

INEFFECTIVE METHOD OF USING BRUSH

Incorrect Way to Brush the Teeth—Moving the brush back and forth over the surface of the teeth does not clean them properly. Food is crowded into the spaces between the teeth during eating. It will remain and decay in these spaces if the teeth are brushed in the incorrect manner shown above. Brushing in this way hits only the high spots on the teeth. Get the brush into the spaces.

DID YOU KNOW—

An Igorrote little boy never gets a tanning from his mother because he forgot to shine the back of his shoes.

A chameleon necktie has been invented by a Detroit genius. The tie changes to the color of the gravy or soup that falls on it.

Some fellows have jobs where they can get their work done for two or

three weeks ahead, but it isn't quite so easy for singers.

You don't know what a good job you've got until you're fired.

In Africa in the Yacahaca mountains the goat's inside legs are shorter than their outside legs, to enable them to go around the mountain.

When a fish takes a bath it never bothers about drying itself.
