

A DAINY WAIST.

The winter girl has ever a great range of selection in buying her outfit for the chilly season that she had as the summer girl, when she revelled in colors and ended by selecting white. Blue seems to be her choice just now and the models shown in this delicious color are legion. This one is unusually dainty and stylish. It is a silk flannel with box-plaits embroidered in brier stitch in white.

The Allegheny County Federation, since its founding in 1894 by Mrs. Hampton, has been a most successful organization. Its efforts are chiefly toward establishing free libraries in Allegheny county. At that time Belmont had the only free library in the county, but during the seven years of the Federation's existence free libraries have been opened in nearly every large town in the county, largely through its influence. A number of these libraries are established in buildings of their own. The Belmont library is housed in a large brick building containing a number of rooms for library purposes, and an assembly hall which is called "Ward Hall." In honor of Mrs. Ward who gave the lot on which the building stands, and assisted generously in its erection. The library at Angelica in the same county is located in a beautiful colonial structure given by Mrs. F. S. Smith of New York. Fillmore has its separate library building with reading-rooms and club-rooms, for which it is chiefly indebted to the efforts of the Wide Awake club of the place. The Monday club of Wellsville looks after the library of that town. Friendship also has a library, and the club-women are waiting to achieve a building for their use. Other towns of the county, Cuba, Bolivar, Andover, and more, have flourishing free libraries, several of them soon to be transferred to buildings erected for their use. Few organizations of a similar character can show a better result than this Federation, which has persisted in one purpose and proved remarkably successful in accomplishing it. The society is a charter member of the State Federation.

Voice Culture.

"That so little effort is directed to the improvement of the quality of the speaking voice is an unexcusable enigma. The average parent scarcely considers the value of voice culture or the relation of the tones in daily use to the child's moral, physical and mental welfare."

"No gift of the Creator is so universally ignored as the instrument of most exquisite and delicate mechanism, the voice organ of human beings. Ignorance of the unlimited possibilities of its correct use is everywhere manifest. Suitable training will render many indifferent voices pleasing, even musical, in their intonation. Professor Corson makes it very clear that the education of the soul is a part of the education of the body, and the perfection of the voice. It is this subtle quality of individual development that is the effectual quality in all work."

"The school should share with the home the responsibility of securing better habits of speaking. The winning drawl sometimes tolerated in recitation proclaims a teacher's shortcomings as well as her pupil's indolence. Educators would do the world great service by inaugurating a movement against faults of the speaking voice, and for the correct use of this sadly neglected instrument. The open-mouthed children of today would soon be taught to guard their throats from dust and germ-polluted air by breathing and through noses. Purer air should be supplied overcrowded schoolrooms. Simple, health-keeping rules of personal hygiene would be inculcated daily. Exercises in vocalization, giving exactness and flexibility of enunciation, would become a part of school routine never to be omitted. All this would surely result in healthier, happier, more useful lives for the rising generation, and the voice beautiful no longer be so rarely heard in the land."

Fashions for Little Girls.

Little girls have returned to pinafores, and very pretty and dainty they are. They are made of all kinds of sheer white materials, and are trimmed with embroidery or lace as fancy dictates, or sometimes merely with tucks or bands of the same material as the body of the little garment. They are made very much like the frocks of some of the gooder run through tiny loops of the goods run through tiny loops of bands about four or five inches below the waist, and tied in the back with a pretty bow.
