Returns from New State.

yon. Mr. Dederichs confirmed the report published in the "News" during the week in a winze from the tunnel level about 10 inches of ore is in sight. The values are good, but the size of the ore body, the development work paying for itself. With depth Mr. Dederichs believes a mine will be found in the New State or in that vicinity, but he intimates that it will take a small fortune to open up a mine. It will be necessary to sink to much greater depths. Dederichs' opinion before the property will be made to pay.

Discovery of Old Mexican Mines.

Tucson, Ariz., Nov. 9.—A Star special from Guaymas, Mexico, says: The lost Tazapa mines, celebrated in Spanish annals as having produced eighty millions of dollars in silver and gold in the seventeenth century which are described on Spanish maps as being situated in Northwestern Mexico, about fifty leagues from the sea near Doña Ana, have been found. As far back as 1559 Robert L. D'Aunault, a celebrated French explorer, declared the location of the Cienegueta in the Saurita district, Senora, to be identical with the lost Tazapa. The Spanish owners are said to have been ordered by their Indian slaves near the close of the seventeenth century, and it is stated that for 100 years thereafter no one was allowed to enter that region.

A force of men will be sent to Park Valley on Monday next to begin vigorous development of the claims of the Suisie Gold Mining and Milling company, which are situated on Dove creek, a little to the southwest of the Century mine.
