

comes on. Turkish, Russian or any sweat baths are great helps. It is beneficial to "boil" for a half hour in the hottest water you can stand in your bath tub.—Forum Editor.

WANTS WORK.—Can anybody help me? I am an American, a first-class union carpenter and can make anything that can be made of wood. Would like a position downtown, working with my tools, or would like to have charge of some building as house carpenter. I have helped to trim many of the best buildings, but am not acquainted with any of the agents or owners of them. I have not been able to secure a position, but hope to through this.

I can be reached by a letter addressed to 6155 S. Ashland av. or by phone, Prospect 326. Ask for Carpenter.—J. B. Dalgarn.

INSURANCE CO.'S THIRDS.—I have heard a lot about the police third degree. It is nothing but a simple questioning to bring out the truth. But if you wish to see a real third degree get an accident or sickness policy in some insurance company and break a leg, hand or neck.

I am an electrician, and, thank God, a union man. An agent begged me to take out an accident policy. I did and finally got hurt. I was third-degreed a dozen times, bulldozed into having an X-ray picture taken which cost \$23, compelled to see their doctor and my own several times and had to get many statements and certificates from my physician answering the same questions I had answered before. I also received blanks for questions, which I had to answer again and again, in hopes of trapping me, I presume.

Before I was half well I called to settle up, and after abuse and insults from the young lady in the office I received the money. Though I was off for months afterward and was supposed to draw \$40 a month, I got no more.

My family all laughed at me, and my dad laughed loudest. Now I am laughing at him. He fell since and immediately was sent the "necessary blanks" to fill out. He could not write because he was in bed and his condition was serious, but he was told that he must. He has answered all the questions twice and now has received the same questions to answer again. What is the game? Is every man a nice fellow in the eyes of the insurance companies until he takes out a policy, and is he then a scoundrel, liar and thief?—A Policy Holder.

TO MR. E. SWEENEY.—"Let the working people practice non-resistance." Mr. Sweeney, do you mean that if the working people are exploited by their masters they should not go on strike, but simply take it good-naturedly? The working people have been doing this long enough, and what is the result? Why have we educators if not to awaken the people to resist this evil, for it certainly is a great evil?

Perhaps I did not understand your letter correctly. But pray do tell me what you meant by "the working people should practice non-resistance." Are you averse to science? Do you think it will make greater slaves of us than we are now?

Non-resistance is based on theological religion and preachers certainly practice it; at least, they tell the people to practice it just to keep them in submission. The difference between science and religion is that science believes in resistance. This is the very breath of modern civilization. On the other hand, religion, with its non-resistance, does not make any progress, but meets with defeat, just as science advances. The least developed are the most averse to change, but you are going through the process of evolution whether you like it or not.

If you want to be more posted on the theory of non-resistance I advise
