Callahan said business would keep him from occupying the position of manager of the team this year, but when the officials and boys went to him and told him he was the one and only, he said, "All right, then, and rolled up his sleeves (speaking figuratively). PRESIDENT ELIOT ATTACKS PRESENT TARIFF SYSTEM.

Cambridge, Mass., Sept. 21.—In an address to the Reform League of New York, President Charles W. Eliot of Harvard college today made an attack on the existing tariff system.

"The high tariff which has prevailed in the United States since the Civil war has done a little good in the way of building up new industries, but it has done immeasurable harm and is likely to do more and more harm.

"As a country which produces in normal years more grain, cotton and wool than it can consume, it is to the interest of the United States to develop for itself world markets under the most favorable conditions possible.

The tariff prevents or obstructs the attainment of those favorable conditions.

"That the tariff is not necessary to the maintenance of the American wages or the American standards of living appears clearly from the common practice of selling American goods in foreign countries, much lower priced than they are sold in the United States, and yet at a profit.

"If the American people mean to maintain their individual liberty in industry, trade, commerce and politics, they must defend themselves against monopolies."
