NATURE STUDY TEXT BOOKS.

Work of a Local Writer to Be Introduced in Public Schools.

Beginning with the second semester, Monday next, a work on nature study by a local writer will be introduced in the public schools of this district.

The volume consists of 140 pages, or is intended for the primary grades, or grades one, two and three, and is designed not to be placed in the hands of the pupils, but for the teachers.

The primary nature study book is profusely illustrated, and is gotten up in a manner that can scarcely fail to interest the child in the very beginning of its study.

Prof. Cummings was formerly in charge of the nature study work in the State Normal school of the University of Utah.

Written outlines of the work in the grades were prepared by him each month and distributed for the use of each teacher in the school.

Soon requests were made for the booklets from elsewhere in the state.

The national educational association met in Los Angeles in 1909, copies exhibiting their work

New York Board of Trade's Committee Starts Movement Against California's Anti-Japanese Agitation.

Seattle, Wash., Jan. 29.—The Asiatic Exclusion league has made plans for a mass meeting to be held, at which drastic measures will be taken to call attention to the great influx of Japanese in this country.

TO HEAD OFF AGITATION.

New York, Jan. 29.—An important movement with respect to the Japanese question in California was inaugurated today at a meeting of the board of trade's committee on foreign and insular trades.

At the conference which was composed of the committee and others interested in the Japanese trade were representatives of the General Electric company, Kuhn, Loeb & Co., A. A. Van Tyn company, the National City bank, the China and Japan company and Muller, Maclean & Co.

It was pointed out that while Japan sells us \$20,000,000 more goods annually than we sell Japan, it is also true that the \$69,000,000 worth of goods which she sells us consists almost entirely of raw materials.

The committee feels that while the autonomy of the states should be zealously guarded, no state should disregard the fact that international treaties constitute the highest law, nor should they attempt to nullify such treaties or do that which would injure all the states and the Union.

Beginning Monday next and continuing three days there will be on exhibition in the windows of Keith-O'Brien's store, work from the sewing department of the public schools.

Specimens will appear from 95 classes and articles will number over 400.

Each school will have a section to itself, and the school colors will appear.

McDonald's Cocoa Across The Continent.

J. E. Gould & Co., wholesale grocers, Portland, Maine, are located in proximity to the big chocolate centers. Having handled well known brands of cocoa for years they insisted upon testing McDonald's goods. They did. Orders followed for McDonald's cocoa.

And that is the way it goes all over the country. Because every test shows that McDonald's cocoa is the finest on the market.

It is a satisfying, delicious drink every meal--and between. It is a nutritious, health-giving drink--makes muscle and bone and rich red blood.

McDonald's cocoa is to other cocoa what his chocolates are to other makes--superior.
