YANKEE CON. WAS CUT IN TWO

The Stock Sold as Low as \$2.50 On the Exchange Today.

CARISA WAS MUCH WEAKER

Ajax and Uncle Sam Sought Lower Levels—Boss Tweed and Victor Fall Into Line.

The mining stock market was in bad shape this morning. Almost as soon as the mining exchange opened its doors it became evident that prices were slated for another cut today. Ajax sold down to 7 1/2 and closed an offering at that figure. Carisa, which has shown moderate strength throughout the year, fell away today with the sale of about 15,000 shares. Sales were made as low as \$7.50 though it reacted to 9 1/2 at the close. Uncle Sam was very active between \$1.16 and \$1.06 1/2. Tesora slumped to 4, while Ben Butler sold as low as 1 1/2. The most surprising drop occurred in Yankee Con, which released a small block at \$2.50. Victor, for the first time during the present onslaught, showed weakness today. It sold as low as 1 1/2.

CONTRACTS FOR HOISTING PLANT

Awarded Last Evening to Denver Parties by Wabash Company.

H. L. BENNER BUYS 14 CLAIMS

Paid \$10,000 Cash for Them—Sun Butte Record for October—Shine Admits.

President Treweek of the newly incorporated Wabash Mining company of Park City, awarded contracts last evening for the proper equipment of the property to sink 1,000 feet. The contract for machinery was awarded to Hendrie and Bolhoff of Denver, who are to furnish one set of hoisting engines 10 by 15 horse power; two boilers 54 by 15, 75 horse power; two boilers 54 by 15, 75 horse power; one Norwalk 4-drill compressor. The company will also furnish four Ingersoll drills and a 1-inch cable within other equipment. The plant is to be in working order within 30 days, at which time, it is safe to say the Wabash company will have one of the best prospecting plants in the state.

In the meantime the company is installing a small 15-horse power hoist with which to continue sinking the shaft below the present depth, which is 30 feet. The shaft will be hoisted by working and Colonel Treweek says he expects to make about five feet per day.

The lumber for the building is now being smothered and the company is putting them up under the direction of Jack Pape, an old millwright of Park City.

PAID \$10,000 FOR A GROUP.

H. L. Benner Purchases 14 Claims At Battle Mountain, Nevada.

H. L. Benner, former superintendent of the Sacramento, has just bought a group of 14 claims in Battle Mountain, Nevada. The deal was consummated yesterday by the payment of \$10,000 in cash to Will Beckman and Nels Olsen, who have held the claims for several years. Mr. Benner says he has taken hold of the group and intends to make a bonanza out of them. He will leave for Nevada tomorrow to start work on the claims. He says that he can take out \$100,000 net with a small mill, without developing any more ore. He is certain that the rich veins of the surface will be found holding out fairly well in the depths, and he intends driving a tunnel into the mountain on the vein. In this prospecting the vein he will secure a depth of about 1,000 feet. For something over a mile on the outcrop values have been found running as high as \$140 gold besides silver. The average is said to run 20 gold and 30 ounces silver per ton. The group is located 12 miles from the railroad.

BEN BUTLER SHIPMENTS.

Manager Jacobs Says He Expects to Receive \$10,000 This Month.

The Ben Butler of Bingham reached the market today with the first shipment for October. The lot consisted of about 130 tons. Another lot of four cars is also on the way. Manager Jacobs says today that he expects to market 400 tons of crude ore during the month. Arrangements have also been made to handle 600 tons of second class ore now on the dump. This will be handled by the mill this week. As the result of the shipments for October Mr. Jacobs says he expects to take \$10,000. With part of the sum he will pay \$25,000 to the bank. The balance of \$10,000 will be used to pay for the purchase price of the Leona claim. If the mine continues to do as well as the balance of \$10,000, the full price of the claim, it will be remembered was \$13,000.

A \$120,000 SUGGET.

Brought to Vancouver from Headwaters of Spruce Creek, Atlin.

A dispatch from Vancouver, B. C., says: Dawson advices state that the Dominion government roads up Hunker and Dominion creeks were completed and open for freight traffic on the first of the present month. Thus a continuous and uninterrupted highway from the very heart of the city of Dawson is afforded by Hunker and past the mouth of Last Chance, Bold Bottom and Bear, and to Lower Dominion. R. A. Jackson and R. A. Lambert have brought to Vancouver a mammoth nugget from the 1 1/2 diameter of Spruce creek, Atlin. The nugget is five inches long, four inches wide and averages over half an inch in thickness. It is valued at \$120,000.

Returns from the Sunshine.

George C. Moore, under whose direction work is being pursued at the Sunshine company's property, returned from camp last evening, after spending several days underground. He says the mill will be started in next month on ore now exposed on the 200 and 250 levels. No ore has yet been found on the 400, but he says a big body of ore carrying from \$5 to \$3.50 in gold has been developed at these levels. About 200 tons per day will be handled in the mill.

Butte and Boston Dividend.

A Boston dispatch says: The Butte & Boston Mining company has just declared a second dividend. This time it is \$3 per share, as against \$5 the amount of the first one declared in November, 1900. As all but about 1,000 shares of the Butte & Boston stock has been turned into the Amalgamated company, most of that dividend, amounting to \$60,000, goes into the treasury of the Amalgamated.

Rich Quartz From Boise Basin.

Recent discoveries in Boise Basin. Rich quartz mines in this district any person interested in the advance of quartz mining there, says the Idaho Statesman. The Golden Charlotte property, a late discovery, is proving richer than even its finder thought it would be, and now comes bonanza news from the Washington, Charles Balbach, principal owner of that property. Yesterday showed a sample of ore from that vein at the 300-foot level. It is extremely rich in free gold, this material showing a second, third and fourth level of the quartz, which is of the creamy white variety. The gold is in such

MINING NOTES.

The Grizzly of Alta reached the market today with a car of ore.

President D. H. Peery of the Mining Exchange left for California today.

Four cars of ore were on the market today from the May Day of Tintic.

R. G. Raybould sold 1,923 shares of Creole stock yesterday for \$23,750, or 12 cents per share.

The Taylor-Bronson sampler reported four cars of ore from Tintic, four from Bingham and four from Alta today.

Austin Feveller, J. G. Phelps Stokes and S. T. Pearson went to Berlin Wednesday morning to examine into the Nevada company's affairs at that place.

President Francis left for Tintic last evening to inspect the Tanke Con. The sharp decline in the price of the stock is caused through the refusal of the doctor to stand under the stock any longer.

Halley Times, D. M. Hunter has, for \$80, sold to Charles Rothman of Salt Lake an undivided one-sixth of the Doubtful lode on Quigley gulch; and the buyer has sold one-half of his one-sixth to Julian Houtz of Salt Lake for \$100.

The Golden Key Mining company of Provo today filed a copy of its articles of incorporation with the secretary of state. The capital stock is \$20,000 in 10 cent shares. The directors are: Thomas C. Thompson, president; Newell Knight, vice president; Jacob Evans, secretary and treasurer; John R. Twelves and Frank J. Tucker.

Denver Post: At a death of \$75,000 in the well being driven by the Pagosa Springs Company in Arapahoe county, the owner of gas has attained that magnitude which gives the suggestion of a small cyclone. Huge gas chambers, prepared by experts in their reports of oil below, are now being encountered and to a certain extent retard the work of sinking.

ABOUT A NEW CHEMICAL.

The first milestone on the journey toward bloodless surgery has been reached. Its name is adrenalin, that being the title of a chemical compound recently discovered by Dr. Jokichi Takamine, a well known and highly educated Japanese, who is connected with a chemical house that has a local office in this city. Adrenalin is to medicine what liquid air is to science, the only difference being that the chemical is under complete control, with unlimited possibilities before it.

By the local application of adrenalin, in solution of one part to 5,000, operations may be performed on the nose, ear and eye without the spilling of a drop of blood. Such operations have also been performed with adrenalin in solution of one part to 10,000. It may be possible to perform amputations without the loss of blood, which is so disastrous to the patient.—New York Herald.

GENERAL MARKET WEAK.

A Raid on Amalgamated Copper Caused Renewed Weakness Everywhere.

Some Stocks Rallied Feebly, Then Went Off Again—Feeling of Depression Over Everything.

New York, Oct. 16.—Soon after the opening a raid on Amalgamated Copper caused renewed weakness in the general market. Prominent stocks gave way large fractions and Missouri Pacific a point. Sales of Lake Shore were made at 300 compared with yesterday's bid of 280 at the last selling price of 250. Before 11 o'clock the market showed an inclination to move independently of the coppers and prices recovered somewhat, at 11:30 reaching 15 1/2. These rallies were again lost when Amalgamated went below 85 or 2 1/2 under yesterday's close. The market was quiet and out of the lead in stocks covered a noteworthy range.

At 11:30, the market for pressed Steel Car stocks were up 1/4, and Cincinco Sugar gained a point.

Ends were irregular.

The market was disposed to become stagnant with prices generally hanging near last night's level. Amalgamated Copper rallied over a point from the lowest, but the feeling of depression was not appreciably relieved.
