Mr. Clark said to the French officer in charge of the party, "If some giant trumpeter with brazen lungs were to stand here and sound 'Rally on the colors' how many men would answer if the call could be heard for five miles?" According to Mr. Clark, although not a single man was in sight at the time the question was asked, the officer's reply was, "About 40,000 men." The lecture will start promptly at 8:15 o'clock.

## GREAT INCREASE NOTED IN THE FREIGHT TRAFFIC

Every Road Entering New York Has Added Men to Care for the Flood of Business.

NEW YORK, October 22.—A general revival of freight traffic, unequalled since 1907, is reported by almost every railroad entering New York city or with terminals in the New Jersey shore across the Hudson river.

At the office of the Erie railroad it was said that tonnage figures for last month showed that the business done in September, 1915, was the greatest ever recorded on the books of the company during the operation of the road.

Tonnage on the Baltimore and Ohio of shipments to New York and for export has increased forty per cent, it was said, within the past ninety days.

The New Haven railroad is moving more freight, it was said, than it has moved for years before. The New York Central lines reported that business is so good that hundreds of extra men have been added to handle the traffic and that deliveries of the five thousand to six thousand cars recently ordered are being hurried to care for the traffic.

On the Central railroad of New Jersey the volume is equal, it is said, to that of previous high records of the company. Some slight delay has occurred on this road in handling export shipments, but this is being rapidly adjusted. For a time all sidings as far as Somerville, N. J., thirty-five miles from New York, were choked with loaded cars. These are being moved expeditiously now. It is reported in the face of a steadily increasing flood of traffic greater than any recorded in years.

The Pennsylvania Railroad Company

declined to state the volume of business being done over its lines, but in railroad circles it was reported that in aid of the road's history had it been equaled before.

Steamship companies have pressed into service every possible craft to carry the enormous volume of exports across the Atlantic and are working the vessels at top speed.

Every road entering New York has added many extra men to its pay roll, it is said, to care for the flood tide of business.

BERLIN, October 22.—Installments paid in cash on the third German war loan up to October 18 amounted to \$2,268,000,000 marks (\$2,267,250,000), or about 68 per cent of the total.
