

WILL KAISER'S THROAT DECIDE WORLD WAR?

If it turns out the kaiser really is suffering from cancer of the throat, it may be necessary to remove his larynx to save his life. If this should be done it would be necessary to insert tubes connecting food and breathing passages, as shown by figures one and two in illustration.

Rome.—Porter Charlton, American, who recently was released from prison after serving brief term for killing of his wife, leaves Naples for New York today.

Washington.—Successor to Justice Lamar on supreme bench will not be former Pres. Taft. From a source close to the president this was given out positively.
