that promises to be modified by the recasting in the near future.

The Treaty With France.

The indications of rather formidable opposition to the approval by the Senate of the French reciprocity treaty have given considerable concern to the officials of the State Department, who have had much to do with its negotiation. That treaty was perfected with the greatest difficulty, and was in itself the means of restoring the good will and cordiality between the United States and France, which had undergone a severe strain during the last year. Its failure now, it is said at the State Department, would be most unfortunate, and the department is prepared to show to the Senate the many advantages from a purely economic point of view that could be expected, having regard to fair treatment of France.

ALASKAN MILITARY ROAD.

It Has Been Completed From the Coast Range to Copper River Valley.

The War Department has received an interesting report from Capt. W. R. Abercrombie, commanding the Copper river exploring expedition. Capt. Abercrombie's report bears date of October 2, 1899, and was written at Fort Valdez. He reports progress in the construction of the trans-Alaskan military road, with which he has been so prominently identified since its inception.

IMPORTANT CAPTURE.

Alleged Counterfeiters of Canadian Money Arrested.

Chief Wikkie of the secret service has received information of the arrest of W. L. Davis and wife at Guthrie, Oklahoma territory, and has directed that they be held on charges of counterfeiting Canadian money in this country. The story of Davis' capture reflects credit upon the secret service. Some time ago a man named George Chisolm was arrested in Nova Scotia for passing Canadian counterfeiters. He confessed that he obtained his supplies from Davis, who then lived in Boston. A secret service officer visited Davis' house, but found that he had mysteriously moved away, leaving no trace of his whereabouts. A printing press and a few other things were found in his home.

Increasing Watson's Fleet.

Admiral Watson's fleet in Philippine waters is about to be augmented by the three captured submarines, Isla de Luzon, Isla de Cuba and Don Juan de Austria, captured from Spain at the battle of Manila bay.
