TRAGEDY MAY BRING PEACE.

In Diplomatic Circles in St. Petersburg Such Opinion is Freely Expressed.

CAR HAS CONSIDERED MATTER

The Revelations of Gen. Gripenberg Will Have Strong Influence on The Emperor.

RUSSIAN WAR OFFICE ALARMED.

Case in Danger Threatening Manchurian Army from Attempts to Cut Line of Communication.

St. Petersburg, Feb. 18, 1:30 p. m.—

In diplomatic circles the opinion is generally expressed that yesterday's tragedy may be followed by the decision of the government to conclude peace. For some time despite the official attitude maintained by the government there has been growing apprehension of the difficulties of prosecuting the war in the midst of increasing communications at home and abroad.

RUSSIA IS IN FULL REVOLUTION

St. Petersburg, Feb. 18.—An extraordinary sitting of the council of the empire has been summoned to consider the situation resulting from the assassination of Grand Duke Sergius.

KAISER FOR PEACE.

St. Petersburg, Feb. 18.—Prince Friedrich Leopold of Prussia, who had been visiting the emperor (previous, according to advices from Berlin, to going to Manchuria as an observer representing Emperor William with the Russian army), started for Berlin at midnight.

TEMPERATURES.

Chicago, Feb. 18.—a. m. temperatures: New York, 18; Philadelphia, 24; Chicago, 12; Cincinnati, 16; Boston, 20; Washington, 22; Minneapolis, 10; St. Louis, 16.

Cottons Duck Co's Meeting.

New York, Feb. 18.—Stockholders of the United States Cotton Duck corporation and the Mount Vernon Wood-bery Cotton Duck company have held their annual meetings in Jersey City. According to the reports of the two companies submitted by the officials the income from all sources was \$9,490,149, with net earnings of \$516,085. The income on the \$7,000,000 first mortgage bonds outstanding amounts to \$359,000, leaving a surplus of \$166,085. Nearly all the officers and directors were re-elected.

House for Colony Club.

New York, Feb. 18.—Architectural plans have been completed for the Colony club, for which a site was purchased nearly a year ago in Madison avenue. When the structure shall have been reared the monopoly now held by the male population of the pleasures and privileges of an exclusive club luxuriously housed and thoroughly furnished, will be at an end in this city. With its combined social and athletic advantages the new clubhouse will be the most complete in the country.

FRED H. HATHORN.

Prominent Politician of Montana Charged With Embezzlement.

Butte, Mont., Feb. 18.—A miner special from Billings, Mont., says that a warrant has been issued for the arrest of Fred H. Hathorn, a prominent politician and attorney of Billings for the alleged embezzlement of \$122 witness measure which is charged as judge in the legislative committee introduced in the legislative district, and he declares his arrest political brought about by his political enemies, seeking to injure him. A most bitter fight is being waged against Hathorn in the legislature.

WATSON ACQUITTED.

He Was Charged With Killing His Wife.

New London, Mo., Feb. 18.—The jury in the case of Dr. T. Jones Watson of Denver, charged with killing his wife, today returned a verdict of not guilty. Mrs. Watson was killed in a runaway

accident while riding with her husband, who was picked up unconscious near a bridge over a small stream.

SADDLE FOR GOV. BRODIE.

Arizona Rangers Present Him With Finest to Be Bought.

Phoenix, Ariz., Feb. 18.—The Arizona rangers have presented to Gov. Brodie the finest saddle they could buy. The governor, who leaves for the east in a day or so, will present the saddle to President Roosevelt with the compliments of the rangers, who are mostly former rough riders.

SIX MEN KILLED.

Mine Gunboat Jumped Track, Causing Fall of Rock.

Pottsville, Pa., Feb. 18.—Six men were killed and 14 injured at the Lettice colliery today. The men were being lowered into the mine in a gunboat when the latter jumped the track and knocked out several props. This caused a fall of top rock, and six of the men in the gunboat were crushed to death. Ten of the injured are now in a serious condition and were able to walk up the slope.

HIGHWAYMAN SNATCHES DIAMOND BROACH FROM WOMAN

New York, Feb. 18.—One of the most audacious of the many recent robberies in this city occurred in the Bronx today when a highwayman attacked Mr. and Mrs. John W. Cornish in front of their home, snatched a \$5,000 diamond brooch from Mrs. Cornish's throat, fired two bullets through the clothing of Cornish when he remonstrated and then escaped after an exciting race with a policeman in which several shots were exchanged, but so far as Cornish is concerned the thief was only a meagre description of the man, and there seems little chance that he will be captured.

Through Trains Blocked.

Corey, Pa., Feb. 18.—The great storm of last night and today has effectively blocked all through trains.

The Finland Aground.

New York, Feb. 18.—While passing out through the ship channel this afternoon the Red Star line steamer Finland which sailed for Antwerp, went aground at the junction of Main and South channels off Sandy Hook. A moment later the steamer displayed signals indicating that she was not under control. The tide was at the lowest point at the time of the accident.

Duffy Comes in Second.

Melbourne, Victoria, Feb. 18.—A. F. Duffy, the American runner, made his first appearance in Australian athletics here today, but finished second in both events in which he competed.

So Said the Acting Minister of Justice on Hearing of the Death of Sergius.

"WHAT WILL HAPPEN NEXT?"

Revolutionists Receive Large Accession from Liberals and Quite Ample Funds.

London, Feb. 18.—The correspondent at St. Petersburg of the Daily Telegraph asserts that the acting minister of justice, on hearing the news of the assassination of Grand Duke Sergius, exclaimed: "In truth Russia is in full revolution. What will happen next?"

House for Colony Club.

New York, Feb. 18.—Architectural plans have been completed for the Colony club, for which a site was purchased nearly a year ago in Madison avenue. When the structure shall have been reared the monopoly now held by the male population of the pleasures and privileges of an exclusive club luxuriously housed and thoroughly furnished, will be at an end in this city. With its combined social and athletic advantages the new clubhouse will be the most complete in the country.

KAISER WILHELM.

Expresses to Russian Ambassador Deep Sympathy.

Berlin, Feb. 18.—An hour after the news of the assassination of Grand Duke Sergius reached Berlin, Emperor William drove to the Russian embassy, expressed personally to Count von Osten-Sacken, the Russian ambassador, his horror and requested him to convey his deep sympathy to Emperor Nicholas.

Paul Aeye's New Play.

Berlin, Feb. 18.—Paul Aeye has written a new play "The Canadian" which will be produced at Frankfurt, March 15, his 75th birthday.

Rose Garden And Smelter Side By Side

An Earnest Utah Inventor Who Says He Has a Solution to the Smoke Nuisance That Will Make Such a Thing Possible—His Sincerity and Claims Begin to Command Profound Attention.

An interested spectator at the hearings of the smelter smoke case before the county board of health this week was a little man, well along in years, and scarred with the signs of a life of hard work. He watched each move closely, and if one chance to talk to him, he found a man who is servant to his mind and the ideas that are teeming in it. Whatever the experts with university degrees behind them have to say, this man says he has a solution for the smoke question, in every phase of it, but his trouble is with the manner of getting his ideas up the long road from the machine shop to the ear of the smelter magnates. He has lots against him—for his only mark of learning is the horny hand of hard labor, and his university has been the smelter furnace instead of the German institution with a long degree to bestow on its devotee.

E. A. Pascoe has no club membership with the social set where the smelter managers mingle, but he will talk to them, and he has tried to get the experts to consider the invention. Some of them have looked at it, and one has said it merits a trial. I have sent the plans to Dr. Widtsoe of the Agricultural college, too.

"One encouraging thing to Mr. Pascoe, is that Dr. Franzmeyer, who is the expert in the employ of the smelters, has written him from the overland en route to New York, asking that the plans of the invention be forwarded to him. Pascoe considers this an indication that the expert's line of action may be similar to his, concerning the article in the 'News' of last Saturday by Prof. Jones, Mr. Pascoe says that this article embraces the exact principles on which he has worked, and is a complete endorsement of his theory, although Prof. Jones has never seen his plans, or talked with him at all.

"The principle I worked on," said Mr. Pascoe at his home last night, when asked for a description of his invention, "was that it is out of the power of man to destroy any of the things God had created. He can use them, and change their form, but he can never get rid of them." This statement of a well known scientific axiom, was followed by the statement that in working with the smelter smoke, he has discovered the effect of sulphuric acid on the vegetation, and that he has found a way to neutralize it, and to prevent it from doing any harm to the plant cells, but leaving it unpoisoned and perfectly harmless if eaten. He had also noticed that the smelter smoke, when it comes out of the chimney, it is so hot that it burns the plants on the inside near the top, then coming downward slowly till the chimney walls are coated. After that it pours out, carrying with it arsenic and copper and arsenic over the adjacent land. "The invention first came to me all in a flash," he went on—"but in a dry form. After that I thought of the water scheme, and spent many months figuring out the possibilities of my revolving spray of water, which will be used inside the flue."

In the smelter now a cleansing of the flue means that someone has to get in and shovel out the accumulation of poisonous dust, and it was to obviate the necessity for this that Pascoe's invention had its beginning. His first plan was to have the batteries set inside the horizontal flue into which the smoke is first passed after leaving the furnaces. There the heat is high, and sulphuric acid does not form. The smoke instead of rushing straight through is carried into revolving cylinders, each carrying a thousand little jets of water, and there the entire supply of flue dust is precipitated, coming out as a flowing mud in vents at the bottom of the flue.

This feature Dr. John A. Widtsoe of the Agricultural college experiment station, however, in that it is based on scientific principles, already well established. The invention should succeed.

you try your scheme?" was suggested by the interviewer, remembering a statement in the press that Manager Whitley had once requested to see the plans.

"Yes," was the reply. "They offered to treat me with every courtesy, and give me all the gas I required, but not a cent of money to work with. Since then I have tried to get the experts to consider the invention. Some of them have looked at it, and one has said it merits a trial. I have sent the plans to Dr. Widtsoe of the Agricultural college, too."

"One encouraging thing to Mr. Pascoe, is that Dr. Franzmeyer, who is the expert in the employ of the smelters, has written him from the overland en route to New York, asking that the plans of the invention be forwarded to him. Pascoe considers this an indication that the expert's line of action may be similar to his, concerning the article in the 'News' of last Saturday by Prof. Jones, Mr. Pascoe says that this article embraces the exact principles on which he has worked, and is a complete endorsement of his theory, although Prof. Jones has never seen his plans, or talked with him at all.

"The principle I worked on," said Mr. Pascoe at his home last night, when asked for a description of his invention, "was that it is out of the power of man to destroy any of the things God had created. He can use them, and change their form, but he can never get rid of them." This statement of a well known scientific axiom, was followed by the statement that in working with the smelter smoke, he has discovered the effect of sulphuric acid on the vegetation, and that he has found a way to neutralize it, and to prevent it from doing any harm to the plant cells, but leaving it unpoisoned and perfectly harmless if eaten. He had also noticed that the smelter smoke, when it comes out of the chimney, it is so hot that it burns the plants on the inside near the top, then coming downward slowly till the chimney walls are coated. After that it pours out, carrying with it arsenic and copper and arsenic over the adjacent land. "The invention first came to me all in a flash," he went on—"but in a dry form. After that I thought of the water scheme, and spent many months figuring out the possibilities of my revolving spray of water, which will be used inside the flue."

In the smelter now a cleansing of the flue means that someone has to get in and shovel out the accumulation of poisonous dust, and it was to obviate the necessity for this that Pascoe's invention had its beginning. His first plan was to have the batteries set inside the horizontal flue into which the smoke is first passed after leaving the furnaces. There the heat is high, and sulphuric acid does not form. The smoke instead of rushing straight through is carried into revolving cylinders, each carrying a thousand little jets of water, and there the entire supply of flue dust is precipitated, coming out as a flowing mud in vents at the bottom of the flue.

This feature Dr. John A. Widtsoe of the Agricultural college experiment station, however, in that it is based on scientific principles, already well established. The invention should succeed.

he said to a "News" representative who placed the invention before him last night, in this much of its work. Dr. Widtsoe, however, would not commit himself, as to the next feature of the invention, which would be to remove the sulphur gas from the smoke.

Describing the first feature further, Mr. Pascoe says that he would drain his flue-dust mud into a settling tank, where the arsenic which would float free on the surface could be skimmed off and the iron and copper sent back into the furnaces, thus saving a vast amount of money to smelters.

"How would I handle that?" said Mr. Pascoe repeating a question. "Well, every smelter has a slag dump hasn't it? and a lot of valuable metal goes to waste in it. Now I look in the slag and hold up an ordinary flask for laboratory test tubes are not a part of Mr. Pascoe's chemical experiments,—and in the bottom of it was a lump of slag above which floated a solution of copper in sulphuric acid. Now this stream of poison water, if allowed to pour down over the slag dump will dissolve slowly and when the water comes out at the bottom it will be richly laden with copper, and the acid element will be used up.

The water, now perfectly harmless, can be run into a highly diluted form, and used over again in the flues.

"How much water will it take?" "Well, Mr. Channing, I understand, has filed on Jordan water to get a supply of 14,000,000 gallons every 24 hours. I think that is many times what I will need. It won't take over a ton of water to a ton of ore. If there is more sulphuric acid than the flue dump can handle, low grade copper ore is available in great quantities to bring in for smelting. Poor old Spain can give us Americans cards and spades on that subject for she makes at her smelters sulphuric acid, possibly from pure sulphur, and gets a greater percentage than we do from her low grade copper ores."

"Let them give me a try. A ton an hour smelter at a cost of \$25,000 would always be useful to a smelter plant, for experiments, and if only the first part of my invention works, it will remove all the lead, arsenic, copper and iron from the smoke, and that is something."

EVIDENCE UNFIT FOR PUBLICATION.

Developments in Cody Divorce Case Both Sensational and Salacious.

TESTIMONY OF DR. POWELL.

Says Mrs. Cody Charged Her Husband With Having Murdered Their Daughter.

Cheyenne, Feb. 18.—The developments in the Cody divorce case, which is now being tried in this city, are so sensational and salacious as to make them unfit for publication in decent or family newspapers. The testimony thus far adduced shows that Mrs. Cody had accused her husband of infidelity with some of the most prominent women of English royalty and also of the American "four hundred."

MRS. JONES DEAD.

Estimable Resident of Provo Succumbs to General Debility.

(Special to the "News.")

Provo, Feb. 18.—Mrs. Ann Jones of the Second ward, died last night from general debility. The deceased was born in Brynbo, Wales, March 16, 1818, and came to Utah with her husband, the late Thomas Jones, and family, in 1856, residing here ever since. She was a highly respected resident of this city and having survived her four sons and a numerous posterity. The funeral will be held Monday.

FIREMEN'S REUNION.

Veterans Arrange a Picnic for Washington's Birthday.

The officers and members of the Veteran Volunteer Firemen's association are invited to attend a reunion to be held at Fireman's hall, 278 Canyon road, Wednesday, Feb. 22, at 4 p. m. The wives and families of deceased members are cordially invited. The official notice says: "Bring your picnic."

IS IT MURDER?

Body of Infant Found Wrapped in a Gunny Sack on First North.

The partly decomposed body of a small baby was found last evening by little Joseph Marsden in his father's garden. The tiny body was wrapped in a dirty, coarse gunny sack. The lot where the body was found is situated near Seventh West and First North streets, next to the Jackson school. The sack containing the body was taken to the undertaking establishment of Joseph William Taylor. Neighbors have been asked to assist in discovering the identity of the parents of the child, but have no ideas whatever. Justice of the Peace Dana T. Smith, acting coroner, will commence an inquiry today, which may result in some startling disclosures. It is hinted that a case of murder will be revealed.

Cody over the dead body of Arta as being the murderer.

OFF FOR LOS ANGELES.

Special Party of Utahns Leave for Their Trip on This Evening's Train.

A special party from the Salt Lake Commercial club will leave this city on the 6 p. m. train over the San Pedro road for Los Angeles. The party will include, ex-Gov. Hooper M. Wells, president of the Commercial club; Cashier L. H. Farnsworth of Walker Bros. bank; Solicitor C. O. Whittemore of the railroad company, and Manager E. S. Harris of the Commercial club. At Caliente, the party will transfer to the private car of J. Ross Clark, which will be waiting to receive them, and the City of the Angels reached on the evening of the 20th inst.

The party does not aim to make particular speed in getting through as one of the purposes of the trip is to inspect the road and the country, and to see what the natural resources of the latter may seem to be, and what likelihood they may have in bearing upon the commercial interests of this state and city. The most careful attention will be given to everything en route, so that by the time the party reach the end of their journey, they will have a clear idea of the country lying between Salt Lake and Los Angeles.

Another important purpose in making the trip is to attend the banquet given by the Los Angeles chamber of commerce on the evening of the 22nd inst. The great spirit of investigation and curiosity to be made from this city to southern California over the new route of the Great Salt Lake and Pacific coast to the traveling public. While in Los Angeles the party will give special attention to the industrial and manufacturing exhibits in the local chamber of commerce, as well as to the local conditions covering a much of the economic field as the limited time at their disposal will admit of.

There is an intention of taking time for pleasure or junketing of any kind. The trip is for business, and this includes the most complete and most convenient facilities for encouragement of commercial intercourse between the two cities as may be possible.

The Los Angeles chamber of commerce is one of the most powerful and influential organizations in the western country, and the Salt Lake pilgrims will exert every effort to encourage and foster the pleasant relations between the two cities. The methods of business, which mark the Los Angeles chamber of commerce as an attractive body will be studied with all the attention possible at the time, with a view to securing the most complete facilities for the part of the local people. The return of the party will be watched with much interest.

OPERA COMPANY ARRIVES.

Mme. Mantell and Singers Reach Salt Lake for Next Week's Engagement.

The Mantell Grand Opera company arrived in Salt Lake this morning on its way to the east from the Pacific coast, where it has been performing the standard opera with marked success. The company contains some excellent artists, and the public is promised good presentations of the bills to be rendered on Monday and Tuesday at the Salt Lake Theater.

Mme. Eugenia Mantell is registered at the Wilson, where she will remain during her stay here. The prima donna is well known in the musical circles of Europe and America as an artist most thoroughly conversant with the grand opera roles of the world. She it was who, on one occasion was nursing her sick husband in a New York hospital, when one of Grand's prima donna sopranos at the Metropolitan Opera House, was taken seriously ill one hour before the curtain was to be lifted. The management sent a carriage post haste for Mantell, who received word at the hospital at 7:30 and at 8:30 walked on the stage to sing Peter the Great in the opera. Although she had not performed the role in many months, she went through it without missing a note, and was one of the big successes of the evening. It was set down at the time as one of the most wonderful feats in the annals of grand opera. She saved the house, which represented several thousands of dollars and established a reputation as a wonderful memorizer of great operatic roles.

J. R. WALKER ESTATE.

Final Distribution of \$616,280 Among The Five Heirs.

Judge Armstrong today approved the final account of the executors of the estate of Joseph R. Walker, deceased, and rendered a decree of distribution, setting aside the property of the estate to the five heirs mentioned in the will of the deceased. The inventory of the estate shows that its value is \$616,280.37. By the decree of the court the property is divided as follows: An undivided one-fifth thereof to each, Mary A. Cheesman, Joseph R. Walker, Charles A. Walker and George R. Walker; and an undivided one-fifth of the personal property to Winnifred S. Walker as administratrix of the estate of Albert E. Walker, deceased; and an undivided one-tenth of the real estate to Winnifred S. Walker and an undivided one-tenth of the real estate to Alberta Walker, child of Charles E. Walker, deceased.

FUNERAL SERVICES.

At the Twentieth ward meetinghouse yesterday afternoon, funeral services were held over the remains of Mrs. Janette Paton Carrington, who died on Tuesday last. Bishop George Romney presided and the music was furnished by members of the ward choir, under the direction of D. J. Watts. Remarks eulogistic of the deceased and comforting to the bereaved were made by Elders George Reynolds, George F. Gibbs, Angus M. Cannon, Joseph E. Taylor and Bishop Romney. The opening prayer was offered by Elder S. W. Johnson and Elder Albert Wilkes closed with benediction. The grave was dedicated by Elder Joseph F. Simmons.

Manchester Sells His Estates.

London, Feb. 18.—The Duke of Manchester has sold his Tanderage estates at Armagh under the Irish land act, for £1,100,000.

REVOLUTIONARIES GREATLY ELATED.

While Others Sorrow Over Grand Duke Sergius' Murder They Glory in It.

IMPERIAL FAMILY IS WARNED

Death is in the Air and No One Knows Where the Next Blow May Fall.

MURDER POSSIBLE ANY MOMENT.

Authorities Realize Their Impotency To Ward Off Swift Acts Of Terrorism.

St. Petersburg, Feb. 18, 1:05 p. m.—Oppression like the shadow of doom seems to be hanging over the Russian capital. Bells are tolling and the people in the streets are awe-struck at yesterday's bloody crime. Everyone seems to shrink before the contemplation of what may happen next. The tragedy struck deep in the heart of the perplexed and tried emperor and many who were unsparing in their criticism yesterday today have only expressions of sympathy for his unhappy lot. The bitter cup which during the last year has been pressed again and again to his lips is once more filled to the brim and in almost pathetic words this morning he implores his subjects to pray for the repose of the soul of his murdered uncle. Death is in the air and no one knows where the next blow may fall, although precautions have been doubled in every direction for the preservation of the lives of the members of the imperial family and the ministers and the secret police are seeking out and arresting those known to be associated with the fighting organization. The authorities realize their impotency to ward off the swift acts of terrorism, murder in the streets being possible at any instant. The only safety seems to lie in seeking refuge behind palace walls and all the imperial family have been warned not to venture out.

Although only the official papers and the Grashdanin appear with black borders, the editorials of all of them are strangely sober. Some papers which in the past have been ready to lay any charge at the door of Grand Duke Sergius are drawing back before the prospect of the inauguration of a reign of terror, fearing that it may destroy the bright prospect of reform and lead to an era of repression. But even in the midst of universal repression the hope that after the darkest hour comes just before the dawn. Among the revolutionaries, however, there is a sentiment of elation. They openly glory in the deed, proclaiming that the bright prospect of reform is again being proclaimed in the absence of armed resistance only by terror can conceal the truth from the hands of the autocracy. According to their view any weapon is justifiable. As a matter of fact it is too early yet to say what the political effect will be. Two moments everything is at a standstill.

Expressions of condolence have reached the emperor direct from practically all governments, those of President Loubet, Emperor William and King Edward being especially warm and sympathetic in tone. It is probable that several governments will send representatives to the funeral of Grand Duke Sergius.

BELLS OF MOSCOW TOLL.

Moscow, Feb. 18.—The bells of Moscow's 600 churches are tolling today, requiem masses are being celebrated and before many shrines priests are ceaselessly chanting prayers for the repose of the soul of murdered Grand Duke Sergius. His remains still rest in the Choudoff monastery whither they were removed yesterday. The bier is covered with flowers and surrounded by burning tapers. "I am ready to lay constantly at the foot of the coffin reciting prayers for the dead."

The widowed Grand Duchess Elizabeth is prostrated. She keeps to her apartments in the Little Palace and was not able even to attend the requiem mass. Touching messages have been received by the grand duchess from Emperor Nicholas and her sister, empress. Troops are patrolling inside the Kremlin, all the entrances of which continue to be closed to the public.

The crime while actually not anticipated in view of the repeated threats has nevertheless created a profound impression in the ancient capital. All the shops are closed and the newspapers appear with mourning borders.

Washed Overboard and Drowned

San Francisco, Feb. 18.—The steamer Algon, just arrived here from the Orient, reports the loss at sea of four Chinese sailors on the steamer Stanley Dool of this port on her passage from Moji to Hongkong. The men were washed overboard and drowned.

R. S. Stangland Withdraws.

New York, Feb. 18.—Robert S. Stangland, captain of last season's Columbia football team and a member of the "varsity" track team, who was to run in the Columbia-Cornell relay race at Buffalo Feb. 20, has declared himself a physician, definitely withdrawing from all engagements in athletics of any nature. Stangland is stated to be suffering from an enlargement of the heart and through his condition is not critical, any excessive exercise would tend to increase the trouble.

Swedish-Norwegian Consulates.

Christiana, Feb. 18.—The storting today unanimously decided to refer the question of separate consulates for Sweden and Norway to a committee of 18, consisting of eight members of the right party, eight of the left, two Moderates and one Socialist.
