MERCUR FIRE.

(Continued from page one.)

NEWS VIA FAIRFIELD.

Fairfield, June 25, 11 a. m.—Word just received here to the effect that not less than 75 per cent of the residence portion of the town of Mercur has been destroyed and that nearly all of the business section has been wiped out by the flames in their furious progress in every direction.

BURNED BUSINESS HOUSES.

Include All in the Town With Million Dollar Loss.

According to estimates by F. D. Kimball, D. J. Corbett, Geo. M. R. E. Airl and others interested in Mercur, the losses will amount to from \$300,000 to \$1,000,000, and the insurance will run from 25 to 40 per cent. The low insurance rates owing to the hazardous risk, and which deterred people generally from insuring their property. It is stated that after the fire had started, the heavy rain, which was accompanied by strong gusts of wind, scattered burning material all over that part of the town, and started fires in number both in localities in the thickly built up business district. It is suspected that the explosions were due to gasoline or glant powder, or both. The flames spread with such rapidity as all the buildings were dying as tinder. The fire department, aided by citizens generally, did everything that was possible to stop the flames, but to no avail. The entire business center was in flames, and before long it became apparent that the town as a whole was the conflagration spread quickly to the Union Mercantile company's large building to the south, and then to McCormick's bank building. In the Reble block were Robinson's salter, Stevenson's clothing house, the Prelie office and a restaurant. The to the north were dry goods house, the old bank building, the Castleman's office and the Palmer hotel, kept by M. P. Gemo, formerly chief clerk at the White House in this city. These buildings were shortly all wrapped in flames. Then across the street was the Telephone company's building, the city hall, and Chinese wash houses, McCullough store, a shoe store, Luff's store, and the department store of Woodruff Bros., Higgins' two-story block, the Mercur meat and grocery company. All these buildings were shortly enveloped in flames. Further to the south, across the street, diverging from the main thoroughfare, were the Proseus house, Mamblin's store, a large frame building, the office of Pres. Chamberlain, and several other buildings. There were a string of smaller structures extending to Johannesburg. To the right of the Union Mercantile building was a string of buildings, including restaurants, saloons and such, and across the street were half a dozen saloons, a two-story vacant block owned by a Mr. Caldwell, the office of the Battery Bros., owned by John McFarland, the old bank building owned by McCormick & Co. and Ed Aris, a restaurant building owned by W. B. McCormick & Co., a baking building, and a string of minor structures continuing down the street. As near as can be learned from dispatches during the day, the flames took the deposit, and that none of the mill properties were touched. A special train from the Short Line went down this afternoon carrying E. D. Kimball, Fred Derr, G. E. Aris, Mr. Higginbotham, Short Line officials, and several prominent citizens interested in Mercur.

THE FAR EAST.

First of Its Kind to be Established By American Graduates.

TO BE ON BROADEST LINES.

To Carry on Evangelical, Medical and Educational Work in Large Student Center in North China.

New Haven, Conn., June 25.—One of the most important announcements of the Yale commencement season was the reference by Pres. Hadley, in his address this morning to the plan of a group of Yale men to establish a mission in the far east. This mission, which is the first of its kind to be established by graduates of any American college, is to be conducted along the broadest lines, carrying on evangelic, medical and especially educational work in a large student center in North China. It is to be undominational and independent of existing societies, but will work in harmony with them, and in specially close sympathy with the American board. This last named society has promised its moral support and its co-operation in certain practical matters such as the purchase and distribution of supplies. The mission is to be under the leadership of Rev. Harlan P. Beach of the class of 1878, and assisted by a number of Yale men who have volunteered their services, and from 1882 to 1890, a missionary in China.

The mission is an entirely voluntary association of Yale men and will have no official connection with the university but many of the officials of the latter, including the president, are among its strongest supporters. It is to be controlled by a council of 40 men who have consented to serve in this capacity, with the following officers: D. D. Rice, vice president, Rev. Edwin H. Cushman, president, William S. Hoar, secretary, William Stone, of New York; treasurer, Pierce Welsh, of New Haven.

The Congregational, Episcopal, Presbyterian and Baptist churches are thus represented among the officers of the council. All details of administration will be left to an executive committee, consisting of the president and the following Yale men who have developed the plans for the mission and raised an installation fund of about \$20,000: Deans Sanders and Wright; F. Wells, of Brigham, of the governor's staff, and Yale James W. Cooper, D.D., Yale corporation; Rev. H. T. Beach, secretary of the Student volunteer movement; Arthur Williams of the class of 1886; Prof. Edward B. Reed, of Anson Phelps Stokes, Jr., secretary of the university.

Prof. Reed will act as executive secretary of the mission. The first of the class in 1886, with another recent graduate, will go to China this fall, spending a year studying the language. It is expected that in due season, Yale will send out a score of men to this mission, who will work for Christian education in China.

INSURANCE ON KING'S LIFE. Would be a Staggering Blow to English Companies.

New York, June 25.—In the event of the death of King Edward VII., the insurance companies of England will suffer the most staggering blow known in the history of that branch of financial investment.

It will cause a loss of tens of millions of dollars to the regularly organized life insurance companies of various other kinds, which have taken heavy risks on the King's life at high rates of interest.

American life insurance companies, however, will suffer no loss because, in this country, to obtain life insurance protection the applicant must establish an insurable interest in the person insured. King Edward carries the enormous sum of \$1,500,000 placed with English companies. This is on personal policies upon which the president has no insurable interest.

The total risks on his life, on policies by business men is placed at \$21,000,000.

The case of British agents to carry personal insurance of \$4,000,000 as well as \$1,500,000 on the life of the czarina and \$500,000 on that of Grand Duchess Olga. The emperor of Germany carries \$3,000,000 personal insurance.
