At **\$3.95**

RIVAL THE CREPE DE CHINES AT THE SAME PRICE

Many of these nets are trimmed with lace in Spanish lace patterns, with lace often forming the fluffy veste. Embroidered Net Blouses have the embroidery on the flat frills, and deep back collars and cuffs. A tiny ruffle sometimes edges off a deep back collar, and front frill. Chiffon in a good, firm quality is attractively combined with lace, and built on a flesh-colored lining. Point venise lace in some cases runs around the edge of the frill and whirls into a medallion at the corners of the frill.

There are plenty of new models constantly arriving in crepe de chine, in white, pink and flesh color. All sizes.

It's a Race Between the Chic, Close Shapes and the Smart Sailors in Our Distinctive Line of NEW FALL Trimmed Hats

AT \$5.00

—as to which will win the most favor, and truly it is hard to judge, with each one prettier than the other.

Then there is the popular "Little Corporal," a smart little military creation that is varied in its trimmings—but each is distinctly pretty and becoming.

The side roll styles come in for their share of commendation for the woman who especially cares for the charm these shapes give.

Velvets and velours lead in materials used for these Fall Hats, and trimmings are varied, including many novel ornamentations.

Colors are the season's choicest, including brown, navy, purple and black.

REPUBLICANS CARRY ELECTION IN MAINE.

SAYS UNION OF PARTY BROUGHT MAINE VICTORY

A reunited republican party was responsible, according to Henry M. Camp, assistant secretary of the National Republican League, who expressed today his satisfaction largely to the success of the Maine election. He predicts further dis-appointments in store for the democrats in November through the fact of a reunited republican party throughout the nation.

"I spent twenty-five days in Maine during the campaign," said Mr. Camp, "conducting organization work for the National Republican League, and the result of yesterday's election is no great surprise. It did not take long for me to observe on my trip through the state that there existed a reunited republican party, and that, of course, meant republican success.

Straight Ticket Vote.

"The defeat of Representative McMillen and Senator Johnson was due, in my judgment, largely to the success of the effort of the campaign managers in getting out a large republican vote that voted the ticket straight all the way through, regardless of friendships here and there for candidates of the opposite party. Much work was done by the National Republican League in its Maine campaign to have all members of its clubs realize the duty in voting their ticket straight, as a matter of republican principle and loyalty to their party's candidates.

"I never could understand how the democrats ever got the idea that they could realize the duty in voting their ticket straight, as a matter of republican principle and loyalty to their party's candidates. The progressives did not hesitate to say where they stood politically. Yet the democrats had their best speaking talent and most expert campaign managers in the Pine Tree state, with the earnest belief they would be successful.

Called Democratic Victory.

Chairman McCormick of the democratic committee issued the following statement:

"The result of the election in Maine indicates a sweeping democratic victory in November. I have never claimed that we would win in Maine, because I realized that to carry such a rock-ribbed republican stronghold in a presidential year would be practically impossible.

"We have materially reduced the usually large republican majority in that state, and that insures the election of President Wilson, just as a President plurality of 12,500 in September, 1912, professed the election of Cleveland in November.

"It is the first time United States senators have ever been elected in Maine by popular vote, and the sentiment as to national issues is to be gauged by the vote cast upon the same issues in other years.

Shows Reunited Party.

Secretary Reynolds of the republican national committee issued a statement in New York in which he said:

"The result in Maine, especially in the republican vote for governor, shows an absolutely reunited party. Carl L. Milliken has received all the votes cast for the progressive candidate two years ago, together with the 'stay-at-home' vote of two years ago.

"Best of all, the state has repudiated Senator Charles F. Johnson, a member of the finance committee of the Senate which framed the present democratic tariff bill.

Appeal for Protective Tariff.

"Maine gives the first appeal for a return to a protective tariff and the first answer to the Adamson bill," said Alvin T. Hart, western republican campaign manager, at Chicago.

"The victory assures us of victory in November. The victory means that Maine has enough of the Wilson administration. It also means that the republicans are to gain control of the United States Senate and that Charles E. Hughes, when he enters the White House next March, will be accorded the support of a republican House and a republican Senate. As goes Maine, so goes the Union."

Maine Has Blazed Way, Is Claim.

Senator-elect Frederick Hale sent the following telegram to Charles E. Hughes:

"Maine today has blazed the way for the rest of the country. We have elected our governor, two United States senators, and the indications point to a solid republican delegation in Congress. The progressive party today supported the republican party as a reality in Maine. The campaign was waged and won largely on national issues, and the results are a triumphant endorsement of your candidacy for President."

Gov. Curtis' View.

Gov. Curtis gave out this statement:

"From the figures that have been given to me it looks like Milliken if the republican ticket doesn't get 15,000 Wilson is upheld. If Milliken holds that ratio prohibition wins, of course."

National Issues Overshadow Others.

Frank J. Ham, chairman of the republican state committee in Maine, said:

"Yesterday's election is an endorsement of the clean, above-board campaign conducted by republicans in this state. State issues were kept largely in the fore, but they were overshadowed by the greater issues of national importance. The voters of Maine showed their support of the entire republican platform, state as well as national."

Sees Clean Sweep in November.

James A. Hemenway of Indiana, member of the western republican campaign committee, said:

"The success of the republican ticket in Maine means a clean sweep for republicanism in November. Hughes and Fairbanks are certain of election."

Progressives Turned Tide.

Harold L. Ickes, western republican committeeman, in charge of work among progressives, said: "It has been conceded ever since the beginning of the campaign that the major candidate would win to whom the progressive voters would turn in greater proportion. The result in Maine proved it, as it was the progressive vote that turned the tide against the democratic party."

Sees Election of Mr. Wilson.

Senator Thomas J. Walsh, manager of the western democratic campaign headquarters, gave out the following statement today on the Maine election:

"The returns from Maine presage the election of Woodrow Wilson in November. While that state has gone republican by about 12,000, it was carried by that party by a plurality of approximately 29,000 in 1912; 37,000 in 1908, and the combined republican and progressive vote in 1912 exceeded the democratic vote by approximately 24,000.

"Another comparison affords still greater encouragement to the triumph of Wilson. Mills, who has lost in the race for the senatorship, has 10,200 votes more than were cast for Wilson in 1912."

Prohibition Victory, He Says.

Commenting on the result of the Maine election today, D. Leigh Colvin, executive secretary of the prohibition national committee in Chicago, said:

"The outstanding feature of the Maine fight was the sweeping victory of the prohibition issue which was paramount in the Maine election.

"Carl F. Milliken's election as governor may be attributed largely to the strong prohibition sentiment of the state, and the combined republican and progressive vote in 1912 exceeded the democratic vote by approximately 24,000.

"If any republicans get any comfort out of such a small majority as they got in Maine yesterday, they are 'come,' he said. 'I expected the democrats to be beaten. The returns show that some progressives have gone back to the republicans, of course, but it also showed that many had not.'

REPUBLICANS WIN SWEEPING VICTORY IN MAINE ELECTION

(Continued from First Page.)

needs for representatives in Congress and state officers at a primary election today. The result is expected to turn on state issues, the voting for state officers being confined to candidates for republican and democratic nominations. The assemblies of both parties declared for strict enforcement of the state-wide prohibition law.

Chief interest centers in the contest between George A. Carlson, incumbent, and Samuel B. Nicholson, for the republican nomination for governor. Julius C. Gunther is unopposed for the democratic gubernatorial nomination.

In the races for Congress Benjamin C. Hilliard, democratic incumbent, is opposed by Henry B. Teller in the first district. In other districts Charles B. Timberlake, republican, and Edward Keating and Edward T. Taylor, democrats, are unopposed.

Appeal for Protective Tariff.

"Maine gives the first appeal for a return to a protective tariff and the first answer to the Adamson bill," said Alvin T. Hart, western republican campaign manager, at Chicago.

"The victory assures us of victory in November. The victory means that Maine has enough of the Wilson administration. It also means that the republicans are to gain control of the United States Senate and that Charles E. Hughes, when he enters the White House next March, will be accorded the support of a republican House and a republican Senate. As goes Maine, so goes the Union."

Direct Primary in Vermont.

Popular Interest Centers in Triangular Fight for U. S. Senatorship.

BURLINGTON, Vt., September 12.—The direct primary was given its first test in Vermont today, with popular interest centered in the triangular fight for the republican nomination for United States senator. The candidates are Senator Carroll S. Fane, Gov. Charles W. Gates and former Gov. Allen W. Fletcher. Horace F. Graham has no opposition for the republican nomination for governor.

Two representatives in Congress, Frank L. Greene and Porter Dale, republicans, likewise are unopposed for renomination.

With the exception of a few local fights there are no democratic contests. The candidates for the principal offices are: United States senator, Oscar C. Miller; Representatives Emmett B. Daly and G. Gilbert Page; governor, W. B. Mayo.

Purport of Results in Maine As Viewed by Party Leaders

Shows Reunited Party.

Secretary Reynolds of the republican national committee issued a statement in New York in which he said:

"The result in Maine, especially in the republican vote for governor, shows an absolutely reunited party. Carl L. Milliken has received all the votes cast for the progressive candidate two years ago, together with the 'stay-at-home' vote of two years ago.

"Best of all, the state has repudiated Senator Charles F. Johnson, a member of the finance committee of the Senate which framed the present democratic tariff bill.

Appeal for Protective Tariff.

"If any republicans get any comfort out of such a small majority as they got in Maine yesterday, they are 'come,' he said. 'I expected the democrats to be beaten. The returns show that some progressives have gone back to the republicans, of course, but it also showed that many had not.'

SHORTAGE OF PAPER MATERIAL

Your attention is called to the fact that there is a serious shortage of raw material for the manufacture of paper including rags and old papers. The collecting and saving of Rags and Old Papers would result in better existing conditions for the American Paper Manufacturers.

Some 100,000 tons of different kinds of paper and paper board are manufactured every day in the United States and a large portion of this, after it has served its purpose, could be used over again in some form of paper. A large part of it, however, is either burned or otherwise wasted. This, of course, has to be replaced by new materials. In the early history of the paper industry publicity was given to the importance of saving rags. It is of scarcely less importance now. The attention of the public is called to this in the hope that practical results might be accomplished. A little attention to the saving of rags and old papers will mean genuine economy to our paper industry and diminishing drain upon our sources of supply of new materials.

As adequate supply of rags and old paper is of vital importance to all branches of the paper industry, we call attention to the fact that there is a serious shortage of raw material for the manufacture of paper including rags and old papers. The collecting and saving of Rags and Old Papers would result in better existing conditions for the American Paper Manufacturers.

As adequate supply of rags and old paper is of vital importance to all branches of the paper industry, we call attention to the fact that there is a serious shortage of raw material for the manufacture of paper including rags and old papers. The collecting and saving of Rags and Old Papers would result in better existing conditions for the American Paper Manufacturers.

Some 100,000 tons of different kinds of paper and paper board are manufactured every day in the United States and a large portion of this, after it has served its purpose, could be used over again in some form of paper. A large part of it, however, is either burned or otherwise wasted. This, of course, has to be replaced by new materials. In the early history of the paper industry publicity was given to the importance of saving rags. It is of scarcely less importance now. The attention of the public is called to this in the hope that practical results might be accomplished. A little attention to the saving of rags and old papers will mean genuine economy to our paper industry and diminishing drain upon our sources of supply of new materials.
