HORSE STILL WITH US.

Horses seem rare these days. The clatter of hoofs on the pavement is a novelty which one notices, even in jumping out of the way of automobiles and motor cycles.

And yet did you know that horses are on the increase? Ten years ago they constituted but 29.2 per cent of all live stock; now, 42.4 per cent. Mules scored an increase of 166.2 per cent in the last decade. If you try to buy a good horse, either for driving or draft work, you will find them high enough.

It is too early, then, to count out the noblest of animals. He isn't in the buffalo class yet.
