

DESERET EVENING NEWS

Organ of the Church of Jesus Christ of Latter-day Saints. PUBLISHED EVERY EVENING. (SUNDAYS EXCEPTED.)

Subscription prices: One Year, \$3.00; Six Months, \$1.75; Three Months, \$1.00; One Month, .25.

Eastern Office: 104-105 Times Building, New York City.

Conference Pamphlet: There are many inquiries after the pamphlet, to be issued from this office, containing the discourses delivered at the October general conference.

Science and Health: Bodily health is essential to human happiness. How to secure it is one of the most important considerations.

caying animal or vegetable substances. If the source of the evil is found and avoided, much human suffering will be prevented.

It has been found that the germs of typhoid may be destroyed by boiling the water containing them. They are not perceptible to the unaided eye.

Quarantine regulations, established by legal authority, ought to be strictly observed. They occasion much inconvenience.

Dr. T. B. Beatty, secretary of the State Board of Health, who takes great interest in the prevention of the spread of disease, is of the opinion that earth-pits which are commonly used in connection with outhouses where fatted matter is deposited, are great breeders of disease.

We are pleased to learn that he is strongly in favor of the establishment of the dry-earth closet system, advocated many years ago by the Deseret News for places that have not the benefit of sewerage.

These practical suggestions may seem a sort of descent from the philosophical to the commonplace, but, after all, it is the every day affairs of life that are of immediate importance, and bodily health is essential to clear and pure intellectuality.

For some time the Society for Psychological research has widely advertised its experiments for the alleged purpose of proving "scientifically" the existence of man after death.

But Mrs. Piper herself now, in a published statement denies that, as far as she knows, she has had any communication with departed spirits.

At King Edward's coronation no distinction will be made between presidents of republics and crowned heads. A very sensible decision, for just as his majesty says, he honors the country and not its representative simply.

The continuation of life beyond the grave cannot be scientifically demonstrated to mortals, any more than the beauties of color can be proved to one

blind from his birth, or harmony be explained to one whose ears have always been closed to sound. Future life may be accepted on testimony, just as every other fact which, for some reason or other, we cannot personally investigate is accepted as fact on sufficient evidence.

Between the other world and this there is an expense which, ordinarily, mortal man is not permitted to cross. Communication can be held only in God's own way, and for wise purposes.

Looking for Meteors: Astronomers are looking for a shower of meteors again, this week, Nov. 13 and 14 were the dates set for a grand celestial display.

The first time a great meteoric shower was observed so as to attract general attention was Nov. 13, 1833. The display at that time is said to have been something grand beyond description.

Meteors are supposed to consist of combustible matter that is set afire by contact with the earth's atmosphere. They are thought to revolve around the sun in an elliptical orbit, through which we pass annually about the 13th of November, while they pass the same point only once in thirty-three years.

Another French professor has taken French leave. San Francisco having elected a muslim mayor should be assured of a harmonious administration.

Chicago packers are trying to corner the egg market. What is the purpose now that the elections are over?

Senator Lodge declares that "the Monroe doctrine must be rigidly upheld." Why not gracefully uphold?

For two weeks jokes on the Thanksgiving turkey will be in order. Then the turkey will get it "in the neck."

Mr. Kruger is in favor of arbitration if the decision is in his favor. It is the same with most men, and nations, too.

It would be very difficult indeed for the vast majority of the LL. D.'s to give any valid reason why they were made doctors of law.

Last night the whole State was shaken by an earthquake. Last week there was a "landslide." Was there any connection between the two?

An exchange speaks of the tariff regulations in New York as "humiliating customs." It must be admitted that these "customs duty" take down the purse proud.

Breakthrough talked to the labor delegates. They are not used to having such wholesome truths given them, as he told. It is the usual custom to feed them "fat" and to make them believe that they and those whom they represent are the most abused and downtrodden of all mankind.

It is so long since the A. P. A. raised its head that people had almost entirely forgotten it. But it seems that it is not dead. In an address at Berkeley Temple, Boston, the other day, H. F. Bowers, the founder and supreme president of the A. P. A., made a violent attack upon the Catholic church.

The man Longbaugh has been definitely identified as one of the Great Northern train robbers that committed the robbery at Wagner, Mont. He may be sent to that state for trial, the punishment for train robbing there being death.

Li Hung Chang. Li Hung Chang, for years the principal figure in Asia, has passed away. After a life well spent, the aged premier of China was compelled to succumb to insidious disease, and the soul of the man who, more than any other, has dominated and controlled the international policies of the Orient, was sent among the stars.

Kansas City Star. His services to China were of the greatest importance. He early recognized the value of the railroad to the country, but he knew of the conservatism of the Chinese mind and its prejudice against innovation, especially those which interfered with any special territory, and he was over-indulgent in his view of the need of better transportation facilities.

San Francisco Chronicle. Li Hung's disappearance from the scene that was to be the East's opportunity to regain supremacy in the councils of the Chinese court. In that event we may look for a renewal of friction between Russia and Great Britain over Far Eastern affairs.

Chicago News. It is an interesting indication of Li Hung Chang's personal force as an element in China that he was elected virtually as prime minister of that empire for a long time none of his offices entitled him to the prerogatives of such a position.

Milwaukee Wisconsin. Earl Li was born in 1822. Vast changes greater than those of centuries during the preceding era have taken place in his country since that time.

Last night the whole State was shaken by an earthquake. Last week there was a "landslide." Was there any connection between the two?

An exchange speaks of the tariff regulations in New York as "humiliating customs." It must be admitted that these "customs duty" take down the purse proud.

Frank James is going on the stage and will make his first appearance in Zanesville, Ohio, in "Acras of the Desert." In the past he has "held up" the stage; now he will attempt to elevate it.

The war department says that Aguinaldo's captivity is only nominal. The ex-insurgent leader must be impressed with the fact that there is more in a name than mere name.

At King Edward's coronation no distinction will be made between presidents of republics and crowned heads. A very sensible decision, for just as his majesty says, he honors the country and not its representative simply.

Education of the Working classes. "The Philosophy of Eating," "The Hygiene of Clothing," "Surgical Hygiene," "Massage Treatment," and similar topics. There are a number of illustrations.—Health Culture Co., Fifth Avenue, New York.
