

# EDUCATIONAL

## UNIVERSITY OF UTAH.

Salt Lake City.—Hon. Nephi L. Morris will deliver the Baccalaureate sermon to the University graduates this year. On commencement day the address to the graduates will be delivered by State Senator Allison.

President Kingsbury went to Cedar City last Tuesday to visit the Branch normal. He will return on Monday.

Professor Babcock will speak before the district Sunday school convention of the "Mormon" Church this evening at Provo.

Mr. Joseph Cannon was the chapel speaker this week. His subject was "Russia." He gave an interesting account of every day life in Moscow and St. Petersburg. Mr. Cannon is a graduate of the University, and was given a hearty greeting by the students.

Tomorrow evening Professor Byron Cummings will speak on "Greek Gods and Their Temples" in the Eleventh ward. His lecture will be illustrated with stereopticon views.

Professor Stewart recently received a letter from James J. Kirk, state superintendent of the public schools of California, stating that on Jan. 29 the State Board of Education of California accredited the normal department of the University of Utah. Such action enables graduates of our normal school to receive grammar school certificates in California without examination.

Supervisor Horace Cummings has been appointed to take charge of the Utah school exhibit at the world's fair, Mr. Welch, formerly principal of the Chicago normal school, has been employed to supervise the nature work at the training school while Mr. Cummings is away.

Members of the Ladies' Authors' club were shown through the University on Wednesday by Dr. Merrill.

Mrs. Alice P. Norton, professor of home economics at the University of Chicago, has been employed to give a course of lectures on home economics before the state summer normal institute in June.

Today Professor Stewart addressed the Sanpete county teachers at Ephraim.

Yesterday Professor Marshall went to Emery county in his official capacity as deputy state superintendent of public instruction.

On account of the recent wet weather, the "Varsity" athletes have done no outdoor work as yet. Interest in track work is increasing. No doubt the "Varsity" will develop some of the best athletes this year. The athletic council has decided not to put a baseball team in the field.

## SALT LAKE CITY SCHOOLS.

Salt Lake.—The last number of the High school paper, the Red and Black, contains some very good reading matter. Of especial interest are the letters from former graduates who are now prospering in colleges in the east and west.

The French play, presented by members of the French department, of the High school was reported a success.

The past two weeks have been strenuous ones for the city teachers. The amount of mental activity demanded for a full appreciation of the admirable presentations by Prof. Clark has taxed the powers of pedagogues, who have been attracted to the lectures, to a great extent. The condition of the average teacher can be duly appreciated when the fact is considered that the day spent in the school-room draws heavily upon the teacher's strength, and leaves her in no perfect condition to expend much further mental energy. In spite of this unfavorable condition, interest in the lectures and interpretations has not abated—a high tribute to Prof. Clark's ability.

No principals' meeting was held this week.

Miss Pollock cancelled all meetings with grade teachers for the past week.

Miss Ferron of the Fremont was ill last week. Mrs. Johnson did substitute work during her absence.

Supervisor Wetzel's meetings with grade teachers will be resumed the coming week.

Principals are soon to send in their recommendations for teachers for the ensuing year.

Mail matter failure is being received by the teachers, owing, it is thought, to attend some of the summer schools throughout the Union.

It has now been definitely determined that Utah shall have no educational exhibit at the St. Louis fair.

The High school and its many friends are fondly anticipating the German evening at Unity hall, on Friday evening, April 8. A comedy, fine singing and a jolly dance with excellent music has been prepared for the occasion. The proceeds of the entertainment, an admission price is 25 cents—shall serve as a nucleus for a gymnasium fund for the High school.

## L. D. S. UNIVERSITY.

Prof. Jensen visited Provo this week and Prof. Miller visited before the Sanpete county teachers at Ephraim today.

Our students again had the privilege of attending one of the Clark recitals in the Assembly Hall this week at the nominal price of ten cents each. The hall was packed as usual and the enjoyment of the audience was up to the standard.

The school song, "Our Alma Mater," has been revised so that it now fits the music of the old song, "Annie Lytle." Formerly the music had to be slightly changed. The revision will make the song go with a much better swing, and it will be rehearsed next week.

Next year Prof. Bowen will devote his entire time to physics and physiology. This year he had had chemistry in addition. The engagement of the new professor of chemistry will enable a better division of labor than has hitherto been possible between these two branches.

Mr. J. C. Thomas, S. B. in chemistry, of Harvard university, will be the professor of chemistry in this institution next year. Mr. Thomas is now engaged as analytical chemist with one of the large manufacturing firms of St. Louis. His acquisition is regarded as an important addition to the faculty. We learn from the business college that Miss Georgia Whitehead, one of our former business students, was placed this week with R. G. Dun & Co.; that Miss Josephine Christianson is now

employed with the Consolidated Wagon & Machine Co., and that, in consequence of the transfer of a number of students to Mrs. Evans' shorthand class, it has been necessary to place additional seats in her room.

The most notable feature of this week in school was the stirring address of Prof. Clark to the students last Wednesday morning. The committee in charge of the art collection for Barratt hall met Wednesday morning and organized their work of collecting from the students the small assessment they have voluntarily levied upon themselves for the purpose of making a collection of art works.

The general chairman of the students' art committee is Joseph B. Harris, president of the Students' society. The members of the sub-committee are as follows: Robert R. Johnson, secretary; Inez Rhead, first year; H. J. Richards, second year; Maud Neely, third year; Maud Baxter, fourth year; C. H. Sprague, commercial.

The committee on athletics and amusements has decided to purchase a set of hand instruments. They will cost about \$700. Mr. Sweeten will be the leader of the band and the prospects are that we shall have a good orchestra. There will also be an orchestra. It has already been remarked in public that the music of our band excels in sweetness that of any similar organization that we have heard here.

Under the guidance of President Bishop, Wm. B. Preston, the work of improving the grounds in front of the main buildings is progressing rapidly. The stone footings and gate columns and all the debris has been removed from the grounds. Lawn grass is to be sown and trees and shrubs will be planted. The cottages on the corner will shortly be removed.

The committee on students' art collection reported on Friday morning that Professor Clark had consented to select the first fifty dollars' worth of pictures in Chicago early in April. After that, he said, the students should do all the work and make their own selections. B. Harris, chairman of the collection committee, announced the members from each department who have the matter in hand.

The '05 class held an interesting meeting on Thursday. The class president, Lorenzo Snow, presided. The following program was rendered: A song by Miss Alice Butler, entitled "Face to Face," a recitation by Miss Florence Aveson, entitled, "Specially Jim," a recitation, "Old Folks at Home," by Mr. Joseph Cornwall; a song by Miss Edgardina Parry, "Sail On, Little Children," a recitation by Miss Zina McRae, entitled, "Killing a Chicken," Miss Ada Johnson rendered a selection on the piano, "Old Black Joe." By request of the president, Miss Aveson recited another piece, "The Irishman."

A motion was made for the election of a new president, as the former president had discontinued school. The motion proceeded and Harold Robinson was declared elected to this office.

## BRIGHAM YOUNG UNIVERSITY.

Provo.—President Lafayette Holbrook of the Utah stake met last Monday morning with the students of the various domestic organizations included within the Utah stake, and gave them a practical talk on the principles involved in good citizenship.

Students of the Commercial school are gleeful over the fact that the majority of the track team are chosen from their organization. They believe this fact augurs victory for them in the interclass athletic contest soon to be held.

Prof. A. C. Lund is given the honor of furnishing half the program to be held in the Salt Lake Tabernacle on Tuesday evening, Oct. 5, for the benefit of the Stockholm meetinghouse. Our famous university quartet will probably, therefore, be heard on that occasion.

The midwinter semester came to a close yesterday, and in view of the fact that a large number of students will thus be leaving for their homes, the preparatory school class gave a party last night in the gymnasium hall in honor of the departing class.

The Froquois theater disaster seems to be working results as far away even as Provo. The city council has ordered changes made whereby the doors of all public buildings, saving outwards, two of the doors in the High school building and one in the College building had to be changed.

Three of the missionary students, viz. Elder Altonzo Reed of Oakley, Ida., Elder William Snyder of Cedar Fort, and Elder John Cliff of Park City, have received calls to missions next June. The last two have discontinued their studies with a view to making the necessary financial preparation.

The Speech Improvement club is to listen, at its next session, to a debate on the proposition, "Resolved that the Personal Influence of Woman is Greater than that of Man." Contrary to what one might expect from the gallantry of these days, each sex is to champion its own cause. There will be three speakers on a side.

President Brimhall has just received a very interesting letter from Prof. Wolfe, who is at present in the office of the Millennium Star at Liverpool. Elder Wolfe is in good health and full of the spirit of his mission. From President Grant and Elder John O. Mellor come high praise for the literary quality of work of the Star under Prof. Wolfe's management.

Elder Ernest Wright of Salt Lake City, who has until lately been engaged as machinist in the R. G. W. shops, has been called on a mission to Great Britain. Before leaving he took occasion to call on a number of his friends. Those who are at present in missionary companions with him in Samoraya was a guest of Prof. Clark and visited the school one day this week.

The grading necessary to fit Temple hill for campus purposes has been going on for nearly two weeks and will probably be finished today. The leveling will be done next week. In consequence of this delay, caused by the unusually rainy weather, it has been decided to postpone the interclass athletic contests. They will take place on April 16, instead of March 28, as previously arranged for.

And now the kindergarten teachers have become ambitious to have the best quarters in the state. As the preparatory school will be taken from the training school building next year, three comfortable rooms on the ground floor will be allotted to the kindergarten. Those who are made to communicate with each other by means of a telephone with curtains. The rooms are to be painted, papered, and decorated to

make them suitable as ideal training quarters.

The faculty placed the various domestic meetings in the hands of the student officers, last Monday morning, and took occasion to have their photos made during that hour. The result was by no means disastrous to the plate of the photographer; on the contrary, the picture is the best the teachers have ever had taken. The group is made up of 32 faces, and half a dozen teachers were unavoidably absent.

Sweeping changes are to be made in the form of the new catalogue. The training school and the kindergarten school are to become departments of the normal school. This is the relation they have really occupied in the past; the change will therefore merely accede to the fact, that it will make a material difference in the appearance of the annual. A new school is to be created—that of art and manual training. The departments of drawing, manual training, domestic science, and domestic art will be so correlated as to permit a three-year course leading to a diploma in the new school.

A very interesting elocutionary recital was given to a large audience in literary society last Saturday evening by students of Miss Nelke's classes. The following is the program: "How Persimmons took care of the Baby," Miss Genevieve Dusenberry; "Jephtha's Daughter," Miss Nora Young; "The Fisher Party" and "Our Hired Girl," Miss Emily Smith; "The Relief of Lucknow," Miss Edna Berg; "After Sixty Years," Miss Viola Bushy; "My Chaperon" and "The Schoolman's Courtin'," Miss Sadie Preston; "Higher Culture in Dixey," Miss Emma Woodhouse; "A Scene from Ingomar," Miss Pearl Adams; "Under the Wheel," Miss Hattie Redd; "Angelina," Miss Beulah Storm; "Bobbie Shafte," Miss Hannah Dunn. A piano solo was given by Miss Borg.

A delightful concert was given last Wednesday night by the University band and orchestra. As the admission was only nominal the house was crowded in spite of the threatening weather. Two selections were given by the orchestra, entitled respectively, "The Palm" and "The Night Larks." The following numbers made up the rest of the program, save for the encores: Violin Concerto, Mr. Snow; trombone solo, Mr. Jepperson; violin quartet, Prof. Miller, Miss Edmunds, Miss Thueson, and Master Booth; cornet duet, Mr. Fjeldsted and Mr. Hawkins; violin solo, Miss Edmunds; brass quartet, Messrs. Sonner, Fjeldsted, Hawkins, and Duke; Cornet solo, Mr. Fjeldsted; violin solo, Master Booth. The last named is a ten year old genius from Nephi, who has evidently a bright future in the musical world before him.

## BRIGHAM YOUNG COLLEGE.

Logan, Utah, March 24.—The grand ball given last Friday night by the band was one of the greatest social events of the year. There were not quite so many present as usual, and the hall was not too crowded. The music rendered by the college band and aided by the college orchestra was very good.

The Usona society met on Tuesday evening in 15 and rendered a very interesting program.

Instructor Merrill in the speaker in devotional exercises on Wednesday morning. He gave some very profitable advice to the students, exhorting them to prayer, and showing the power and strength they would be able to attain in their pursuits after knowledge if they would seek the aid of the Almighty constantly.

The college has once more become the happy recipients of a very valuable gift. Mrs. Luna Y. Thatcher has given to the musical department the handsome sum of \$510. This amount, together with a very generous act on the part of the Thatcher Music Co. has enabled the department to become possessor of three high grade silver pianos. Not a cheap grade piano, as was long ago placed on the market, but a high grade piano in strictest sense of the term. It is impossible to express our gratitude to Mrs. Thatcher for her most valuable gift, as well as to the music company, for their generosity.

Prof. Hall lectured before the teachers of Weber college assembled in Ogden last Saturday.

The musical department, under the direction of Prof. W. O. Robinson, pursuant to many urgent requests, will repeat the performance of the opera "Pauline," in the Thatcher Opera House on the 29th of this month. Prof. Robinson has also had many pressing invitations from other near by cities, but he is able to give the performance in a few places. Friday evening the company will go to Lewiston, and Saturday night to Smithfield.

Besides the performance the opera company will give next Tuesday night at the Opera House, they, in connection with the management of the house, Geo. W. Thatcher and B. G. Thatcher, will also give a complimentary performance to the old folks of Cache stake. This performance will be given on Tuesday afternoon.

The college is just in receipt of a new 60-horse power boiler, which will at once be installed in the boiler and engine house. Heretofore it has been impossible to keep the buildings lighted and heated at the same time. This difficulty will now be obviated.

President Linford will go to Salt Lake on Saturday to meet with the board of examiners.

H. G. Hayball, a prominent merchant of Logan, is giving away a high grade piano to the school in Logan receiving the highest number of votes. So far the college has kept ahead, but the contest is becoming interesting. We hope our friends and patrons will still continue to vote for the college, as pianos will be much needed here to meet the growing demands of the music department.

## WEBER STAKE ACADEMY.

Ogden.—Prof. Lund last Friday at devotional, addressed the students on the habits formed in their school life. If the student will note just a few things he said, it will prove an everlasting benefit to them.

March weather has a tendency to keep the students at their studies. Very few are discontinuing, yet the faculty does not anticipate that very many will drop out before the close of school.

The lecture committee has a movement on foot, which, if it develops, will offer some advantage to the students, especially the normals.

Principal McKay met with the night school Friday evening and gave the boys a very profitable talk upon their present opportunities and their responsibilities as prospective missionaries.

Prof. Bradford speaks to the Joint sessions of the M. I. A. at the Fourth ward Sunday evening.

One of the most delightfully served repasts that have ever been given in the academy was tendered the Sunday afternoon at the home of Mrs. Summitt, Boxelder and Weber, together with the visiting members of the general board, last Sunday afternoon on the occasion of the Sunday school district convention. The banquet was a most successful one. The dinner, which was served by the academy girls under the direction of Mrs. David Eccles.

Prof. Nelson made a trip to his old home, Tooele, last Friday, on business. He returns Sunday evening.

Englah III has just finished the reading of Hamlet and a very profitable course it has been, more especially because of the impetus produced along this line by Prof. Clark's lectures.

## STATE BRANCH NORMAL.

Cedar City.—A number of students and teachers visited Parowan last Saturday. The concert given by the B. M. S. Orpheum club is said to have been a success, and enjoyed by the Parowan people.

Mr. Driggs gave an illustrated lecture in Kanarra last week on "The Yellowstone National Park." Mr. Ward spoke to the people of Enoch in their afternoon meeting the same day.

The physical chart completed the study of "Light" Wednesday morning with an examination. The class will now begin studying "Electricity."

Miss Spencer gave a selection from Longfellow in chapel Wednesday morning.

The domestic science class expects to begin work in the new building next week.

Mr. John Platt, a former student, visited school Monday and spoke in chapel.

The dance and program given by the Forensic society last Friday evening was a complete success. It began at sharp and continued until the program was short and spicy. The music furnished by the normal band was so inspiring that 11 o'clock came too soon for the dancers.

At Student's chapel last Friday Henry Matheson gave a talk on "The Power of Kind Words," and Miss Mamie Taylor and Esther Dalley sang.

English C is studying Shakespeare's "Merchant of Venice," and English B his "Julius Caesar."

Prof. Lewis gave a lecture in Parowan Sunday last, under the auspices of the M. I., entitled "Safeguards of Life."

## AGRICULTURAL COLLEGE.

Logan.—A meeting of the Alumni association was held today to arrange for the coming commencement.

President Kerr went to Salt Lake on Thursday.

The winter course work in mechanic arts and domestic arts closes next week. The attendance this year has been exceptionally large and the work satisfactory.

Dr. Townsend of the department of agriculture was a visitor at the college last Saturday. He delivered a brief address at chapel in the morning and addressed the Agricultural club in the afternoon.

Representative Austin of Utah county, was an interested visitor at the college last Saturday. He delivered an address to the agricultural students on sugar beet growing.

A genuine treat was the portion of the large number of students and townpeople who gathered at the assembly hall last Saturday evening. Mr. Igleheart, manager of the Salt Lake Herald gave a very interesting lecture on the development of the cartoon and its place in the modern newspaper. Mr. Lovey, the Herald cartoonist followed with an illustration of how the work is done; he elicited much applause by producing with a few strokes of the crayon, caricatures of many men of local and national repute. Igleheart, Mr. and Mrs. Lovey took lunch with the domestic science department and were shown about the buildings and grounds in the afternoon.

Mr. Wm. Bauer, manager of the Bauer Piano Co., of New York, accompanied by his wife, visited the college last Monday.

Prof. Peterson has just installed a new pair of balances in the assaying room.

The committee having the work in charge, have shipped the exhibits to the Louisiana Purchase Exposition. The work consisted of examination papers from the various college classes, and many boxes of work from the various laboratories and manual training departments. Among these are complete sets of exercises in carpentry and forging and specimens of machine work in wood and iron. From the sewing rooms were sent cabinets containing hand and machine models, draftings and waist linings showing the method of finishing on the inside, portfolios of textiles and draftings, many pieces of underwear, a shirt waist and waiking skirt, an evening gown, an empire gown and a tailor-made suit. This work was all done by the students of the college and is certainly very creditable. A piece of work from the machine shop worthy of special mention is a complete watch-maker's lathe.

## AN ABSOLUTE NECESSITY

So Think at Least One Traveling Man.

I would as soon think of starting out without my mileage books and grip as to start out on a trip without a box of Stuart's Dyspepsia Tablets in my valise, said a traveling man who represents a St. Louis hardware house. Why? Because I have to put up at all kinds of hotels and boarding houses. I have to eat good, bad and indifferent food at all hours of the day and night and I don't believe any man's stomach will stand that sort of thing without getting, anyway I know mine won't. It had to have something to break the fat and Stuart's Dyspepsia Tablets is the crutch I fall back on.

My friends often "josh" me about it, tell me I'm an easy mark for patent medicine fakery, their advertised medicines are humbugs, etc., but I notice that they are nearly always complaining of their aches and pains and poor digestion, while I can stand most any old kind of fare and feel good and ready for my work when it needs me, and I believe I owe my good digestion and sound health to the daily, regular use of Stuart's Dyspepsia Tablets, year in and year out, and all the "joshing" in the world will never convince me to the contrary.

I used to have heartburn about three times a day and a headache about three or four times a week and after standing for this for four or five years I began to look around for a crutch and found it when my doctor told me the best in the vestment I could make would be a fifty cent box of Stuart's Dyspepsia Tablets, and I have invested about 50 cents a month for them ever since and when I stop to think that that is what I spend every day for cigars, I feel like shaking hands with myself for I can keep my stomach and digestion in first class order for fifty cents a month. I don't care for any better life insurance.

My friends, if you are the most popular of all stomach good doctors and that they have maintained their popularity and success because they do as advertised. They bring results, and results are what count in patent medicine as much as in selling barbwire.

## The Work of a Young Salt Laker; Creates Sensation in Art World.

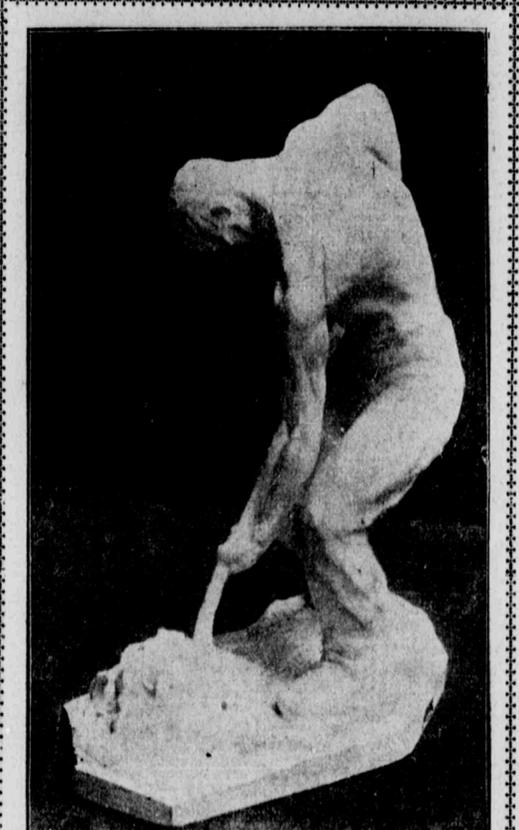

MAHONRI M. YOUNG, the well known Salt Lake artist, is winning additional honors in Paris. In fact, he was the sensation of the recent exhibition of the American Art association in that city, as is indicated by papers at hand.

In a cablegram to the New York Herald, he is given the following notice, headlined and all: "Young Sculptor an Art Sensation. Mr. M. Young's talent evokes attention of the American Association's exhibition." The notice itself: "The midwinter exhibition of the American Art association developed a surprising amount of good work. Besides pictures by such well known young painters as Walden, Faulkner, Connel, Millner, Maurer and Miller, a sort of sensation has been caused by the advent of a young sculptor, Mr. M. Young, whose exhibition is one of the hits of the show."

In the European edition of the same paper, the art critic gives Mr. Young the following tribute: "I may mention here one of the surprises of the exhibition: the advent of a Lochvain. This is M. M. Young, who, in two small statuettes and two pencil drawings,

plants a reputation which, I believe, will grow." Accompanying this notice are a number of pictures of gems of the exhibition and among them all of Mr. Young's contributions appear. The statuettes are entitled "Toil" and "Rest," respectively. The first shows a figure lifting a shovel full of earth and rock—simple in conception, and the other a laborer who, worn out with toil, has fallen asleep, his head drooping forward almost to his knees, while sitting upon a rock. They are both worked out with the skill of a master and each tells a story more forcible than one usually finds in high-class paintings. The other entries by Mr. Young are shown in the accompanying illustration.

Mr. Young is the son of Mahonri and Agnes Young. For a long while he was in the employ of local papers, first as an illustrator, then as an etcher. A little less than two years ago he went to Paris, after a course in art in New York, and he has been successful from the very beginning of his work. Mr. Young draws, paints and etches beautifully, but his ambition is sculpture, and, evidently, he is in a fair way to realize it to its fullest measure.

"TOIL" BY M. M. YOUNG.

"REST" BY M. M. YOUNG.

## PROF. CLARK AND HIS RECITALS; WHAT THEY HAVE DONE FOR UTAH

CERTAINLY one of the educational events of the season is the series of lectures and dramatic recitals given during the last two weeks by Professor S. H. Clark. And now that these are over, we naturally cast in our minds for the results that have come to us through these readings.

So far as Mr. Clark personally is concerned, we may easily sum up our conclusions. In the first place, most of us are likely to think that he is a reader rather than a lecturer. Everything he said we enjoyed because he said it, notwithstanding we had heard much of it before. But it is what most of us were listening to. The audience had no trouble in knowing which character of the particular play he was reading, was speaking at any given time. Then, too, Prof. Clark stands for simplicity and naturalness. You

never felt like stopping to say, "How well it is done!" This came after he had finished. Your attention was centered upon the thought of the poem, not on the medium through which you were getting the thought. One of the strongest evidences of his power to give instruction and entertainment is the fact that for 18 recitals he drew large audiences; and this, too, during the busiest of seasons, for most people, and also during the stormiest month of the year. These taken together are a criterion by which we judge the impression which Mr. Clark has made in these parts.

One of the effects of this series of recitals certainly is that the general public has received much entertainment with much information that would serve to point the way toward a higher standard of appreciation. His luminous remarks upon the tragic ideal above are sufficient to give even those who have been accustomed to more or less literary inclinations a better insight into the great purposes of tragedy. Surely, those who heard him would be less inclined to shun the tragic in literature, merely because it does not apparently furnish the diversion we all seek in our moments of idleness. The best

effect, however, so far as the general public is concerned, is that which is feeling for the nature in literary art. But probably the greatest benefit of all that may have resulted from these recitals is that the professional teachers among us have received, in these talks and demonstrations could have been used in every school teacher of reading, not to speak of all in the city. Nevertheless, including the actual work of the teacher, Mr. Clark is not merely a reader. For also a teacher and thinker. For how he manages pretty well to get at the ground-work principles, he can see through the mists that befog most of our minds. A clear insight into the principle of reading which, take only that readers get along without, good many teachers do not necessarily know. Not all does not express the author's intent, reader's. And to change the reading is necessary to show him the reading is necessary. This is fundamental. Or, that process by which the author's intent is obtained: First come the relative value of words, then the relative value of the emotional value, and last of all the illuminating value of a whole world of details and methods. And these principles are bound to exercise an influence for good upon the reading of a vast army of school children.

**Twenty Years Trial.**  
There are lots of good things the doctors know nothing about. We're frequent cure of disease after the doctors have given them up. If the disease comes from overwork, dissipation, blood and loss of strength, we have the one sure remedy in Dr. Gunn's Blood and Nerve Tonic. These tablets, taken with meals, turn the food into rich red blood, making strong, steady nerves and increasing the strength, producing solid flesh at the rate of 1 to 1 lbs. per week. This means health. Druggists sell Dr. Gunn's Blood and Nerve Tonic for 75c per box or 3 boxes for \$2. For nervous prostration, loss of memory, or a pale, sallow complexion, a better remedy was never made. Doctors know nothing about this remedy only the fact that we make it. Write for sale by Z. C. M. I. Drug Co. department.

**TYPEWRITERS FOR RENT.**  
All kinds, all prices. Our repair work guaranteed. Call, write or telephone UNDERWOOD TYPEWRITER AGENCY.  
11 W. 1st South, Tel. 141.

**Old English Floor Wax**  
Is hard as glass and shines as satin, the perfection in finish of hardwood floors.

**"WAXED FLOORS,"**  
(A Booklet).  
Tells how to treat hardwood floors. Free for the asking.

**G. F. Culmer & Bro.**  
20 E. First South.

**"MARCH WITH GRIEF DOTH HOWL AND RAGE."**  
—We could suggest a reason for this howling if we didn't want to avoid any appearance of conceit. That Good Coal is the reason. The March wind has ever had.

**Bamberger**  
161 Meigs St.  
Telephone 2000.

**A. L. HESENS,**  
Institution of Healing and Nursing.  
By the Dramatic Method of Healing. It Conquers All Diseases. Stop the Conquerors. Come and see our private hospital, 707 & Main St., Salt Lake City.

**BLOOD**  
On account of its frightful bloodlessness, and Poisoning is commonly called "Blood Poison." It is a disease which is often fatal. It is caused by the use of impure blood. It is a disease which is often fatal. It is caused by the use of impure blood. It is a disease which is often fatal. It is caused by the use of impure blood.

**POISON**  
The best remedy for blood poisoning is Dr. Gunn's Blood and Nerve Tonic. It is a powerful purifier of the blood, and it is the only remedy that will cure blood poisoning. It is a powerful purifier of the blood, and it is the only remedy that will cure blood poisoning. It is a powerful purifier of the blood, and it is the only remedy that will cure blood poisoning.
