JOHN C. JOHNSON DIES AFTER HEART ATTACK

One of Country's Leading Lawyers and Widely Known as Art Connoisseur.

By the Associated Press. PHILADELPHIA, April 14.—John C. Johnson, the widely known lawyer, died at his home here today. Death was due to heart disease.

Mr. Johnson had been ill but a few days, although this fact did not become publicly known until after his death. He was seventy-seven years old.

John C. Johnson stood in the front rank of his profession, having been retained, largely by corporations, in many of the great legal cases that have come before the Supreme Court of the United States in the last twenty years.

He appeared before that tribunal in the famous Northern Securities case, the Standard Oil trust case, the United States Steel Corporation suit, now pending, and in all the anthracite coal trust cases that have been instituted in the last few years.

Mr. Johnson refused positions in presidential cabinets and twice declined offers of appointment to the Supreme Court bench. In his long career he accepted but one public office, and that was an appointment as a Fairmount Park commissioner, a purely honorary local position.

Had a Remarkable Career. John C. Johnson was born in Philadelphia, in humble circumstances, his father having been a blacksmith. Left fatherless in boyhood, he was graduated from the Philadelphia High School and succeeded in being admitted to the bar in 1863 without going to a law school.

Hardly second to his legal prestige was Mr. Johnson's standing as an art collector. In his long career he had gathered together a fine collection of pictures he gradually obtained a large and highly valuable collection. Other collectors sought to buy his pictures, adding gems to their private galleries. The fine collection of the late Peter A. B. Widener was much of its prestige and value to the fact that it was chosen under Mr. Johnson's assistance and advice.

Mr. Johnson leaves no direct heirs. He married late in life. It is said that Johnson never sat for a portrait.

SUMMARY OF OPPORTUNITIES FOR WAR SERVICE FOR ALL MILITARY SERVICE.

Stations have been established in various parts of the city where men and women may enlist and enroll for war service.

Recruiting tent at Pennsylvania avenue and 7th street northwest and a tent in front of the Columbus statue at the Union station; 13th and F streets northwest.

Officers Reserve Corps—Room 257, War Department building. Aviation Corps—7th street and Pennsylvania avenue northwest. Enlisted Reserve Corps, Quartermaster Corps—Apply at any army recruiting station for blank, fill out as per instructions thereon. Mail to Department, Quartermaster, Eastern Department, Governors Island, N. Y. Await his reply telling you where to present yourself for enlistment in reserve corps.

Plattsburgh training camp—Apply by letter to Commanding Officer, Eastern Department, Governors Island, N. Y.

MARINE CORPS. Marine barracks, 8th and I streets southeast.

NAVY. Recruiting station at 208 9th street and at the women's quarters, Washington navy yard, foot of 8th street southeast; also at Naval Hospital, 24th and E streets northwest.

NAVAL RESERVE. Men and women—Enrollment office in old naval hospital at 9th street and Pennsylvania avenue northwest.

NATIONAL GUARD OF THE DISTRICT OF COLUMBIA. 3d Infantry, in United States service—Fort Myer, Va. 1st Separate Battalion, in United States service—12th and U streets northwest.

Battalions A and B, field artillery; Troop A, cavalry; Company B, Signal Corps—Armory, 230 1st street northwest. Troop B, cavalry—127 F street northwest.

NAVAL MILITIA OF THE DISTRICT OF COLUMBIA. Armory at Water and O streets southwest. Organization called into the United States service. Recruiting temporarily stopped. Probably will be renewed soon.

CIVILIAN HOME GUARD, AUXILIARY TO POLICE FORCE. Police headquarters, District building.

RELIEF. All inquiries or communications should be addressed to Care of District of Columbia Chapter, Red Cross, 1301 Massachusetts avenue northwest. Women wishing to be of service—Miss Isabel T. Boardman, chairman of Woman's Volunteer Aid.

Men wishing to take first-aid instruction, whether in preparation for military service or the home defense—Dr. Ryan Doreaux, chairman of first-aid committee. Military relief—Major Gen. Carroll A. Devol, chairman. Inquiries concerning the one-hundred-thousand-dollar relief fund—Henry B. Macfarland, chairman. Contributions to relief fund—Cuno H. Rudolph, financial secretary of the fund.

General contributions for Red Cross work—Howard S. Reeside, treasurer. Home care of the sick and surgical dressing classes—Miss Anna J. Greenleaf. Refreshment Corps—Mrs. Larz Anderson, chairman, or Miss Mary Sheridan, secretary. Woman's Motor Service Corps—Mrs. J. Borden Harriman, chairman. General information on Red Cross activities—Admiral N. E. Mason, chairman, or Mrs. T. N. McLaughlin, secretary.

Allotment of all work—Mrs. T. W. Richards. Clerical work—Miss Stella Osborne. Civilian relief—C. C. Glover, Jr., 1201 Connecticut avenue. Employment exchange for members of soldiers' families, in charge of Misses Alexandrine Fitch and Marion Leitz—1301 Connecticut avenue.

INDUSTRIAL. Headquarters of council of national defense and advisory committee, co-operating with military authorities of the government for mobilization of industrial resources—118 Munsey building.

Transportation and communication—Daniel E. Willard, president of the Baltimore and Ohio railroad. Munitions and munitioning, including standardization and industrial relations—Howard E. Coffin, vice president of the Hudson Motor Car Company. Science and research, including engineering and education—Dr. Hollis G. Godfrey, president of the Praxair Institute.

Supplies, including food, clothing, etc.—Julius Rosenwald, president of Sears, Roebuck & Co. Raw materials, minerals and metals—R. M. Baruch. Labor, including conservation of health and welfare of workers—Samuel Gompers, president of the American Federation of Labor. Medicine, including general sanitation—Dr. Franklin H. Martin, room 1018 Munsey building. General information—Walter Gifford, director, room 1041 Munsey building.

YOU CAN HELP THE COUNTRY BY DOING THE DUTY AT HAND

Skilled Men Are Needed Behind the Lines as Well as at Front.

EFFICIENCY IS NECESSARY TO MAINTAIN THE TROOPS

Do Something at Home While Waiting for Your Turn for Place in Line.

No. V. "What can I do for my country?" Possibly the best thing you can do at this time is to "sit tight."

Already in this series it has been shown that the nation is mobilizing its man power and woman power, its natural resources and industrial strength to meet the clash of war and provide for unlimited staying powers and endurance. It has been shown what is being done and what must be done in the enlistment of young men in the Marine Corps, the Navy and the Army.

It has been shown how raw material is being provided in gigantic quantities, how armies of skilled labor are being concentrated and all branches of industry whether in the making of war munitions and providing food supplies is being directed on their own job and awaiting the broad avenues of usefulness. It has been shown in a broad way what the Red Cross is doing for the relief of suffering among soldiers and among the civil populace in consequence of war conditions.

Thus in a general way has been shown the broad avenues of usefulness in which the patriotic zeal of red-blooded Americans can find a place of activity in the nation's defense.

Efficiency the Watchword. It seems appropriate at this time to

caution against allowing patriotism and the excitement of the hour to interfere with efficiency. The suggestion is here made that many will find that the greatest service they can do their country at this time is to remain patiently on their own job and await the time when developing needs of the country will point a way to some particular service for which they are specially fitted.

The council of national defense was organized and its main branches of activity systematized because these men of brotherhood recognized the mistakes that other belligerent countries have made early in the war in sacrificing some of their most skilled men as food for the great guns. These very victims would later have been able to give their country much more valuable service by providing war supplies. The United States has laid plans to profit by this experience with the other nations.

Therefore if you have peculiar training, technical or scientific skill, you should find valuable service in technical positions in the enlisted reserve corps. These are days critical in industrial and civil life as well as in the international affairs of the country. With hundreds of thousands being called into military service, food and clothing must be provided for these men called away from their homes and from their business. This is not a time when business can be expected to lag. As far as possible business in the United States should be encouraged to proceed as usual. Therefore men and women with special training in certain lines of business will be doing their country just as certain a service as those that participate in military preparations or defense activities.

For the big army that is about to be mustered, either through some system of conscription or otherwise, the breadwinners of many families will be called from their accustomed labors. In consequence many families will be reduced to need and larger numbers will be forced to get along on much smaller subsistence than heretofore. In this condition of affairs wives and other members of the soldiers' families will be forced to find employment of various kinds.

Do the Thing You're Fitted For. It is far from a service to the country or helpful to humanity, it is pointed out, if some well meaning women who have never been used to work should be carried away with a furor of excitement and volunteered to do for nothing work for which members of soldiers' families are fitted through performing which they might earn sufficient to keep them from want. This again is a moral drawn from real life.

Autists Can Help Recruiting With Posters on Windshields. Automoblists, do your bit! You can help your country by advertising the recruiting campaign of the navy and the Marine Corps.

Get one of the attractive red, white and blue posters being issued by the Navy League in connection with the "windshield" recruiting campaign, and paste it on the lower half of your windshield. It will not obstruct your vision and will help the navy and Marine Corps to get young men to defend your country. The poster, which can be obtained at Room 725, Southern building, city.

Value of Technical Training. Again, the quartermaster's headquarters, the War Department has been deluged with applications from men seeking commissions as major or captain in the reserve corps, quartermaster's department. This is a berth which requires very special training, and to secure a commission a strict technical examination must be passed. The very application blanks filed by many of the applicants show that they would not be able to pass this examination. Many of those, however, who are applying for commissions are in technical positions in the enlisted reserve corps.
