

Now comes the "feather dance," to be known as "a unique creation of nature dancers." This rehearsal, headed by Ruth St. Denis and Ted Shawn, is being held with an ostrich as the centerpiece. The dancers are garbed in snow white, with headdresses and girdles of ostrich plumes.

An exquisite gown of gold lace, combined with old rose brocade georgette and velvet, with flesh-colored net. An American fashion of the season.

Maurice Maeterlinck and wife as guests of honor of the "Blue Bird Ball," held in New York. The Belgian poet saw many of the characters of his "Blue Bird" come to life in the ballet, which was a feature of the ball. Left to right: Mrs. William K. Vanderbilt, Jr.; Mr. Maeterlinck and Mrs. Maeterlinck.

The Baroness Yvonne de Mazieres, who arrived in this country to exhibit thirty war paintings. The baroness, a relative of Count Boni de Castellane, stirred her native France recently with a painting, "France Crucified."

Miss Margaret Moffat Yard, daughter of Robert Sterling Yard of the National Parks Association, whose hazardous mountain climbing in Zion Canyon, Utah, may open cliff dwellings hidden for centuries. Miss Yard's mountain explorations have charted the way into the high caves which have not been trod by the foot of man since prehistoric times.

To be seen along the sunny Palm Beach walks and lanes, according to fashion dictators. This type of garment is closely allied with riding breeches, its only trimming being rows of buttons. The trouser part of the costume is closely gathered below the knee.

Capt. Gypsy Pat Smith, the "Fighting Evangelist" of the Northumberland Fusiliers, who arrived in America recently to lecture on the war and act as bridegroom in a wedding with Miss Karin M. Tjader, an American girl.

Although Germany remains in a state of strife, her scientists have gone to work again. Dr. Albert Einstein, photographed at his desk, has a new theory on relativity, namely, the diversion of a ray of light in the field of gravitation of the sun. The theory, which is claimed to be a turning point in the history of physical science, has been confirmed by English astronomers.
