**EXPLOITING OF ALIEN  
GIRLS SHOWN UP**

*Factory Inspector's Office Throws Light on Actions of  
Restaurant Bosses—"They Take Advantage of  
Ignorance," Says Nelson—Many Fines  
in Court.*

How Polish immigrant girls who land in this country ignorant of the laws and by-laws in regard to female employment are taken advantage of by restaurant bosses is plainly shown up in a report issued by the state factory inspector's office.

The report claims that there are more violations of the woman's ten-hour law in restaurants, especially those run by Greeks, than by any other class of employers. The gun of the factory inspector's office have been trained on the Greek offenders for some time and rank violations of the law have been uncovered.

It is simply a case, according to Inspector Nelson, of the employers taking advantage of the immigrant girls' ignorance. They land in this country

in a position where they "need the money" and are willing to work much longer hours than the law allows. A majority of the girls from foreign lands do not even know, until told by inspectors, that such a thing as an hour-law exists.

Harry Dellas of The Dellas Lunch Room was fined \$15 for failure to keep a time record of female employes. Peter Barris of The Barris Lunch Room drew a \$45 penalty for working a waitress over ten hours. Periera Bros. paid the court \$10 for violating the child labor law.

Other cases which came before Judge Trude in the municipal court Monday were:

Duncan Bros. Mon Co., \$10 for violating child labor la i
