

BODIES SOON BURNED TO ASHES

Seven People Perish in a Fire That Resulted From the Explosion of a Fuse.

NO WAY OF FIGHTING FLAMES.

In Mad Rush for Doors and Windows Many Persons Were Pushed Back Into Building.

Avon, Conn., Sept. 15.—The explosion of a fuse, followed by a fire, in a building of the Climax Fuse company here this afternoon caused a panic among 20 employes in the building and resulted in the death of seven and injuries that doubtless will prove fatal to several others. There was no way of coping with the flames, which soon spread and in less than an hour after the explosion those who were unable to escape were in the clutches of a fire that eventually burned their bodies to ashes.

THE DEAD.

William Burke, 49 years old, married. James Joyce, about 30; married. Robert McCarthy, aged 18. James Wallace, married. Mollie McCarthy. Miss J. Sullivan. Mrs. M. E. Tucker.

It is the accepted theory here that in an effort to burn out a stoppage in one of the machines a workman caused an explosion of a fuse with the hot iron he held in his hand. Inflammable material was set on fire, and in a few moments the room was a mass of flames. In an instant there was a mad rush for the doors and windows, and during the scramble many persons were pushed back into the building, while others were severely burned. As one of the walls of the second largest building fell several bodies could be seen entangled in the mass of machinery in the basement, and in a short time they were reduced to ashes. Early in the evening the body of a woman was seen near the edge of the fire, and an effort was made to pull it away from the flames, but on account of the great heat this was impossible.

Soon after the building in which the lives were lost was consumed the fire spread to a new structure which was just completed at a cost of \$35,000, and in a few hours this building was gutted, only the four walls remaining. The loss is estimated to be \$100,000.

HUNGARIAN DIET.

Baron Fejervary Formally Announces Cabinet's Resignation.

Budapest, Sept. 15.—On the reopening of the diet today, Baron Fejervary formally announced the resignation of the cabinet and the prorogation of parliament until Oct. 10, to enable the coalition parties to submit a program to King-Empress Francis Joseph.

There was marked tension on all sides when Baron Fejervary rose to address the legislators. The resignation of the cabinet, he declared, was necessitated by an overwhelming force of circumstances which prevented the government from carrying out the mission with which it had been entrusted.

"His majesty," proceeded the minister, "has authorized me to say that he wishes to form a government from the ranks of the majority, after an agreement on an acceptable program. In order to enable the coalition parties to submit proposals to his majesty, the house is prorogued until Oct. 10."

The announcement was greeted by the members of the Left party with shouts of "The same old game."

Francis Kossuth, the leader of the united opposition, vigorously protested against the prorogation of parliament as being unconstitutional. Another motion by Kossuth to this sense was adopted and the house adjourned amid great excitement.

AN ALARMING CASE

SEVERE TEST OF A BLOOD REMEDY IN ERYSIPELAS.

Dr. Williams' Pink Pills Banish Pain and Inflammation and Avert Peril from the Vital Organs.

Erysipelas or St. Anthony's fire is a most uncomfortable disease on account of the burning, the pain and the disfigurement. It is also a very grave disorder, attended always by the danger of involving vital organs in its spread.

The case which follows will be read with great interest by all sufferers as it affords the whole story, and refused to yield to the remedies prescribed by the physician employed. Mrs. Ida A. Coburn, who was the victim of the attack, residing at No. 19 Winter street, Newburyport, Mass., says:

"In June of 1904 I was taken ill with what first appeared to be a fever. I sent for a physician who pronounced my disease chronic erysipelas and said it would be a long time before I would be cured and around."

"Inflammation began on my face and spread all over my body. My eyes were swollen and seemed bulging out of their sockets. The inflammation on my face suffered the most intense pain through-out my body. The doctor said my case was a very severe one. Under his treatment, however, the inflammation did not diminish and the pain which shot through my body increased in severity. After being confined to my bed for two months under his care, without any improvement, I decided to get along without any physician."

"Shortly after this, on the advice of a friend, I began to take Dr. Williams' Pink Pills for Pale People, two at a dose three times a day. After the second box had been used I was surprised to notice that the inflammation was going down and that the pains which used to cause me so much agony had disappeared. After using six boxes of the pills I was up and around the house attending to my household duties, as well as ever."

"No better proof of the power of this great remedy to expel poisons from the blood and to supply new vigor could be given. Dr. Williams' Pink Pills cure ruddy and are the best of tonics in all cases of debility."

Dr. Williams' Pink Pills are sold by all dealers in medicine or may be obtained direct from the Dr. Williams' Medicine Co., Schenectady, N. Y.

SPECIFICATIONS AGAINST COMMANDER L. YOUNG

They Are Six in Number and Charge Responsibility for Bennington Disaster.

Washington, Sept. 15.—The navy department today made public the following charges and specifications on which Commander Lucien Young, who commanded the gunboat Bennington, which was blown up by a boiler explosion in San Diego harbor, will be tried before a naval court-martial ordered convened at San Francisco today.

Charge—Neglect of Duty. Specifications—Reckless, first that Commander Young failed to enforce paragraph 9, article 1606, United States navy regulations, which provides that all valves throughout the engineering department are to be moved at least once a week; second, that he failed to enforce paragraph 2, article 1607, providing that the safety valves will be partially lifted by the handgears at least once each week, when not under steam;

third and fourth, that he failed to enforce other provisions of the regulations (article 6524), under which it was his duty to see that the safety and sea valves were kept in good condition and efficient working order; fifth, that he failed to comply with provisions of the regulations (article 43 and article 67), requiring the commanding officer to approve the smooth log, and sixth, that he failed to give such orders and precautionary instructions as were appropriate and necessary to insure the efficient condition of the engineering department of the vessel under his command; the efficiency of which he was charged with responsibility.

SEA LEVEL CANAL IS FAVORED.

By a Majority of the Foreign Members of the Consulting Board of Engineers.

NOT FORMALLY PASSED ON.

Attitude of Americans Not Defined—All Will Visit the Isthmus.

Washington, Sept. 15.—A majority of the foreign members of the consulting board of engineers of the isthmian canal appear to favor a sea-level canal. This fact may become of the greatest importance if their votes shall become necessary to decide that which is, after all, the principal question requiring a decision at the hands of the board.

No attempt has yet been made to pass upon this question at any of the regular board meetings, but the fact is that the majority of the foreign delegates who have been closely studying the vast amount of data collected and laid before the board by the canal commission are at present of the opinion that a sea-level canal would be better than a lock canal.

The board met today for the first time in a week in Washington and talked about dams. Engineer Stearns, a member of the board, explained and laid before the board by the canal commission are at present of the opinion that a sea-level canal would be better than a lock canal.

A decision on this question of dams was, however, postponed until the board has visited the isthmus. The members expect to sail from New York with the canal commission, Sept. 25 or 27. Next Wednesday, Mr. Van Velsor and Linden W. Bates will explain to the board their respective plans of canal construction.

TRIAL OF HUGH WATT.

Ex-M. P. Charged With Trying to Procure Murder of His Wife.

London, Sept. 15.—The Marlborough police court today resumed the trial of Hugh Watt, a former member of parliament, on the charge of attempting to hire a man to kill the woman by whom he is murdering his former wife.

The prosecuting counsel, Mr. Sims, presented two new witnesses who, he said, would swear that Watt invited them to murder the former's wife and her husband, Reginald Beauchamp.

The first of these witnesses, a man named Warley, who sells newspapers on the streets, told that he received various sums of money from Watt, who wanted him to kill the woman by whom he is murdering his former wife.

The witness also swore that Watt invited them to murder the former's wife and her husband, Reginald Beauchamp, suggesting that he could run over him on a bicycle or follow him to Alsters, where he could get the "blacks to do the job."

The witness described various interviews he had with Watt. He said he finally became alarmed because he thought Watt was going mad and might shoot him, and that therefore he ceased visiting him. The hearing of the case was then adjourned for a week.

School Athletic Fields.

New York, Sept. 15.—Purchase of fields for the use of public school athletic leagues has begun by the acquisition of property adjoining a high school on Staten island. Its purchase marks the first actual move in the spending of the appropriation of \$400,000 that was made last June at the request of the board of education. The league now numbers more than 100,000.

The work of bringing the school girls into the organization which has been long delayed also will be discussed.

Dr. Humphreys' Seventy-Seven breaks up Grip and

COLDS

Dr. Humphreys' Famous Specific "Seventy-seven" cures every kind of a Cold—Grip, Influenza, Croup in the Chest, Catarrh—acute and chronic, Croup of the Throat, Hoarseness, Laryngitis, loss of Voice, croup, whooping cough, etc.

"Seventy-seven" breaks up Colds that hang on and do not yield to other treatment. At druggists 25c or mailed. Write for Medical Book sent free.

Humphreys' Homeo. Medicine Co., corner William and John streets, New York.

PLEA FOR THE CANTON.

To Its Abolishment Gen. Grant Attributes Much Army Vice.

Washington, Sept. 15.—In his annual report Brig. Gen. Frederick D. Grant, commanding the department of the east, makes the suggestion that the families of some of the officers and enlisted men in the army transferred to the Philippines be allowed to live in the barracks quarters in a limited number of abandoned forts while the husbands are absent from the country. He suggests Fort Trumbull, Conn., as an excellent place for such use.

"This far the weather has not been cold enough to harm the crops that remain to be harvested, and another week of favorable conditions should assure an unprecedented yield of corn. Several settlements maintain labor disputes at the minimum, and mercantile collections continue prompt."

"A few complaints of inadequate transporting facilities from manufacturing centers are attributed to the requirements of grain moving. Railway earnings thus far reported for September were 3.7 per cent larger than last year, while foreign commerce at this port for the last week showed gains of \$2,364,150 in values of exports and \$7,551 in imports, as compared with 1904.

"The official report of exports of staple products from all ports of the United States in August exhibited a gain of \$16,332,901 over the same month last year, or more than 5 per cent. "Large exports of packers' products, but on heavy Texas steers small concessions were made, although the limited offerings in other sections of the market maintained the average price at the highest point."

"Fallures this week numbered 184 in the United States, against 231 last year, and 29 in Canada, compared with 31 a year ago."

WHY SOLDIERS DESERT.

Gen. Funston Attributes It to Their Poor Pay.

Washington, Sept. 15.—Gen. Frederick Funston, commanding the department of California, in his annual report, quotes from his judges' advocacy regarding desertions from the army. The latter ascribes desertions to the poor pay received by enlisted men compared to what men receive in civil occupations.

Gen. Funston says the buildings at the Presidio, San Francisco, are not to credit to the United States, and should be replaced. There is no further reason for maintaining the post at Fort Dewey, he says. It should be abandoned or new buildings erected.

ANTI-PASS LAW.

Action to be Brought to Test Validity of Wisconsin's.

Plainfield, Wis., Sept. 15.—Charged with using his railroad pass in violation of the law of August 11, an attorney for the Wisconsin Central railroad and holding a position as a notary public, was today placed formally under arrest on complaint of W. H. Berry, editor of a newspaper at Waushara, Wis. The action is for the purpose of testing the anti-pass law passed by the last state legislature.

A NARROW ESCAPE.

Ferryboat Left Dock as Automobile Was Going on.

New York, Sept. 15.—State Railroad Commissioner Frank M. Baker and George W. Dunn, well known upstate Republicans, had a narrow escape from probable death in the East river yesterday. They had been out on Long Island inspecting grade crossings and taking testimony on connecting the railroad station in Long Island. Messrs. Baker and Dunn called an electric hansom and started for New York by means of a ferryboat.

The bell signaling to the captain had been sounded and the hawseers holding the vessel to her landing had been cut when the automobile started down an incline to the boat. The front wheels reached the deck just as the signal was sounded in the engine room ahead. There the automobile stuck, its rear wheels still on the landing.

All efforts on the part of the chauffeur to move his vehicle were unavailing. Meanwhile the paddle wheels had begun to move and a space appeared between the boat and the landing. In a second the cab was being dragged by the chasm. An inch or further and it would have fallen into the river. Sheriff yells from the employes above warned the pilot and the reverse paddle was applied in time to prevent a serious accident.

CHICAGO CLUB WOMEN.

Advent to Abolish Afternoon Receptions and Pink Teas

Chicago, Sept. 15.—The exclusion of afternoon receptions with their pink teas, costly gowns and other luxuries, from the local state and national meetings of the women's clubs was advocated yesterday by Mrs. James E. Perry, president of the state Federation of Women's clubs, in her address before the sixth congressional district convention of women's clubs held at Maywood. She contended that the receptions usually given were extravagant and unbusinesslike.

"It seems to me," she said to the 300 women in attendance, "that it is a waste of time for ladies to spend hours that ought to be devoted to the work of the clubs, gossiping at afternoon receptions. The general federation meetings should stand for the average home where luxuries are the exception. We should go to the conventions to transact business rather than devote our time to pleasure."

Witte's Present to Detectives.

New York, Sept. 15.—Through an order issued by Commissioner of Police McAdoo it was learned yesterday that Harry Foye and James Downing, a detective sergeant who were assigned to guard Dennis White, Russian peace envoy, while in this city, received presents of \$50 each. The commissioner's order was that permission be granted for the detectives to receive the presents, which is required under the police regulations before such gifts can be accepted. Ten per cent will be deducted from the amount for the pension fund.

Duchess of Marlborough Arrives.

New York, Sept. 15.—The Duchess of Marlborough, who was Consul Vanderbilt, arrived here last night on a visit to her son-in-law, the Russian peace envoy. Neither her son nor her husband accompanied her, and it is not expected that the duke will come during his stay.

Women's Democratic League.

New York, Sept. 15.—At a meeting here yesterday the Women's National Democratic league was organized. The promoters of the league will endeavor to carry out plans of organization covering the entire country.

TRADE CONDITIONS ARE SATISFACTORY

Industrial, Commercial and Agricultural Progress Held All Along Line.

FUTURE IS VERY PROMISING.

Labor Disputes Maintained at a Minimum—Some Shortage of Cars.

New York, Sept. 15.—R. G. Dun's Weekly Review of Trade tomorrow will say:

"Industrial, commercial and agricultural progress continues satisfactorily. Nothing has occurred to weaken confidence, the disposition being to extend plans further into the future, and many plants have their facilities engaged well into next year. As demand broadens, there is a natural tendency to enlarge capacity, which adds to the already exceptional structural activity."

"Thus far the weather has not been cold enough to harm the crops that remain to be harvested, and another week of favorable conditions should assure an unprecedented yield of corn. Several settlements maintain labor disputes at the minimum, and mercantile collections continue prompt."

"A few complaints of inadequate transporting facilities from manufacturing centers are attributed to the requirements of grain moving. Railway earnings thus far reported for September were 3.7 per cent larger than last year, while foreign commerce at this port for the last week showed gains of \$2,364,150 in values of exports and \$7,551 in imports, as compared with 1904.

BUNKERS FRANKLY ADMITS PERJURY

Sacramento, Cal., Sept. 15.—Harry Bunkers, former state senator, convicted of bribery while a member of the last legislature, was again in the hands of Grove L. Johnson, counsel in the defense of former Senator E. J. Emmons, also charged with bribery, this morning. Nothing new of importance was developed. Bunkers admitted frankly that he had perjured himself at his own trial, while in this case he was telling the truth.

FIRE AT FORT HAMILTON.

New York, Sept. 15.—Fire this morning destroyed four barrack buildings at Fort Hamilton, in Brooklyn, sending the members of the One Hundred and twenty-third company of United States coast artillery, commanded by Lieut. E. L. Gilmer, from their quarters in such haste that they were able to save but few effects. Loss, \$45,000.

SECY. TAFT IN YOKOHAMA.

Yokohama, Sept. 15.—Secy. of War William H. Taft has arrived here and today received visits from distinguished citizens of Tokio, a large number of local Japanese, and foreign residents. There was no formal reception, the visitors calling direct upon Mr. Taft at his hotel. Afterwards he was the guest of M. Otani, a prominent merchant of this city. All is quiet here.

TEA

THE LAXATIVE OF KNOWN QUALITY. There are two classes of remedies: those of known quality and which are permanently beneficial in effect, acting gently, in harmony with nature, when nature needs assistance; and another class, composed of preparations of unknown, uncertain and inferior character, acting temporarily, but injuriously, as a result of forcing the natural functions unnecessarily. One of the most exceptional of the remedies of known quality and excellence is the ever pleasant Syrup of Figs, manufactured by the California Fig Syrup Co., which represents the active principles of plants, known to act most beneficially, in a pleasant syrup, in which the wholesome Californian blue figs are used to contribute their rich, yet delicate, fruity flavor. It is the remedy of all remedies to sweeten and refresh and cleanse the system gently and naturally, and to assist one in overcoming constipation and the many ills resulting therefrom. Its active principles and quality are known to physicians generally, and the remedy has therefore met with their approval, as well as with the favor of many millions of well informed persons who know of their own personal knowledge and from actual experience that it is a most excellent laxative remedy. We do not claim that it will cure all manner of ills, but recommend it for what it really represents, a laxative remedy of known quality and excellence, containing nothing of an objectionable or injurious character. There are two classes of purchasers: those who are informed as to the quality of what they buy and the reasons for the excellence of articles of exceptional merit, and who do not lack courage to go elsewhere when a dealer offers an imitation of any well known article; but, unfortunately, there are some people who do not know, and who allow themselves to be imposed upon. They cannot expect its beneficial effects if they do not get the genuine remedy. To the credit of the druggists of the United States be it said that nearly all of them value their reputation for professional integrity and the good will of their customers too highly to offer imitations of the Genuine—Syrup of Figs manufactured by the California Fig Syrup Co., and in order to buy the genuine article and to get its beneficial effects, one has only to note, when purchasing, the full name of the Company—California Fig Syrup Co.—plainly printed on the front of every package. Price, 50c per bottle. One size only.
