ENGINES CRASH INTO EACH OTHER

Result is Four People Dead, Two Dying.

LOCOMOTIVES INTERLOCKED

Remained on Track—Post and Baggage Cars Went Over Embankment Into the Lake.

Halifax, N. S., April 12.—Four persons killed, two fatally hurt, at least one missing and several others slightly injured, is the record of a head-on collision on the Inter-Colonial railway, which occurred just before midnight last night near Windsor Junction, 17 miles from Halifax. Express Driver William Wall, Express Fireman Michael Oakley, Freight Fireman Hill, Freight Brakeman Thorp.

FATALITY INJURED. Freight Driver Copeland. A tramp named McCreary. The trains in collision were the Canadian Pacific railway express from Montreal and Boston for Halifax and a fast freight from Halifax for Montreal. The conductor and driver of the freight had orders to take the siding at Windsor Junction and set the express cross, but for some unknown reason Driver Copeland of the freight ran past the junction on the main line and met the express which was two hours late was traveling about 45 miles an hour. Both trains were hauled by new and powerful locomotives and they crashed together on a level piece of road skirting a lake. The engine crew of the express and Fireman Hill of the freight died almost immediately after the crash and Brakeman Thorp was instantly killed. The locomotives locked together and remained on the track. The postal and baggage cars went over the embankment down into the lake. Two railway mail clerks in the postal car were shaken up. Their car landed right side up and began to fill with water, but they escaped by climbing through the window.

GOULD ON THE WEST. Returns from His Tour of Inspection and Reports Good Conditions. Lake Wood, N. J., April 13.—After a careful survey of conditions in the west, George J. Gould, who has returned from a trip over the Missouri Pacific and Wabash lines, says that the present era of prosperity, which the west is enjoying, will continue for at least another year. "I have never seen wheat look as well as it does today. It is a bit too early to speak of corn or cotton, but as the soil is thoroughly watered the crops should thrive amazingly. The railroads won't have any trouble in moving the great wheat crop, but I think we will all be short of cars in the fall if there is a big crop." "The physical condition of the western roads was never better than it is now. I heard no talk of money shortage while I was in the west. The banks are holding their own balances in their vaults, and they won't have to draw on New York for money to move crops, and from what I saw I believe that this practice of drawing on New York, as it is called, will be an uncommon occurrence in the future. The western bankers have their own money to lend to their own people unless money should get so high in Wall street as to make it profitable to send it east. From all indications I can see a full year of prosperity for the west." Mr. Gould referred to the St. Louis exposition in very enthusiastic terms. He visited the grounds twice and was charmed by the people of the city. "I saw," he said, "two things in connection with the fair need to be very carefully considered. One is that the city has not awakened to the great need of adequate hotel facilities. Another important thing is the lack of adequate transportation facilities to and from the fair grounds. St. Louis seems to have done absolutely nothing in this matter."

HELD UP IN CHICAGO. Three Masked Men Rob Passengers On a Street Car. Chicago, April 12.—Three masked men held up a street car near Garfield Park in this city at an early hour today and robbed seven passengers, the conductor and motorman of about \$100, a gold watch and some jewelry. The highwaymen boarded the car near Sacramento avenue. One kept guard on the front platform, one on the rear, while the third entered the car at the point of a revolver forcing the occupants to give up their valuables. The only woman on the car fell on her knees, praying for mercy. The matter was not reported to the police for several hours and no arrest has been found to what is the boldest hold-up of the kind in this city since 1895.

Earliest American Civilization. San Francisco, April 13.—The earliest American civilization, far antedating the generally accepted limits of pre-Columbian cultures, has been traced in Peru by Dr. Max Uhlen, director of the anthropological excavations and explorations of the University of California in that country. Where, heretofore, Inca tradition had led scientists to believe that Peruvian civilization extended back only a few centuries before the coming of the Spaniards, the archaeological work of Dr. Uhlen has established the fact that a great civilization flourished 2,000 years earlier, at the least estimate, and that a cultured race, of higher development than the Incas, was in existence before the Trojan war. This remarkable discovery follows as a result of the studies made in the two expeditions which Dr. Uhlen led in recent years at the expense of Mrs. Phoebe Hearst and under the auspices of the University of California.
