

Long Skirts and Trains for Evening Wear

BY ANNE RITTENHOUSE.

There has been a tremendous amount of work done in the dressmaking department during the last few months. The first is a general one, the second is a terrific one. You first think that there is no particular change in clothes, and then you realize that something subtle and im-

portant has happened and that last year's clothes won't do. What is that something subtle? Well, it cannot be put into words or phrases. It cannot be taken in by the mind at the first glimpse of the new clothes; it seeps into the consciousness until it has absorbed the whole trend of the fashion. There is comfort to be found in the

fact that some of the clothes bought last fall will serve for this fall and November. If they happen to be advanced models by good designers, one of the mannequins at a famous dressmaking house proved this by wearing a gown on the opening day which several customers wished to have copied. It hung straight like a wrapper from shoulder to hem, was cut in the Italian manner and was loosely draped with a long and slightly bell-shaped at the wrist.

As such a proportion that one was shocked into wondering what would be eliminated further. If a woman is able to struggle through the next few months without

buying new clothes and still remain sufficiently in fashion, she will have to place all her ruffles on her street clothes. There are few evening gowns on this continent that will be able to

do first-class duty this winter, unless one is skillful at alteration. This argument may seem to prove untrue according to the show windows and the gowns that hang in glass cases in dressmaking places. There are skirts every curve but the straight waist, and there are others that have two frills standing out from waist to hem. These are the fashion, and if they survive it will be due to the obstinacy of an individual in wearing what she chooses.

If Louis Quinze is dead, what kind do we wear? No one can answer that. Napoleon is the one who has again has the leading influence on clothes. Fashion never quite gets away from that superb figure of a little man. No one can fault the dress of the Empress Josephine in the gowns that are made by her great designer in France. But the first empire gowns of today are not what our eyes pictured there. The straight satin widths tightly gathered under the bust and the puffed sleeve are conspicuously absent in these splendid creations of simple lines from bust to instep.

The empire idea is worked out in the evening gown in a straight line that Josephine emphasized and in the clinging way in which the fabric outlines every curve of the body, although it has no curves itself.

THE IMPERATRICE JOSEPHINE

BLACK VELVET, WITH A BAND OF SILVER LACE AT THEM AND V-SHAPED PIECES OF GREEN VELVET UNDER THE ARMS. THERE IS AN ORNAMENT BACK AND FRONT, AND SHOULDER STRAPS MADE OF EMERALDS AND RHINESTONES.

BERNARD'S BORGIA GOWN

METAL CLOTH IN GREEN AND GOLD, BROCADED WITH GOLD FLOWERS. THERE IS A TRAIN OF GOLD LACE WHICH HANGS FROM THE WAIST.

FIFTEENTH CENTURY GOWN

GOLD VELVET, TRIMMED WITH GOLD LACE, WHICH SERVES AS A CAPE IN THE BACK AND THROUGH WHICH THE ARMS ARE THRUST.

FIELD, FARM AND FLOCK.

Pointers for Poultrymen, Gardeners, Stock Raisers, Orchardists and Farmers—Information Gleaned From Researches of Experts.

ALL AROUND THE PLACE.

Do not wash potatoes when they are dug, unless they are to be marketed immediately. The tubers keep better and look better after storage if they are freed of any mud that may cling to them, but not washed, and stored in coarse burlap bags. If a root cellar is not available the next best place to store potatoes is in a cool, well-ventilated cellar under the house, though even this kind of storage place, if the cellar contains a furnace, will not keep potatoes or other vegetables well. The tubers may be stored in bins, if the quantity is sufficient to warrant, and in such case they can be looked over more easily. In whatever place they are stored, however, they must be kept cool without freezing; they must be in well-ventilated places, where they must be in as dark a place as possible.

Potatoes, both sweet and Irish, are worth taking good care of this year, and they will be even more worth while this year than last. The market for white potatoes are bringing higher prices than have prevailed at any time in the past ten or fifteen years, and predictions are freely made by growers of produce that they will be worth \$2 or more a bushel by January. Serious shortages of the potato crop in Maine, practical failure of the Minnesota crop and shortage of the Colorado crop are given as reasons for the present high prices, and the prospect of still higher prices.

It is the time to dig the dahlias, tubers and store them in a place where they will not be injured by freezing temperatures or by either dampness or extreme dryness. A deep box almost filled with thoroughly dry, clean sand is a good place in which to pack the tubers, some growers even winter them perfectly in boxes of dry, finished, though this is not recommended. Dahlias should also be dug before they are stored. A deep box almost filled with thoroughly dry, clean sand is a good place in which to pack the tubers, some growers even winter them perfectly in boxes of dry, finished, though this is not recommended. Dahlias should also be dug before they are stored. POULTRY YARD NOTES.

The annual poultry show is beneficial to both the utility farmer and the fancier. It is educational. It points out the true value of the pure bred, and does yeoman work in killing the interests of cross-breeding and mongrelism. The fancier deserves a word of credit for his painstaking work, and the poultry show is indispensable for his advertising facilities. The poultry exhibitions simply because he raises nothing but table poultry and table eggs is not a good utility farmer. He lacks the influence of a good show. He lacks wisdom.

The true utility breeder is one who looks mongrelism and employs solely pure breeds for his purpose. The annual exhibitions are of great use in this particular, giving strong object lessons. Here not alone the feathers and correct markings are displayed, but the form and the meat qualifications are at once exposed to view. It requires but ordinary intelligence to see the advantage of the pure bred over the mongrel. The utility breeder would be an advantage to the poultryman's yard.

The meaning of the term "condition" is the state of a fowl as regards health, cleanliness, and order of plumage. The legs and feet of the birds should be carefully washed and cleaned a few days before taking them to the exhibition. The feet should be kept clean, and the toes should be kept clean. The feet should be kept clean, and the toes should be kept clean. The feet should be kept clean, and the toes should be kept clean.

IN MARVELAND AND THE VIRGINIAS

Cumberland, Md.—George I. Richard, owner of Lutherville, who died last week, had written over \$6,000,000 life insurance, \$1,000,000 of it after he was seventy years old.

Charleston, W. Va.—The Cheat River Lumber Company, capital \$250,000, has been incorporated by W. H. Chambers of Fairmont, W. Va.; E. Hamstrom and Thomas Kearns of Pittsburgh, Pa., and others.

Staunton, Va.—Having secured a revolver from one of the attendants at the Western State Hospital, a patient named Wine, at the point of the gun, made the attendant open the doors that were closed between him and freedom and made his escape from the asylum. According to information, the attendant, who was in his room writing a letter, had the pistol lying nearby, engrossed with his pen. Wine stealthily entered the attendant's room and took charge of the gun and also the attendant, holding him up at the point of the ugly looking weapon. Wine commanded the guard to open the doors leading from the room in which he was confined. The attendant obeyed the request of his once subordinate charge and "opened up."

Winchester, Va.—Indictments have been returned here by the grand jury in what the authorities call a sensational case against Dorsey Racey, his wife, Pearl Racey, Kate Vance Finsel and Martha E. Racey, all charged with the manufacture and sale of an intoxicant.

Valley of Virginia.

WINCHESTER, Va., October 14.—Several additional cases of typhoid fever have been reported in Winchester during the past few days, but thus far only one death has occurred since the disease became prevalent about a month ago. Dr. Roy K. Flaum, assistant state health commissioner, came here from Richmond recently and made a thorough investigation. He found that the disease had been traced by local authorities to infected cream shipped here from Harrisburg, Pa., which has been an epidemic since August.

Morgantown, W. Va.—Mrs. Andrew Buke, aged twenty, a Hungarian, who had been confined for the past twelve months, died near here as the result of the mother pouring kerosene on her body. She was about a month ago. Dr. Roy K. Flaum, assistant state health commissioner, came here from Richmond recently and made a thorough investigation. He found that the disease had been traced by local authorities to infected cream shipped here from Harrisburg, Pa., which has been an epidemic since August.

Charleston, Md.—Shooting sparrows near his home, Harry Dugan accidentally discharged his shotgun and was shot in the left arm. He died a few hours later.

Staunton, Va.—A white poodle dog, owned by a local physician, was responsible for the worst mud scare experienced here in recent years. As a result of the dog's antics, the city council has taken local pasture treatment and the council will be asked to pass an emergency ordinance making it unlawful to allow dogs to run at large.
