WHY SMELTERS CALLED BUILT

Do Not Care to Tie Up Money in Ores Which Cannot be Sold Readily.

IS HARD ON THE PRODUCERS.

But Protective Measures Had to be Adopted—Goldfield Shut Down.

There is a good deal of significance about the report from Park City that the great Silver King mine at Park City is likely to cease operations about Nov. 1.

The news from Goldfield that the Goldfield Consolidated properties have been shut down—because the company is unable to effect a settlement with the ore purchasers under 45 days, has an unpleasant ring to it.

The fact is, the smelting companies are hard up for ready cash; the slump in conditions which have prevailed during the past few months have put them face to face with the proposition of being unable to dispose of the product obtained from the ores purchased and rather than continue the practice of making cash settlements and thereby tying up more money in ores, they have been obliged to make a change in their regulations. This is one of the reasons why producers all over the country have been asked to slow down, while those who continue to send their ore in for treatment are told that they must wait for returns.

Asked regarding the report that the American Smelting & Refining company had stopped making immediate settlements, J. M. Hildwell, Ass't. Manager Joseph M. Hildwell said today:

"The fact is, not only the smelters here, but all over the country have been receiving more ore than they could conveniently handle. While we have nothing to do with the Goldfield Consolidated, as that company sells its ore to one of the purchasing companies located in the city, I can readily understand that some such measure as indicated under existing conditions. The Goldfield plant is one that takes ore and smelts it, and the tonnage handled by the railroad applies to Goldfield but to a great many other camps and it is perfectly natural that the smelting companies do not desire to tie up their money for long time any more than anyone else. While this rule works a hardship on some of the producers, the smelters must also protect themselves."

STOCKS OPENED AT BETTER PRICES

Reaction Followed Immediately And Advances Were Soon Wiped Out.

DEALINGS WERE FEVERISH.

Renewed Buying Soon Set In—Gains Soon Lost—Bonds Were Weak.

New York, Oct. 25.—Opening prices of stocks showed many wide advances, but the international issues they fell short, as a rule, from the London party established before the local stock market opened. Some declines were mixed with the gains. St. Paul particularly running off 1/2 and United States Steel 1/4.

Other stocks reacted after the opening from the first advances, Southern railway preferred jumped 1/4 on the first sale, American Smelting rose 1/4, Union Pacific 2, Canadian Pacific 1/4, Northern Pacific 1/4, Great Northern 1/4, Northern preferred 1/4 and several others. An immediate reaction wiped out those gains within 10 minutes, the average level of the market relating to below last night's closing.

At the reaction Illinois Central ruled 1/2 below last night, Denver & Rio Grande 2, American Sugar and American Tobacco preferred 2, Northern Pacific 1/4, Reading 1/4, and Atchafalpa, Louisville & Nashville 1/4, Great Northern 1/4, Southern preferred 1/4, American Locomotive 1/4, and Manhattan, Brooklyn Transit, Corn Products preferred and Great Northern preferred 1/4.

Fresh weakness in a few stocks was ignored in the general list, speculation being dull and steady as soon as the consolidation in Consolidated Gas began, preferred 1/4, American Locomotive 1/4, and Manhattan, Brooklyn Transit, Corn Products preferred and Great Northern preferred 1/4.
