

PUBLIC SCHOOLS OPEN TOMORROW

Increased Facilities Promise Successful Educational Year in Washington.

ALL READY FOR BEGINNING OF CLASS WORK OF YEAR

New Central High Expected to Register 1,900 Students—Congestion Relieved in Many Places.

With organization nearly complete, Washington's public schools are ready to open for the season tomorrow morning.

Not only are the public schools ready to begin the year's work, but many private institutions also are to open their doors this week.

Large Enrollment Expected.

Enrollment in the public schools of Washington is expected to be larger than ever this year.

The greatest individual gain probably will be at new Central High School.

Because of the great increase in the enrollment expected at Central it has been decided to allow no students taking special courses to enter this year.

Which is in readiness for the accommodation of students, all work is not yet complete on the building.

Through the opening of new Central, the Dunbar High School (colored), which is to take the place of the old M Street High School building, and the Park View School, many changes will be made possible.

Overlook to Be Cared For.

The opening of the new buildings will mean a great deal to the school system from the physical side alone.

If conditions become crowded at the McKinley Manual Training School students from this school can also be located at the old Central building.

The Park View School will greatly relieve conditions in that vicinity.

READ Kann's Big Advertisement TODAY Pages 16 and 17 Section 1

When Dandruff Goes The Hair Grows. It's easy to get rid of dandruff. Gently rubs of dandruff, scales, itching and irritation with Cuticura Ointment.

More significant, probably, will be the effect on study courses. New Central is to offer not only the regular academic courses, but will also afford opportunity for elementary commercial and manual training work.

Eastern High School is already offering elementary commercial subjects. The curriculum here will be enlarged later, when the new building, for which the site has already been acquired and initial appropriation made, is built.

In view of this it is the plan of the school authorities to make changes in the courses offered at Business High and McKinley Manual Training schools so that their work will be along more strictly technical lines than hitherto.

Business, for instance, probably will have added to its curriculum salesmanship, training in distribution, training for executive secretaryships and similar studies.

Special Needs to Be Met.

Supt. Ernest L. Thurston said yesterday: "There are several big lines of need in Washington, for which we can train our boys and girls. In some instances a man goes to work in a particular position, only after he has gone step by step over the work of other men.

With proper facilities and training, however, we can train our graduates to fill these positions adequately immediately after leaving.

"Many lines of work are offered here for which we can give our boys and girls special training. Take insurance, for instance. Several kinds of insurance are sold—life insurance, fire insurance and so on—and this requires a particular type of salesmanship. We can meet this need."

New Central is to offer a course in printing, as also the new Dunbar. "New Eastern, when available, is to offer a course in agriculture, as well as a number of other subjects not included in the curriculum of that school.

With the completion of that building Washington will have as fine a high school system as can be found in the United States, claim those who are in touch with the educational world.

"Washington will begin his lectures on Shakespeare."

Saturday afternoon lectures, illustrated by motion pictures, and arranged primarily for public school teachers and older pupils in the high schools, are to begin in November.

The lectures are to be given in cooperation with the bureau of commercial education.

Gonzaga College.

The program for evening classes at Gonzaga College, 43 I Street northwest, has been arranged and announced by Rev. A. J. Duarte, S. J., the prefect of studies. The course is to open October 16, and will end April 28.

The Catholic Women's Literary Guild, of which Father Duarte is director, and the co-operation of which organization much of the school's success last year is attributed, is expected to co-operate again this season.

Courses are to be given this year in philosophy, logic, general metaphysics, pedagogy, psychology of education, history, English rhetoric and literature, public speaking, English composition, Latin, algebra, geometry, Spanish, French and German.

Chevy Chase Seminary.

Prof. J. S. Young, who occupies the chair of political science at the University of Minnesota, delivered an address on the socialism of school life and made an appeal for high ideals at the opening exercises of the Chevy Chase Seminary Thursday.

Prof. Young, who has entered his daughter as a student at the seminary, has decided upon Washington as the city in which he desires to spend his sabbatical year.

He points out that he has chosen it for his residence this year, believing that its peculiar advantages will greatly aid him in his work which he will take up again next year at the university.

TRINITY COLLEGE TO OPEN.

Resumption of Studies Tomorrow With 250 Pupils Enrolled.

Trinity College, on Michigan avenue, conducted by the Sisters of Notre Dame de Namur, begins its scholastic year tomorrow, with the resumption of classes. Friday was "registration day" and already 250 pupils have enrolled, making the largest attendance in any of the sixteen years of the college's existence.

There are fifteen young women from

Washington enrolled for this year. No formal exercises have been arranged for today. The celebration of "cap and gown Sunday" has been set for October 8, at which time many of the local alumni, as well as graduates living in Baltimore and Philadelphia, will attend the chapel service.

Law Schools Open.

The National University Law School is to open at 6:30 o'clock tomorrow evening. Brief addresses are to be made by members of the faculty, including Justice Frederick L. Siddons. Chancellor Eugene Carusi is to preside.

The Law School of Georgetown University is also to open tomorrow evening, with a formal session of students and faculty. George E. Hamilton, dean of the school, is to preside. Rev. Alphonsus J. Donlon, S. J., president of the university, is to make the address of welcome.

Hampton I. Carson of the Philadelphia bar is to be the principal speaker.

October 3 an informal session of students and faculty will be held. At that time assignments for the opening classes will be made.

Dr. Henry S. Boutell is to have charge of a course on "American Legal Institutions." It is a new course, and, it is believed, is offered by no other school.

American University.

The American University opens Tuesday morning. Bishop John William Hamilton, the new chancellor, is expected to be present. He has completed his work preparatory to taking up his residence in Washington.

He is planning several new features which he expects to introduce in the near future.

Applications for the fellowships, which will be presented by the board of award next May, already are being filed. Work in philosophy is to be conducted this year, as last, by Dr. Collier. Early in October Prof. Samuel J. MacWaters will begin his lectures on Shakespeare.

Saturday afternoon lectures, illustrated by motion pictures, and arranged primarily for public school teachers and older pupils in the high schools, are to begin in November.

The lectures are to be given in cooperation with the bureau of commercial education.

COMMISSIONER TYRER ORATOR AT SMOKER

Tells Potomac River Power Squadron of Motor Boat Regulation.

The work of the Department of Commerce, especially in connection with motor boats plying waters of the United States, was explained to members of the Potomac River Power Squadron and their guests last night at a smoker by A. J. Tyrer, deputy commissioner of navigation. The smoker was held at the Corinthian Yacht Club, at the south end of Highway bridge.

Mr. Tyrer stated that 40,000 inspections were made last year by his department of motor boats and that 5,000 violations were discovered of the navigation laws requiring full equipment of fire extinguishers, life preservers and other paraphernalia.

Theodore I. Coe of New York, chief commander of the United States Power Squadron, urged all commanders of power boats to become members of the organization. He told of the growth of the body and explained its advantages.

Allan O. Clephane, who attended the naval training cruise conducted under the auspices of the Navy Department in Long Island sound last summer, told of the cruise and explained the instruction given.

It was announced by A. B. Bennett, Jr., commander, that the annual review of the Potomac River Power Squadron will be made by Commander Coe at 9 o'clock this afternoon opposite Little Hunting creek.

VALDEZ TO TAKE OFFICE.

No American Interference With Election of Panama President.

Prestigious reports that the United States would protect the election of Dr. Ramon M. Valdez as President of Panama were quieted by an announcement at the State Department that Dr. Valdez would be inaugurated in office today without interference.

Many complaints have been received in Panama poll lists that the elections were unfair and the polling places dominated by the party in power. Officials said no confirmation of this report had come either from the American minister there or Maj. Gen. Goethals of the Canal Zone.

Roosevelt Figured Out.

Kentucky Progressives Substitute Bull Moose as Emblem.

LOUISVILLE, Ky., September 30.—The names of thirteen presidential electors, to be voted for in November by Kentucky progressives, it was announced today, have been certified to the secretary of state at Frankfort. The purpose was said to be to keep the party organization intact.

The certificate requested that the figure of Theodore Roosevelt be eliminated as the party emblem and that of a bull moose substituted.

In connection with filing the certificate, M. J. Holt of Louisville, chairman of the progressive state central committee, issued a statement in which he said a canvass of Kentucky progressives had shown they would not support republican presidential electors, and that it had been decided to present "those of their own political persuasion."

Snow Falls in Alabama.

GADSDEN, Ala., September 30.—A light snowfall, the first in this section this season, fell last night, melting as fast as it descended.

DUNBAR HIGH SCHOOL OPENS TOMORROW

Finely Equipped Institution for Colored Youth, Costing, Exclusive of Site, \$550,000.

PROGRAM FOR FIRST DAY ANNOUNCED BY PRINCIPAL

Innovations Introduced and Opportunities Offered for Enlarging the Scope of Work.

Although work is not completed on the building and all of the equipment has not yet been arranged, the Dunbar High School, considered by many to be Washington's finest public educational institution for colored students, is to open tomorrow morning at 9 o'clock. The building and equipment, exclusive of the price of the site, cost \$550,000.

Directions for the assembly of students tomorrow were announced yesterday by G. C. Wilkinson, principal of the school. Undergraduates of the M Street High School, of which the new building is to be the successor, are directed to report at 9 a. m., at the assembly hall, on the first floor, for section assignments. Students entering from the grades will report in the assembly hall of the school at 11 a. m. All applicants for entrance from out of town are directed to report to A. H. Glenn, chairman of the committee on entrance requirements, at the Dunbar High School, at 9 o'clock in the morning.

Stadium Is Desired.

A greenhouse and roof garden are to be built in the near future. It is hoped that this year an appropriation may be obtained for building a stadium in the rear of the school.

One feature of the building, which, though small, has peculiar significance at this time, is a paper hater. Principal Wilkinson means to let no paper go to waste.

The school has a frontage of 461 feet, facing 1st street northwest and running from N street to O street. Delay in getting all the equipment in on time was occasioned by the fact that the company providing it was burned out in August. As soon as arrangements can be made, however, dedication exercises will be held, at which

Scope of School Extended.

Dunbar High School offers many innovations and opportunities for extending the scope of work along a number of lines. For instance, the assembly hall, or auditorium, has a stage much larger than that in any of Washington's older school buildings. The seating capacity

of the hall is 1,500. Provision is made for the display of motion pictures, the booth for the picture machine being in the library, adjacent to the hall and projecting the pictures through a window.

A pipe organ also is provided for the hall. Especial attention is to be given to music as a major subject and the building will have five pianos installed.

A printing plant, the equipment of which cost \$4,000, is another attraction. In connection with the business branch of the school a banking department, with its necessary windows, has been provided. Mr. Wilkinson was one of the founders of the first colored students' bank in the city that established at Armstrong Manual Training School.

Gymnasiums Provided.

The physical side of the student is well cared for. Large gymnasiums are provided for both boys and girls. The dressing rooms leading from these are furnished with the most up-to-date equipment.

A large swimming pool also is provided, but this is not quite complete. A lunchroom having a more kitchen is another feature of the new building. Seats for 350 students are provided.

The school also has a department for instruction in elementary domestic science. This includes a dining room having modern furniture, so that the girls may learn by actual experience how to lay a table, arrange furniture, etc.

Practically the entire basement floor is devoted to laboratories for the teaching of botany, zoology, chemistry and physics. The school has a particularly fine set of apparatus for physics. It is the result of years of collecting and is one of the best sets of apparatus in the country. A wireless outfit is to be added in the immediate future.

Cadets have a large allotment of space in the new building, the armory under the auditorium being ample for saving modern furniture, so that the school had four companies, but this year hopes for six. A rifle range also is provided.

Stadium Is Desired.

A greenhouse and roof garden are to be built in the near future. It is hoped that this year an appropriation may be obtained for building a stadium in the rear of the school.

One feature of the building, which, though small, has peculiar significance at this time, is a paper hater. Principal Wilkinson means to let no paper go to waste.

The school has a frontage of 461 feet, facing 1st street northwest and running from N street to O street. Delay in getting all the equipment in on time was occasioned by the fact that the company providing it was burned out in August. As soon as arrangements can be made, however, dedication exercises will be held, at which

time the public will have an opportunity to see the new building and all of its interesting features complete.

Scholarship and high ideals are to be the aim of the school in the future, as in the past, Mr. Wilkinson says.

Brick Hits Woman in Eye.

Charged with disorderly conduct on a street car and assault, Frederick Gharries, twenty-three years old, 1330 4 1/2 street, was arrested last night by

police of the fourth precinct and locked up. It is charged that he threw a brick at Conductor Merriam Frye, the brick missing the conductor and striking Mrs. Catherine Weber, wife of Sergt. Weber, United States Corps of Engineers, stationed at Washington barracks, destroying the sight of one eye. Gharries was ejected from the car for being disorderly; it is charged, and he threw the brick at the conductor.
