

TELEGRAPHING WITHOUT WIRES

Highly Successful Undertaking on The Pacific Coast.

Commercially It is of Great Importance—Interception of Messages Prevented.

Special Correspondence.

Santa Catalina Island, Cal., March 18.—While other places have wireless telegraph stations, it is the boast of the Santa Catalina islanders that their locality possesses the first station in the world to be put to practical commercial use.

The system used here differs materially from that of Marconi, one of the principal points of difference being the absence of the coherer used by Marconi to pick up the electric waves.

The equipment of the Catalina is-

ONLY PARTLY TRUE.

Popular Ideas Regarding Catarrh.

It is the common belief that what is popularly known as catarrh is simply a chronic cold in the head.

There is, however, an old enemy disguised by many confusing names, for instance, laryngitis, pharyngitis, tonsillitis, gastritis, stomach catarrh, cystitis and nephritis, catarrh of the bladder and kidneys.

Therefore, although the location of the trouble gives it various names, in reality the sum total is catarrh and nothing else.

Do not make the mistake of thinking you have no catarrh because the head and nose appear to be clear.

The surest treatment for every form of catarrh is an external remedy which acts especially on the blood and mucous membranes; such a remedy is the new preparation sold everywhere by druggists under the name of Stuart's Catarrh Tablets.

Stuart's Catarrh Tablets contain in highly concentrated form, bloodroot, red gum of the Eucalyptus tree, and many other equally valuable curative elements, and no one who suffers from any form of catarrh and has seen the inefficiency of douches, sprays and powders will ever go back to them after once trying so pleasant a preparation as Stuart's Catarrh Tablets.

All druggists sell Stuart's Catarrh Tablets at 50 cents for full sized package and the regular, daily use of them will effectually cure this troublesome and dangerous disease.

land station is much like that of the well known Marconi stations. It consists of an engine and a dynamo, induction coil, Morse key, spark balls and mast.

The equipment of the Catalina is-

30 years telegraph operator and train dispatcher for the Pennsylvania railroad. He is enthusiastic over the success already attained by wireless methods.

According to Mr. Sener, climatic changes do not have a noticeable effect on wireless telegraphy as practiced on the coast, with the exception that while it is raining or is very foggy the messages seem to come more clearly.

Similarly the running of trains during cyclonic and stormy weather will be greatly facilitated, and already the Southern Pacific Railroad company is experimenting with the system with a view of ultimately substituting it for the regular telegraphic method used in the west.

FARM AND GARDEN NOTES.

The Road to Success.—Farm success depends on knowledge, on industry, on energy and thrift, on saving and making the income exceed the outgo, on good bookkeeping and management, on ready adjustment to new conditions, on love of the business and on good wife, who takes an interest in her husband's work.

For several weeks before I commenced using Paine's Celery Compound I had a tired and all gone feeling, my blood became impure, and I was daily losing flesh.

My wife is a character of fine mind. What a nuisance does a person make himself when, having no work of his own, he becomes a busy body.

It is a common mistake to suppose that sheep and chickens do not need water because they can go without it for long periods.

If the grape vines have not been pruned this work should be done at once and no vine requires more severe cutting.

thors, to represent the martyr character of the reform party in the Protestant reformation of the sixteenth century.

This symbol has been used in all the churches of this denomination to commemorate the martyr character and the sufferings endured by the Reformed churches in their beginnings and to express the confidence of the followers of this faith in the triumph of God's truth and life in spite of inimical environments and painful oppression.

THE MODERN HOTEL KITCHEN.

The kitchen arrangements of the "modern hotel" are on the first basement floor. There is a chef, but so far as I could see, he does not cook.

Eighteen thousand are required every 24 hours. Boiled eggs do not get overdone. A perforated dipper containing the eggs drops down into boiling water.

On another part of this floor is the dishwashing, where great galvanized sheets of plates are put into various solutions of potash and clean rinsing water—all so burning hot that the dishes dry instantly without wiping.

It is, of course, quite untrue that Queen Victoria habitually dined the royal cooks, but it is the fact that her majesty has on occasion knitted her husband's hose, using for the purpose a rather coarse and warm make of Scotch fingering, without any fantastic pattern such as is affected by the Cockney tourist in the Highlands.—Modern Society.

RICHEST CITY IN EUROPE.

The good city of Basle plumes itself upon being, in proportion to its inhabitants, the wealthiest city in Europe, if not in the world.

KNITS, BUT DOESN'T DARN.

It is, of course, quite untrue that Queen Victoria habitually dined the royal cooks, but it is the fact that her majesty has on occasion knitted her husband's hose, using for the purpose a rather coarse and warm make of Scotch fingering, without any fantastic pattern such as is affected by the Cockney tourist in the Highlands.—Modern Society.

Miss Alice Bailey, of Atlanta, Ga., tells how she was permanently cured of inflammation of the ovaries, and escaped the surgeon's knife, by the use of Lydia E. Pinkham's Vegetable Compound.

The universal indications of the approach of woman's great enemy, inflammation and disease of the ovaries, are a dull throbbing pain, accompanied by a sense of tenderness and heat low down in the side, with occasional shooting pains.

"I had suffered for three years with terrible pains at the time of menstruation, and did not know what the trouble was until the doctor pronounced it inflammation of the ovaries, and proposed an operation."

"I felt so weak and sick that I felt sure that I could not survive the ordeal, and so I told him that I would not undergo it. The following week I read an advertisement in the paper of your Vegetable Compound in such an emergency, and so I decided to try it."

"You surely deserve great success, and you have my very best wishes."—Miss ALICE BAILEY, 50 North Boulevard, Atlanta, Ga.

Another woman saved from a surgical operation by Lydia E. Pinkham's Vegetable Compound. Read what she says—

"I received a little book of yours and after reading it, I concluded to try Lydia E. Pinkham's Vegetable Compound, and I am now a well woman. I shall praise your medicine as long as I live, and also recommend the same to anyone suffering as I was."—Mrs. MINNIE OTTOSON, Ohio, Iowa.

All sick women would be wise if they would take Lydia E. Pinkham's Vegetable Compound and be well.

NEW CHURCH TO BE ERECTED

Roosevelt Will Have Handsome Structure to Worship In.

Small and Crowded Chapel of Grace Reformed Church to be Superseded.

Special Correspondence. Washington, March 23.—The building in which President Roosevelt has worshipped, since his inauguration is one of the humblest church edifices in the city.

This gratifying result has been largely accomplished through the zealous efforts of the pastor, Rev. Dr. John M. Schick, though the project of building a new church was advanced before his pastorate began.

The movement for a new church was begun in 1893. Dr. Schick became pastor in 1895 and at once threw himself into the work of increasing the building fund.

The new Grace church will have a feature entirely new in church architecture in that the decorations on the face of the structure will tell the history of the Protestant reformation of the sixteenth century.

On either side of the central entrance doors are the shields of Zurich and Geneva. The places in which Ulrich Zwingli, the first proclaimer of the reformation in Switzerland, and John Calvin, the master mind of the same reformation, presided their labors.

The patron under whose auspices the Heidelberg Catechism was prepared is represented as supported by a female figure, symbolizing the fact that in the beginning of the denomination's work in America it was supported by the church in Holland.
